

# GH-200 Reliable Test Guide | GH-200 Downloadable PDF

P.S. Free & New GH-200 dumps are available on Google Drive shared by DumpsActual: [https://drive.google.com/open?id=1w0CeBxxns8bvmsnMTy7g-HIKFE7cQ\\_Vb](https://drive.google.com/open?id=1w0CeBxxns8bvmsnMTy7g-HIKFE7cQ_Vb)

DumpsActual offers a full refund guarantee according to terms and conditions if you are not satisfied with our GitHub Actions (GH-200) product. You can also get free Microsoft Dumps updates from DumpsActual within up to 365 days of purchase. This is a great offer because it helps you prepare with the latest GitHub Actions (GH-200) dumps even in case of real GitHub Actions (GH-200) exam changes. DumpsActual gives its customers an opportunity to try its GH-200 product with a free demo.

## Microsoft GH-200 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Author and Maintain Workflows:</b> This section of the exam measures skills of DevOps Engineers and Automation Specialists and covers building and managing workflows triggered by events such as pushes, scheduled times, manual triggers, and webhooks. It includes understanding workflow components like jobs, steps, actions, and runners, syntax correctness, environment variables, secrets management, and dependencies between jobs. Candidates will also demonstrate practical abilities to create workflows for various purposes, including publishing packages, using service containers, routing jobs, and deploying releases to cloud providers.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Manage GitHub Actions in the Enterprise:</b> This section measures the expertise of Enterprise Administrators and Platform Engineers in distributing and managing GitHub Actions and workflows at the organizational level. It includes reuse and sharing of templates, strategies for managing reusable components via repositories and naming conventions, controlling access to actions, setting organization-wide usage policies, and planning maintenance to ensure efficient enterprise-wide deployment of GitHub Actions.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Author and Maintain Actions:</b> This domain evaluates the abilities of Action Developers and Automation Engineers to select and create suitable types of GitHub Actions, such as JavaScript, Docker containers, or run steps. It emphasizes troubleshooting action code, understanding the components and file structures of actions, and using workflow commands within actions to communicate with runners, including exit code management.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Consume Workflows:</b> This domain targets Software Developers and Quality Assurance Engineers and focuses on interpreting workflow runs and their outcomes. It covers identifying triggering events, reading workflow configurations, troubleshooting failures by analyzing logs, enabling debug logging, managing environment variables, caching dependencies, and passing data between jobs. Candidates also manage workflow runs, artifacts, approvals, and status badges, as well as locating workflows within repositories and leveraging organizational templated workflows.</li></ul>

## GH-200 Downloadable PDF - GH-200 Latest Exam Answers

Many people now want to obtain the GH-200 certificate. Because getting a certification can really help you prove your strength, especially in today's competitive pressure. The science and technology are very developed now. If you don't improve your soft power, you are really likely to be replaced. Our GH-200 Exam Preparation can help you improve your uniqueness. And our GH-200 study materials contain the most latest information not only on the content but also on the displays.

### Microsoft GitHub Actions Sample Questions (Q18-Q23):

#### NEW QUESTION # 18

What can be used to set a failed status of an action from its code?

- A. output variable
- B. composite run step
- C. Dockerfile CMD
- D. @actions/github toolkit
- E. a non-zero exit code
- F. JavaScript dist/ folder

**Answer: E**

Explanation:

A non-zero exit code is used to set the status of an action to "failed" in GitHub Actions. When the action's script or code exits with a non-zero status, it indicates failure, and GitHub will mark the action as failed.

#### NEW QUESTION # 19

Which of the following commands will set the \$FOO environment variable within a script, so that it may be used in subsequent workflow job steps?

- A. run: echo "::set-env name=FOO:bar"
- B. run: export FOO=bar
- C. run: echo "FOO=bar" >> \$GITHUB\_ENV
- D. run: echo \${{ FOO=bar }}

**Answer: C**

Explanation:

The \$GITHUB\_ENV environment variable is used to set environment variables that persist across steps in a workflow job. By echoing FOO=bar into \$GITHUB\_ENV, the variable FOO will be available in subsequent steps within the same job. Variables set in \$GITHUB\_ENV apply only to the current job.

Example:

```
echo "PR_NUMBER=$pr_number" >> $GITHUB_ENV
```

<https://github.com/orgs/community/discussions/56849>

#### NEW QUESTION # 20

As a developer, you want to review the step that caused a workflow failure and the failed step's build logs. First navigate to the main page of the repository on GitHub. Which section contains the step failure information?

- A. Pull requests
- B. Code
- C. Issues
- D. Actions

- E. Insights

**Answer: D**

Explanation:

The Actions tab on the main page of the repository is where you can find detailed information about the workflow runs, including step failures and build logs. You can review the status of each job and step within the workflow, see the failure messages, and access logs for debugging.

### NEW QUESTION # 21

Which of the following is the best way for an enterprise to prevent certain marketplace actions from running?

- A. It is not possible; if an action is in the marketplace, its use cannot be restricted.
- B. Create a list that is maintained as a . yml file in a . github repository specified in the enterprise. Only these actions can be run.
- C. Create a list of the actions that are allowed to run as an enterprise policy. Only these actions can be run.
- D. Create a list of the actions that are restricted from being used as an enterprise policy. Every other action can be run.

**Answer: C**

Explanation:

The best way for an enterprise to control which GitHub Actions run is by creating a list of approved actions as an enterprise policy. This approach restricts workflows to only use the actions that are explicitly allowed, ensuring security and compliance within the organization.

### NEW QUESTION # 22

In which scenarios could the GITHUB\_TOKEN be used? (Choose two.)

- A. to add a member to an organization
- B. to read from the file system on the runner
- C. to create issues in the repo
- D. to leverage a self-hosted runner
- E. to create a repository secret
- F. to publish to GitHub Packages

**Answer: C,F**

Explanation:

The GITHUB\_TOKEN is automatically provided by GitHub in workflows and can be used to authenticate API requests to GitHub, including publishing packages to GitHub Packages.

The GITHUB\_TOKEN is also used to authenticate API requests for actions like creating issues, commenting, or interacting with pull requests within the same repository.

### NEW QUESTION # 23

.....

Regular practice can give you the skills and confidence needed to perform well on your GH-200 exam. By practicing your GitHub Actions (GH-200) exam regularly, you can increase your chances of success and make sure that all of your hard work pays off when it comes time to take the test. We understand that every GitHub Actions (GH-200) exam taker has different preferences. To make sure that our Microsoft GH-200 preparation material is accessible to everyone, we made it available in three different formats.
