We will provide you with three different versions of our 350-501 exam questions on our test platform. You have the opportunity to download the three different versions from our test platform. The three different versions of our 350-501 Test Torrent include the PDF version, the software version and the online version. The three different versions will offer you same questions and answers, but they have different functions.

Candidates for the Cisco 350-501 Exam

The candidates who should take the Cisco 350-501 exam occupy different positions such as network administrators or engineers. Also, it is helpful for system engineers and network managers. Another category of the target audience for this test is formed of network designers and project managers.

The exam-takers will have 120 minutes to answer the questions included in the test. Nonetheless, Cisco doesn't give too much information on the process itself. However, the candidates should expect to find multiple-choice and multiple-answer as well as drag and drop questions. In any case, its difficulty level is quite high, which means that students should be thoroughly prepared.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q579-Q584):

NEW QUESTION # 579

What does DWDM use to combine multiple optical signals?

- A. time slots
- B. IP protocols
- C. frequency
- D. wavelength

Answer: D

NEW QUESTION # 580

What is a feature of mVPN?

- A. It provides the ability to support multicast over a Layer 3 VPN.
- B. It establishes multiple static MDTs for each multicast domain.
- C. It requires the no ip mroute-cache command to be configured on the loopback interface of each BGP peer
- D. It requires-uncast to be disabled on the multicast domain

Answer: A

Explanation:

mVPN (Multicast Virtual Private Network) is designed to support the efficient transport of multicast streams across a Layer 3 VPN. It enables service providers to use their existing MPLS networks to transport multicast traffic, allowing for scalable and manageable multicast delivery without requiring a separate network infrastructure. NEW QUESTION # 581

Which configuration enables BGP FlowSpec client function and installation of policies on all local interfaces?

- A)
- B)
- C)
- D)

- A. Option D
- B. Option A
- C. Option B
- D. Option C

Answer: D

NEW QUESTION # 582

Refer to the exhibit:

Which information is provided for traceback analysis when this configuration is applied?

- A. source interface
- B. packet size distribution
- C. IP sub flow cache
- D. BGP version

Answer: A

Explanation:

The configuration shown in the exhibit enables IP flow information collection on the interface gigabitethernet0/1. This setup is used
