## NIS-2-Directive-Lead-Implementer Ausbildungsressourcen & NIS-2-Directive-Lead-Implementer Zertifizierung

Um die Bedürfnisse von den meisten IT-Fachleuten abzudecken, haben das Expertenteam die Prüfungsthemen in den letzten Jahren studiert. So kommen die zielgerichteten Fragen und Antworten zur PECB NIS-2-Directive-Lead-Implementer Zertifizierungsprüfung vor. Die Ähnlichkeit unserer Dumps mit den echten Prüfung beträgt 95%. ZertSoft wird Ihnen helfen, die PECB NIS-2-Directive-Lead-Implementer Prüfung 100% zu bestehen. Sonst erstatteten wir Ihnen die gesamte Summe zurück. Sie können im Internet die Demo zur PECB NIS-2-Directive-Lead-Implementer Zertifizierungsprüfung kostenlos herunterladen, so dass Sie die Zuverlässigkeit unserer Produkte testen können. Schicken Sie doch die Produkte von ZertSoft in den Warenkorb. ZertSoft wird Ihren Traum verwirklichen.

### PECB Certified NIS 2 Directive Lead Implementer NIS-2-Directive-Lead-Implementer Prüfungsfragen mit Lösungen (Q78-Q83):

#### 78. Frage

Scenario 8: FoodSafe Corporation is a well-known food manufacturing company in Vienna, Austria, which specializes in producing diverse products, from savory snacks to artisanal desserts. As the company operates in regulatory environment subject to this NIS 2 Directive, FoodSafe Corporation has employed a variety of techniques for cybersecurity testing to safeguard the integrity and security of its food production processes.

To conduct an effective vulnerability assessment process, FoodSafe Corporation utilizes a vulnerability assessment tool to discover vulnerabilities on network hosts such as servers and workstations. Additionally, FoodSafe Corporation has made a deliberate effort to define clear testing objectives and obtain top management approval during the discovery phase. This structured approach ensures that vulnerability assessments are conducted with clear objectives and that the management team is actively engaged and supports the assessment process, reinforcing the company's commitment to cybersecurity excellence.

In alignment with the NIS 2 Directive, FoodSafe Corporation has incorporated audits into its core activities, starting with an internal assessment followed by an additional audit conducted by its partners. To ensure the effectiveness of these audits, the company meticulously identified operational sectors, procedures, and policies. However, FoodSafe Corporation did not utilize an organized audit timetable as part of its internal compliance audit process. While FoodSafe's Corporation organizational chart does not clearly indicate the audit team's position, the internal audit process is well-structured. Auditors familiarize themselves with established policies and procedures to gain a comprehensive understanding of their workflow. They engage in discussions with employees further to enhance their insights, ensuring no critical details are overlooked.

Subsequently, FoodSafe Corporation's auditors generate a comprehensive report of findings, serving as the foundation for necessary changes and improvements within the company. Auditors also follow up on action plans in response to nonconformities and improvement opportunities.

The company recently expanded its offerings by adding new products and services, which had an impact on its cybersecurity program. This required the cybersecurity team to adapt and ensure that these additions were integrated securely into their existing framework. FoodSafe Corporation commitment to enhancing its monitoring and measurement processes to ensure product quality and operational efficiency. In doing so, the company carefully considers its target audience and selects suitable methods for reporting monitoring and measurement results. This includes incorporating additional graphical elements and labeling of endpoints in their reports to provide a clearer and more intuitive representation of data, ultimately facilitating better decision-making within the organization.

Based on scenario 8, did FoodSafe Corporation define the discovery phase of penetration testing according to NIST SP 800-115?

- A. Yes, the discovery phase is correctly defined
- B. No, the discovery phase is the process of identifying any possible attack by attempting to exploit vulnerabilities

- C. No, in the discovery phase the testing is initiated and a vulnerability analysis is conducted

**Antwort: A**

### 79. Frage

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established an asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on scenario 4, which risk level does the identified threat during StellarTech's assessment fall into?

- A. Very low
- B. Moderate
- C. Low

**Antwort: A**

### 80. Frage

What is the required frequency for Member States to update the register of entities?

- A. Every six months
- B. Every year
- C. Every two years

**Antwort: C**

### 81. Frage

Which of the following teams continuously manages existing threats by establishing rules, identifying exceptions, and detecting emerging risks?

- A. Crisis management team
- B. Security operations center team
- C. Incident response team

**Antwort: B**

## 82. Frage

According to Article 31, what is the recommended approach for competent authorities to supervise public administration entities?

- A. They should have operational independence
- B. They should consult legal experts for guidance on supervision
- C. They should rely solely on national frameworks for guidance on supervision

Antwort: A

## 83. Frage
