Actual Nutanix NCP-DB-6.10 Exam Dumps – Pass Exam With Good Scores

Our NCP-DB-6.10 learning guide is for the world and users are very extensive. In order to give users a better experience, we have been constantly improving. The high quality and efficiency of NCP-DB-6.10 exam prep has been recognized by users. The high passing rate of our NCP-DB-6.10 test materials are its biggest feature. As long as you use NCP-DB-6.10 Exam Prep, you can certainly harvest what you want thing. Not only you can pass the NCP-DB-6.10 exam in the shortest time, but also you can obtain the dreaming NCP-DB-6.10 certification to have a brighter future.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q164-Q169):

NEW QUESTION # 164

For an NDB offline upgrade, which NDB CLI command should be used to upload the upgrade bundle?

- A. path=path_to_upgrade_bundle
- B. **upload upgrade_bundle path=path_to_upgrade_bundle**
- C. path=path_to_upgrade_bundle upgrade bundle
- D. upgrade upload_bundle path=path_to_upgrade_bundle upload bundle

Answer: B

Explanation:

For an NDB offline upgrade, you need to download the upgrade bundle from the Nutanix Support Portal and copy it to the NDB server. Then, you need to use the NDB CLI command `upload upgrade_bundle` with the `path` parameter to specify the location of the upgrade bundle file. This command will upload the upgrade bundle to the NDB server and verify its integrity. After uploading the upgrade bundle, you can use the `upgrade` command to perform the upgrade.

NEW QUESTION # 165

When running the Linux prerequisites script, an administrator discovers that the only required argument is -t. What does the -t argument specify?

- A. NDB server IP
- B. Database engine
- C. Timeout interval
- D. Operating System type

Answer: C

Explanation:

When running the Linux prerequisites script for NDB, the -t argument is a required parameter that specifies the timeout interval. This argument defines the maximum time (in seconds) the script will wait for certain operations (e.g., connectivity checks, package installations) to complete before timing out. This is critical during the preinstallation phase to ensure the environment is properly configured and responsive, avoiding indefinite hangs.

NEW QUESTION # 166

An administrator has created a new SQL Server software profile version to apply the latest cumulative update. What should the administrator do to make it available to all users?

- A. Update the software profile version and set the status to Published.
- B. Set the status of the existing software profile version to Unpublished.
- C. Deprecate the existing software profile version and use the new one.
- D. Select the software profile version with the update and optimization,

Answer: A

Explanation:

When an administrator creates a new SQL Server software profile version to apply the latest cumulative update, they should update the software profile version and set the status to Published. This makes the new profile version available to all users. NDB will show available updates for any database server using the software profile as soon as the new profile version is published.

NEW QUESTION # 167

Which statement describes a user in Era with the Database Infrastructure Admin role?

- A. The user is able to manage software profiles, database parameter profiles and SLAs
- B. The user is able to manage software profiles, Network Profiles, database Instance parameter profiles and time machine SLA
- C. The user is able to manage database profiles, Network Profiles, database Instance parameter profiles and time machine SLA
- D. The user is able to manage software profiles, Network Profiles, database parameter profiles and Time Machine SLAs,

Answer: D

Explanation:

The size of a database Time Machine in Nutanix Era is defined by the size of all snapshots and/or transaction logs maintained by Era. The Time Machine leverages Nutanix's efficient snapshot technology to capture the state of the database at different points in time. These snapshots, along with transaction logs that record changes between snapshots, constitute the data maintained by the Time Machine. Therefore, the size of the Time Machine is determined by the total size of these snapshots and transaction logs.

NEW QUESTION # 168

An administrator needs to add multiple databases to an existing PostgreSQL instance. How should the administrator satisfy this requirement?

- A. Modify parameter profile using the GUI.
- B. Modify parameter profile using NDB CLI.
- C. Modify parameter profile using ncli.

- D. Modify parameter profile using post script.

Answer: A

Explanation:

To add multiple databases to an existing PostgreSQL instance managed by NDB, the administrator should use the NDB graphical user interface (GUI). The GUI provides a user- friendly way to modify the parameter profile associated with the PostgreSQL instance, allowing the addition of new databases by adjusting settings such as database names, sizes, or configurations. This process typically involves navigating to the "Databases" or "Instances" section, selecting the PostgreSQL instance, and editing the parameter profile to include additional databases.

NEW QUESTION # 169

.....

Our NCP-DB-6.10 exam materials allow you to have greater protection on your dreams. This is due to the high passing rate of our study materials. Our NCP-DB-6.10 study materials selected the most professional team to ensure that the quality of the NCP-DB-6.10 study guide is absolutely leading in the industry, and it has a perfect service system. The focus and seriousness of our NCP-DB-6.10 Study Materials gives it a 99% pass rate. Using our products, you can get everything you want, including your most important pass rate. Our NCP-DB-6.10 actual exam is really a good helper on your dream road.

Exam NCP-DB-6.10 Lab Questions: <https://www.pass4test.com/NCP-DB-6.10.html>

Nutanix Reliable NCP-DB-6.10 Exam Braindumps Please give us a chance to offer you the most reasonable price product for you, If you love these goods, just choose the APP version when you buy Exam NCP-DB-6.10 Lab Questions - Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 test simulated pdf, then you'll enjoy the unbelievable convenient it gives you, As our NCP-DB-6.10 exam preparation materials are in electronic form, you can use it whenever you want to study and wherever you are, Nutanix Reliable NCP-DB-6.10 Exam Braindumps You will not be afraid of attending exams and failure.

However, you'll need the key when setting up Valid NCP-DB-6.10 Test Blueprint a new PC or when you want to get a visiting friend or family member on the network with their laptop, Apple's Compressor application makes NCP-DB-6.10 compressing video files easy, but Larry Jordan knows a way to hurry up that process.

Reliable NCP-DB-6.10 Exam Braindumps - How to Download for Exam NCP-DB-6.10 Lab Questions Free of Charge

Please give us a chance to offer you the most reasonable price product for you, Reliable NCP-DB-6.10 Exam Braindumps If you love these goods, just choose the APP version when you buy Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 test simulated pdf, then you'll enjoy the unbelievable convenient it gives you.
