GitHub GitHub-Copilot Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Privacy Fundamentals and Context Exclusions: This section of the exam measures skills of Cybersecurity Specialists and Compliance Officers and covers privacy safeguards and content exclusion settings in GitHub Copilot. It explains how Copilot can identify security vulnerabilities, suggest optimizations, and enforce secure coding practices. It also includes details on content ownership, data filtering mechanisms, and exclusion configurations. The section concludes with troubleshooting guidelines for managing context exclusions and ensuring compliance with organizational security policies.
Topic 2	<ul style="list-style-type: none">How GitHub Copilot Works and Handles Data: This section of the exam measures the skills of Data Security Specialists and DevOps Engineers and covers how GitHub Copilot processes data, handles code suggestions and manages privacy concerns. It explains the data pipeline for Copilot's suggestions, how it gathers context, and how prompts are processed through its AI model. The section also discusses the limitations of AI-generated code, the effects of historical data on suggestions, and the role of prompt crafting. Best practices for improving prompt effectiveness and optimizing AI-generated responses are included.
Topic 3	<ul style="list-style-type: none">Testing with GitHub Copilot: This section of the exam measures skills of QA Engineers and Test Automation Specialists and covers AI-assisted testing methodologies, including the generation of unit tests, integration tests, and edge case detection. It explains how GitHub Copilot improves test effectiveness by suggesting relevant assertions and boilerplate test cases. The section also discusses privacy considerations, organizational code suggestion settings, and best practices for configuring GitHub Copilot's testing features.

GitHub CopilotCertification Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

What is a benefit of using custom models in GitHub Copilot?

- A. Responses are guaranteed to be correct
- B. Responses are faster to produce and appear sooner
- C. Responses use the organization's LLM engine
- **D. Responses use practices and patterns in your repositories**

Answer: D

Explanation:

Custom models in GitHub Copilot allow the tool to learn from the specific code patterns and practices within your repositories. This results in suggestions that are more aligned with your organization's coding standards and conventions, improving the relevance and accuracy of the generated code.

NEW QUESTION # 44

How does the /tests slash command assist developers?

- A. Constructs detailed test documentation.
- **B. Creates unit tests for the selected code.**
- C. Executes test cases to find issues with the code.
- D. Integrates with external testing frameworks.

Answer: B

Explanation:

The /tests slash command in GitHub Copilot Chat creates unit tests for the selected code, helping developers ensure the functionality

and reliability of their code.

NEW QUESTION # 45

What GitHub Copilot pricing plan gives you access to your company's knowledge bases?

- **A. GitHub Copilot Enterprise**
- B. GitHub Copilot Individual
- C. GitHub Copilot Professional
- D. GitHub Copilot Business

Answer: A

Explanation:

GitHub Copilot Enterprise provides access to your company's knowledge bases, enabling the tool to provide contextually relevant suggestions based on your organization's specific documentation and code.

NEW QUESTION # 46

How can you improve the context used by GitHub Copilot? (Each correct answer presents part of the solution. Choose two.)

- A. By adding the important files to your .gitconfig
- B. By adding the full file paths to your prompt of important files
- **C. By adding relevant code snippets to your prompt**
- **D. By opening the relevant tabs in your IDE**

Answer: C,D

Explanation:

Improving the context for GitHub Copilot involves opening relevant files in your IDE to provide immediate context and adding relevant code snippets directly to your prompts to give Copilot specific examples and information.

NEW QUESTION # 47

What is zero-shot prompting?

- A. Giving GitHub Copilot examples of the problem you want to solve
- B. Giving as little context to GitHub Copilot as possible
- C. Giving GitHub Copilot examples of the algorithm and outcome you want to use
- **D. Only giving GitHub Copilot a question as a prompt and no examples**
- E. Telling GitHub Copilot it needs to show only the correct answer

Answer: D

Explanation:

Zero-shot prompting involves asking GitHub Copilot a question or giving a task without providing any examples. This relies on the model's pre-existing knowledge to generate a response.

NEW QUESTION # 48

.....

All of our GitHub-Copilot exam questions have high pass rate as 99% to 100% and they are valid. We revise our GitHub-Copilot study guide aperiodicity.
