NEW QUESTION # 68
What is the definition of "service management"?

- A. A set of specialized organizational capabilities for enabling value for customers in the form of services.
- B. Join activities performed by a service provider and a service consumer to ensure continual value co-creation
- C. A formal description of one or more services, designed to address the needs of a target consumer group
- D. A result for a stakeholder enabled by one or more outputs

Answer: A

Explanation:
Service management is a set of specialized organizational capabilities for enabling value for customers in the form of services. These capabilities include tangible things like capital, people, and equipment, and can also include intangible things like knowledge, management and skills. These capabilities can also include intangible things, like knowledge, management, and skills.
