SAP C_S4CPR_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.

Topic 2	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.
Topic 3	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.
Topic 4	• Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of a Cloud ERP Consultant and covers foundational knowledge of cloud computing and SAP S • 4HANA Cloud deployment options. It provides insights into multi-tenant vs single-tenant models and helps determine the best fit for customer requirements.

- A. Approve

- B. Obsolete
- C. Invalid
- D. Resolved
- E. Reject

Answer: B,C,D

NEW QUESTION # 57
Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. Predecessor objects have been migrated
- B. Permission to migrate the data has been assigned
- C. All previous migration projects are in the "Finished" status
- D. You select the same migration method previously used for other objects

Answer: A,B

Explanation:
Before migrating data for a specific object inSAP S/4HANA Cloud Public Edition, certain prerequisites must be fulfilled to ensure the migration process is successful and consistent. Based on SAP's official documentation, the following two tasks are mandatory:
* Predecessor objects have been migrated (Option B):In SAP S/4HANA Cloud Public Edition, many objects have dependencies on other objects. For example, before migrating purchase orders, you must ensure that the related vendor master data and material master data have already been migrated. This ensures referential integrity and avoids errors during the migration process. TheSAP Help Portaland SAP Data Migration Guideexplicitly state that predecessor objects must be migrated first to maintain data consistency.
* Permission to migrate the data has been assigned (Option C):To perform data migration, users must have the necessary permissions and roles assigned in the system. These permissions are required to access the migration tools, upload data files, and execute migration projects. Without the appropriate permissions, users will not be able to initiate or complete the migration process. This requirement is documented in theSAP S/4HANA Cloud Security Guideand theSAP Data Migration Best Practices.
* A. You select the same migration method previously used for other objects:While consistency in migration methods can simplify the process, it is not a mandatory requirement. Different objects may require different migration methods based on their complexity and dependencies. SAP allows flexibility in choosing migration methods for each object.
* D. All previous migration projects are in the "Finished" status:It is not mandatory for all previous migration projects to be in the "Finished" status before starting a new migration. However, ensuring that predecessor objects are migrated (as stated in Option B) is critical. Some migration projects can run in parallel, provided there are no dependencies between them.
* SAP Help Portal - Data Migration Overview:Provides an overview of the data migration process, including prerequisites and dependencies.https://help.sap.com
* SAP Data Migration Guide for SAP S/4HANA Cloud Public Edition:Details the steps and prerequisites for migrating data, including the importance of migrating predecessor objects.
* SAP S/4HANA Cloud Security Guide:Explains the role-based permissions required for performing data migration tasks.
* SAP Data Migration Best Practices:Outlines best practices for ensuring a smooth and error-free migration process, including permission assignments and dependency management.
Why the other options are incorrect:Key References:By adhering to these verified guidelines, organizations can ensure a seamless and compliant data migration process in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 58
Which of the following can you do with Automated Invoice Settlement (2LH)? Note: There are 2 correct answers to this question.

- A. Post the appropriate invoices yourself while using evaluated receipt settlement.
- B. Use the evaluated receipt settlement without the supplier's approval.
- C. Schedule a job that will periodically settle invoices.
- D. Settle the created goods movements without receipt of an invoice.

Answer: B
