If you want a relevant and precise content that imparts you the most updated, relevant and practical knowledge on all the key topics of the C\_AIG\_2412 Certification Exam, no other C\_AIG\_2412 study material meets these demands so perfectly as does PrepAwayETE's study guides. The C\_AIG\_2412 questions and answers in these guides have been prepared by the best professionals who have deep exposure of the certification exams and the exam takers needs. The result is that PrepAwayETE's study guides are liked by so many ambitious professionals who give them first priority for their exams. The astonishing success rate of PrepAwayETE's clients is enough to prove the quality and benefit of the study questions of PrepAwayETE.

As we all know, it is difficult to prepare the C\_AIG\_2412 exam by ourselves. Excellent guidance is indispensable. If you urgently need help, come to buy our study materials. Our company has been regarded as the most excellent online retailers of the C\_AIG\_2412 exam question. So our assistance is the most professional and superior. You can totally rely on our study materials to pass the exam. In addition, all installed C\_AIG\_2412 study tool can be used normally. In a sense, our C\_AIG\_2412 Real Exam dumps equal a mobile learning device. We are not just thinking about making money. Your convenience and demands also deserve our deep consideration. At the same time, your property rights never expire once you have paid for money. So the C\_AIG\_2412 study tool can be reused after you have got the C\_AIG\_2412 certificate. You can donate it to your classmates or friends. They will thank you so much.

## (Q42-Q47):

### NEW QUESTION # 42

Which neural network architecture is primarily used by LLMs?

- A. Convolutional Neural Networks (CNNs)
- B. Recurrent neural network architecture
- C. Transformer architecture with self-attention mechanisms
- D. Sequential encoder-decoder architecture

**Answer: C**

Explanation:

Large Language Models (LLMs) primarily utilize the Transformer architecture, which incorporates self-attention mechanisms.

1. Transformer Architecture:

\* Overview: Introduced in 2017, the Transformer architecture revolutionized natural language processing by enabling models to handle long-range dependencies in text more effectively than previous architectures.

GeeksforGeeks

\* Components: The Transformer consists of an encoder-decoder structure, where the encoder processes input sequences, and the decoder generates output sequences.

2. Self-Attention Mechanisms:

\* Functionality: Self-attention allows the model to weigh the importance of different words in a sequence relative to each other, enabling it to capture contextual relationships regardless of their position.

\* Benefits: This mechanism facilitates parallel processing of input data, improving computational efficiency and performance in understanding complex language patterns.

3. Application in LLMs:

\* Model Examples: LLMs such as GPT-3 and BERT are built upon the Transformer architecture, leveraging self-attention to process and generate human-like text.

\* Advantages: The Transformer architecture's ability to manage extensive context and dependencies makes it well-suited for tasks like language translation, summarization, and question-answering.

### NEW QUESTION # 43

What are some features of Joule?

Note: There are 3 correct answers to this question.

- A. Providing coding assistance and content generation.
- B. Streamlining tasks with an AI assistant that knows your unique role.
- C. Maintaining data privacy while offering generative AI capabilities.
- D. Downloading and processing data.
- E. Generating standalone applications.

**Answer: A,B,C**

### NEW QUESTION # 44

What are some benefits of using an SDK for evaluating prompts within the context of generative AI?

Note: There are 3 correct answers to this question.

- A. Maintaining data privacy by using data masking techniques
- B. Creating custom evaluators that meet specific business needs
- C. Supporting low code evaluations using graphical user interface
- D. Automating prompt testing across various scenarios
- E. Providing metrics to quantitatively assess response quality

**Answer: B,D,E**

### NEW QUESTION # 45

What are some components of the training pipeline in SAP AI Core?

Note: There are 2 correct answers to this question.

- A. Automated deployment to Kubernetes clusters
- B. Executables that define the training process
- C. Input datasets stored in a hyperscaler object store
- D. The SAP HANA database for model storage

**Answer: B,C**

#### **NEW QUESTION # 46**

Which technique is used to supply domain-specific knowledge to an LLM?

- A. Prompt template expansion
- B. Fine-tuning the model on general data
- C. Domain-adaptation training
- D. **Retrieval-Augmented Generation**

**Answer: D**

Explanation:

Retrieval-Augmented Generation (RAG) is a technique that enhances Large Language Models (LLMs) by integrating external domain-specific knowledge, enabling more accurate and contextually relevant outputs.

1. Understanding Retrieval-Augmented Generation (RAG):

\* Definition: RAG combines the generative capabilities of LLMs with retrieval mechanisms that access external knowledge bases or documents. This integration allows the model to incorporate up-to-date and domain-specific information into its responses.

\* Mechanism: When presented with a query, the RAG system retrieves pertinent information from external sources and uses this data to inform and generate a more accurate and contextually appropriate response.

2. Application in Supplying Domain-Specific Knowledge:

\* Domain Adaptation: By leveraging RAG, LLMs can access specialized information without the need for extensive retraining or fine-tuning. This approach is particularly beneficial for domains with rapidly evolving information or where incorporating proprietary data is essential.

\* Efficiency: RAG enables models to provide informed responses by referencing external data, reducing the necessity for large-scale domain-specific training datasets and thereby conserving computational resources.

3. Advantages of Using RAG:

\* Up-to-Date Information: Since RAG systems can query current data sources, they are capable of providing the most recent information available, which is crucial in dynamic fields.

\* Enhanced Accuracy: Incorporating external knowledge allows the model to produce more precise and contextually relevant outputs, especially in specialized domains.
