**NEW QUESTION # 99**

You need to configure the products for the requirements.

Which configuration should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: Owner tracking dimensions

Requirements. White labeling

\* Trey Research wants to start white labeling its products under the brands of major nutritional retail store brands. These products would only be sold to specific customers.

\* Trey Research will provide and maintain a 'Compare to' price for customers to use to compare the white-labeled products. This Compare to price will also be the default item price for the customer if the customer accidentally lets a contract price expire.

\* The configuration of these restrictions must be applied automatically when creating new products for those customers.

The tracking dimension is a lower-level assortment of products, irrespective of whether it is a serial number for electronic inventory items or a batch number.

Box 2: Released product

To change the Tracking Dimension Group for Products in Dynamics Operations, you need to change settings on both on the product level and the released product level. However, you need to delete the tracking dimension group at the product level prior to making changes to the corresponding released product.
