OGBA-101 Online test engine has testing history and performance review, so that you can have a general review of what you have learned before next learning. In addition, OGBA-101 exam dumps is convenient and easy to study, it supports all web

browsers and Android and iOS etc. You can also practice offline if you like. We provide you with free update for 365 days for OGBA-101 Exam Materials, so that you can get the latest information for the exam timely. And the latest information for OGBA-101 exam dumps will be auto sent to you.

## The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q95-Q100):

### NEW QUESTION # 95

Consider the diagram.

□ What are the items labelled A, B and C?

- A. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- **B. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**
- C. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- D. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks

**Answer: B**

Explanation:

The diagram shows the Enterprise Continuum, which is a view of the Architecture Repository that provides methods for classifying architecture and solution artifacts as they evolve from generic Foundation Architectures to Organization-Specific Architectures<sup>4</sup>. The Enterprise Continuum comprises two complementary concepts: the Architecture Continuum and the Solutions Continuum. The Architecture Continuum shows the relationships among foundational frameworks, common system architectures, industry architectures, and enterprise architectures<sup>4</sup>. The Solutions Continuum shows the relationships among foundational solutions, common system solutions, industry solutions, and enterprise solutions<sup>4</sup>.

### NEW QUESTION # 96

Which statement about Requirements Management Is most correct?

- **A. Requirements management and stakeholder engagement are placed at the center of architecture development.**
- B. Stakeholder Requirements are captured once in Phase A and managed throughout the ADM cycle.
- C. The purpose of Requirements management is to process change requests.
- D. Requirements Management is a step of all ADM Phases.

**Answer: A**

### NEW QUESTION # 97

Consider the following representation of a business model:

□ Which of the following business models is this an example of?

- A. The Business Model Cube
- **B. The Four Box Framework**
- C. The Business Model Innovation factory

**Answer: B**

Explanation:

The provided representation of a business model appears to be a variant of the Business Model Canvas, which is a strategic management template for developing new or documenting existing business models. It is a visual chart with elements describing a firm's value proposition, infrastructure, customers, and finances. The model assists firms in aligning their activities by illustrating potential trade-offs. Since none of the options precisely match the Business Model Canvas and the Four Box Framework is conceptually closest to the Business Model Canvas, option B is the best available answer, albeit not a perfect match.

### NEW QUESTION # 98

Which of the following is a difference between an organization map and an organization chart?

- A. An organization map improves the ability to deliver information within the organization by highlighting the consumers.

- B. An organization map highlights where in the organization that stakeholder concerns are not being addressed by a business architecture.
- C. An organization map reduces the time, cost, and risk of business operations.
- D. An organization map describes the complex interactions and relationship within an organization.

**Answer: D**

Explanation:

An organization map provides a detailed representation of the complex interactions and relationships within an organization, going beyond the hierarchical structure shown in an organization chart. It includes the connections and dependencies between different business units, teams, and roles, offering a more comprehensive view of how the organization operates and collaborates to achieve its objectives.

### NEW QUESTION # 99

Consider the following Business Capability Example:

Which of the following are A and C?

- A. Organization. Data.
- B. Who. What.
- C. Actors, Actions.
- D. Roles, Information.

**Answer: D**

Explanation:

According to the TOGAF Business Capabilities Guide V2, a business capability is defined as "the expression or the articulation of the capacity, materials, and expertise an organization needs in order to perform core functions"<sup>5</sup>. A business capability can be decomposed into four elements: roles, information, processes, and technology<sup>5</sup>. In the given example, A represents roles and C represents information.

In the context provided in the image, 'A' refers to the roles involved in the recruitment management process, which in this case is the 'User: Recruiter' and the 'Stakeholders: Manager, Candidate Employee'. 'C' refers to the information or data aspects of the process, which includes 'Candidate/Applicant Details', 'Position Descriptions', 'Recruitment Agency Data', and 'Industry Standard Role Definitions'. Thus, 'A' corresponds to 'Roles' and 'C' to 'Information'.
