2026 Lpi Valid Exam 101-500 Cram Review

The desktop software Lpi 101-500 practice exam format can be used easily used on your Windows system. Customers can use it without the internet. VCETorrent have made all of the different formats so the students won't face any extra issues and crack 101-500 Certification exams for the betterment of their futures.

Lpi LPIC-1 Exam 101, Part 1 of 2, version 5.0 Sample Questions (Q235-Q240):

NEW QUESTION # 235

What does the command `grub-install /dev/sda` do?

- A. GRUB installs all required files and configures the boot loader on device/`dev/sda`.
- B. GRUB creates partitions on the device/`dev/sda` to be used with Linux.
- C. GRUB sets the default BIOS boot device to `dev/sda`.
- D. GRUB recompiles the Linux Kernel and installs it on the Master Boot Record of device/`dev/sda`.

Answer: A

NEW QUESTION # 236

What `umask` will set the file permissions on a newly created file to `-rw-r--r--` (644)?

- A. 0224
- B. 0022
- C. 0002
- D. 0246

Answer: B

NEW QUESTION # 237

How can the list of files that would be installed by the RPM package file `apache-xml.rpm` be previewed?

- A. `rpm -ql apache-xml.rpm`
- B. `rpm -qp apache-xml.rpm`
- C. `rpm -qpl apache-xml.rpm`
- D. `rpm -qv apache-xml.rpm`

Answer: C

NEW QUESTION # 238

Which of the following commands installs GRUB 2 into the master boot record on the third hard disk?

- A. `grub-setup /dev/sdc`
- B. `grub2 install /dev/sdc`
- C. `grub-mkrescue /dev/sdc`
- D. `grub-mbrinstall /dev/sdc`
- E. `grub-install /dev/sdc`

Answer: E

Explanation:

The command that installs GRUB 2 into the master boot record on the third hard disk is `grub-install /dev/sdc`.

The `grub-install` command is the high-level tool for installing GRUB 2 on a disk or a partition. It takes a device name as an argument and writes the GRUB 2 boot loader information to the specified location. If the device name is a disk, such as `/dev/sdc`, the boot loader information is written to the master boot record (MBR) of the disk, which is the first sector that contains the boot code and the partition table. If the device name is a partition, such as `/dev/sdc1`, the boot loader information is written to the boot sector of the partition, which is the first sector of the partition that contains the boot code and the file system information. The `grub-install` command is part of the 101.1 Determine and configure hardware settings topic of the LPI Linux Essentials certification program¹.

The other commands are either invalid or do not perform the desired task. The `grub2 install` command does not exist, as `grub2` is not a valid command name. The `grub-mkrescue` command is used to create a bootable GRUB 2 rescue image, not to install GRUB 2 on a disk or a partition³. The `grub-mbrinstall` command does not exist, as `mbrinstall` is not a valid subcommand for `grub`. The `grub-setup` command is a low-level tool for installing GRUB 2 on a disk or a partition, but it is not recommended for normal use, as it requires specifying the location of the GRUB 2 core image file⁴.
