## New C-S4CPR-2502 Braindumps - C-S4CPR-2502 Dump Collection

If you want to make progress and mark your name in your circumstances, you should never boggle at difficulties. As far as we know, many customers are depressed by the exam ahead of them, afraid of they may fail it unexpectedly. Our C-S4CPR-2502 exam torrents can pacify your worries and even help you successfully pass it. The shortage of necessary knowledge of the exam may make you waver, while the abundance of our C-S4CPR-2502 Study Materials can boost your confidence increasingly.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q63-Q68):

### NEW QUESTION # 63

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- A. Multidimensional Reports
- B. Review Booklets
- C. Object Views
- D. SAC Stories
- E. Lumira Dashboards

**Answer: A,B,D**

Explanation:

The Manage KPIs and Reports app in SAP S/4HANA Cloud Public Edition allows users to create various types of analyses to monitor key performance indicators (KPIs) and generate reports. Below is an explanation of the correct answers:

\* Review Booklets (A): Review booklets are collections of predefined reports and analyses that provide a comprehensive overview of specific business areas. They can be created and customized using the Manage KPIs and Reports app.

\* Multidimensional Reports (C): Multidimensional reports allow users to analyze data from multiple perspectives, such as time, region, or product categories. These reports are supported by the app for detailed analysis.

\* SAC Stories (D): SAC (SAP Analytics Cloud) Stories are interactive dashboards and reports that combine data visualization, analytics, and storytelling. The Manage KPIs and Reports app integrates with SAP Analytics Cloud to create and manage these stories.

\* Lumira Dashboards (B): Lumira Dashboards were part of older SAP BusinessObjects solutions but are not supported in the context of SAP S/4HANA Cloud Public Edition's Manage KPIs and Reports app.

\* Object Views (E): Object views refer to specific views of business objects in SAP systems, but they are not a type of analysis created through the Manage KPIs and Reports app.

#### NEW QUESTION # 64

When using the Local SAP S/4HANA Database Schema migration approach, what is the maximum file size? Note: There are 2 correct answers to this question.

- A. 100 MB per file
- B. 100 MB per ZIP file
- C. 160 MB per file
- D. 160 MB per ZIP file

**Answer: A,C**

#### NEW QUESTION # 65

You want to inform purchasers automatically when an RFQ is close to the quotation deadline but only a low number of supplier quotations have been received. How can you notify purchasers easily in SAP S/4HANA Cloud Public Edition?

- A. By creating new RFQs and sending with email
- B. By developing an application using APIs to send notifications
- C. By defining a workflow using flexible workflows
- D. By using the situation template in situation handling standard framework

**Answer: D**

Explanation:

To notify purchasers automatically when an RFQ is close to the quotation deadline but only a few quotations have been received, the Situation Handling Framework in SAP S/4HANA Cloud Public Edition is the most efficient solution. Below is an explanation of the correct answer:

\* By using the situation template in situation handling standard framework (A): The Situation Handling Framework allows you to configure predefined templates to monitor specific conditions, such as low response rates to RFQs. When the condition is met, the system automatically notifies relevant users.

\* By defining a workflow using flexible workflows (B): While flexible workflows can be configured for notifications, they require more setup and are less suited for real-time monitoring compared to the Situation Handling Framework.

\* By developing an application using APIs to send notifications (C): Developing a custom application is time-consuming and unnecessary when standard tools like the Situation Handling Framework are available.

\* By creating new RFQs and sending with email (D): Manually creating new RFQs and sending emails is inefficient and does not

address the need for automated notifications.

### NEW QUESTION # 66

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Modify building blocks.
- **B. Change approval thresholds.**
- **C. Add new sales organizations.**
- D. Create new scope items.
- **E. Add blocking reasons for billing.**

**Answer: B,C,E**

Explanation:

In the Product-Specific Configuration Phase of SAP Central Business Configuration, you can perform activities that are specific to configuring the system for your business needs. These activities include setting up organizational structures, defining business processes, and customizing configurations. Below are the three correct answers:

\* Add blocking reasons for billing (Option A): Blocking reasons for billing can be configured during the Product-Specific Configuration Phase. This allows organizations to define conditions under which billing documents are blocked for processing. The SAP S/4HANA Cloud Billing Guide confirms this capability.

\* Change approval thresholds (Option C): Approval thresholds for workflows, such as purchase requisitions or invoices, can be adjusted during this phase. This ensures that the system aligns with the organization's governance and compliance requirements. The SAP Workflow Configuration Guide documents this functionality.

\* Add new sales organizations (Option D): Sales organizations can be added during the Product-Specific Configuration Phase to support the organizational structure required for sales and distribution processes. The SAP Organizational Structure Guide confirms this activity.

\* B. Create new scope items: Scope items are predefined by SAP and cannot be created during the Product-Specific Configuration Phase. Instead, they are selected during the scoping phase.

\* E. Modify building blocks: Building blocks are part of the SAP Best Practices content and cannot be modified directly. Customizations are achieved through configuration settings.

\* SAP S/4HANA Cloud Billing Guide: Explains how to configure blocking reasons for billing.

<https://help.sap.com>

\* SAP Workflow Configuration Guide: Provides details on configuring approval thresholds.

\* SAP Organizational Structure Guide: Describes how to add sales organizations during the configuration phase.

### NEW QUESTION # 67

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note:

There are 2 correct answers to this question.

- A. Determine set up instructions for customer-driven integrations.
- **B. Highlight areas that require configuration or customization decisions.**
- **C. Demonstrate SAP Best Practice business processes in the starter system.**
- D. Conduct end-user training on active scope items.

**Answer: B,C**

Explanation:

During Fit-to-Standard workshops, implementation consultants play a critical role in guiding customer experts through the evaluation of SAP Best Practices and identifying gaps between standard processes and customer-specific requirements. Below are the two correct answers:

\* Highlight areas that require configuration or customization decisions (Option B): Consultants help customers identify areas where standard SAP processes may need adjustments to meet specific business needs. This includes highlighting configuration options and discussing potential customizations. The SAP S/4HANA Cloud Fit-to-Standard Workshop Guide emphasizes this responsibility.

\* Demonstrate SAP Best Practice business processes in the starter system (Option C): Consultants demonstrate how SAP Best Practices are implemented in the starter system, providing customers with a clear understanding of standard processes. This helps

customers evaluate whether these processes align with their requirements. The same SAP S/4HANA Cloud Fit-to-Standard Workshop Guide documents this activity.

\* A. Conduct end-user training on active scope items: End-user training is typically conducted during the realization phase, not during Fit-to-Standard workshops. These workshops focus on process alignment rather than training.

\* C. Determine set up instructions for customer-driven integrations: While integrations are important, determining setup instructions is not a primary focus of Fit-to-Standard workshops. This activity is usually addressed during the integration design phase.

\* SAP S/4HANA Cloud Fit-to-Standard Workshop Guide: Explains the objectives and activities of Fit-to-Standard workshops, including demonstrating SAP Best Practices and identifying configuration needs. <https://help.sap.com>

\* SAP Activate Methodology for SAP S/4HANA Cloud Public Edition: Provides an overview of the Fit-to-Standard workshop phase and its deliverables.

Why the Other Options Are Incorrect: Key References:
