Latest C_S4CPB_2508 Exam Price - C_S4CPB_2508 Reliable Test Price

For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the SAP C_S4CPB_2508 certification exam is the proven way to achieve these tasks quickly. Overall, we can say that with the SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2508) exam you can gain a competitive edge in your job search and advance your career in the tech industry.

SAP C_S4CPB_2508 Exam Syllabus Topics:

Topic	Details

Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of Business Process Experts and focuses on preparing, migrating, and validating business data within SAP S • 4HANA Cloud. It also includes setting up and executing business process testing to ensure smooth operations after go-live.
Topic 2	• System Landscapes and Identity Access Management: This section of the exam measures the skills of Implementation Consultants and covers the understanding of SAP system landscapes, tenants, and environments. It also assesses knowledge of identity and access management to ensure secure user provisioning, authentication, and role assignments.
Topic 3	• Configuration and the SAP Fiori Launchpad: This section of the exam measures the skills of Implementation Consultants and covers the ability to configure the system to meet customer requirements. It also evaluates knowledge of using the SAP Fiori Launchpad to personalize user experiences and manage business roles within the cloud environment.
Topic 4	• This section of the exam measures skills of Business Process Experts and focuses on adopting a cloud-first approach during implementations. It also emphasizes the importance of building the right project team and using fit-to-standard workshops to align customer requirements with standard SAP processes.
Topic 5	• Extensibility and Integration: This section of the exam measures the skills of Business Process Experts and evaluates the ability to extend SAP S • 4HANA Cloud functionalities using in-app and side-by-side extensibility options. It also includes integrating SAP systems with external applications to support end-to-end business processes.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q42-Q47):

NEW QUESTION # 42
In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Prepare
- B. Deploy
- C. Realize
- D. Explore

Answer: C

NEW QUESTION # 43
Where do you enable a customer-specific field to be available for Uls and reports relevant for the same business context?

- A. In the Extensibility Cockpit app
- B. In the Runtime Authoring mode
- C. In the Maintain SAP Business Technology Platform Extensions app
- D. In the Custom Fields app

Answer: D

NEW QUESTION # 44
Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?
Note: There are 2 correct answers to this question.

- A. An execution variant has not been maintained.
- B. The test process failed the execution pre-check.
- C. The process steps have been reordered.
- D. Data marked for deletion is picked for execution.

Answer: A,B

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it1.

* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run2.

The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process3.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process4.

NEW QUESTION # 45

Which of the following is SAP's recommended Human Capital Management system (HCCM)?

- A. SAP Concur
- B. SAP SuccessFactors
- C. SAP Fieldglass
- D. SAP Ariba

Answer: B

NEW QUESTION # 46

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "Finished"
- B. When the project status is "Completed"
- C. When the project status is "Not Started"
- D. When the project status in "In Progress

Answer: A

Explanation:

You specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is "Finished". The data retention period is the length of time (in days) that the project and all associated data is kept in the system after you have set the status of the project to Finished. To do this, set the option Data Retention Period to On. The data will be deleted from the SAP S/4HANA system when the data retention time expires. If you set the option Data Retention Period to Off, then the project and all associated data will be kept in the system indefinitely. You can also change the retention time for finished projects on the Technical Information tab of the project settings.
