The SAP C\_BCBAI\_2502 exam questions are real and updated and will repeat in the upcoming SAP C\_BCBAI\_2502 Exam Dumps. By practicing again and again you will become an expert to solve all the SAP C\_BCBAI\_2502 exam questions completely and before the exam time.

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q65-Q70):

### NEW QUESTION # 65

Which SAP solution helps businesses calculate and report the carbon footprint of their products? Please choose the correct answer.

- A. SAP Cloud Platform Integration
- B. SAP Sales and Distribution
- C. SAP BusinessObjects Financial Consolidation
- D. SAP Product Footprint Management

**Answer: D**

Explanation:

SAP Product Footprint Management is the dedicated solution for calculating and reporting the carbon footprint of products, enabling businesses to manage their environmental impact. The correct answer is SAP Product Footprint Management, as it is explicitly designed for this purpose.

SAP documentation states: "SAP Product Footprint Management enables companies to calculate and report the carbon footprint of their products across the entire value chain. It supports sustainability by providing insights into environmental impacts, helping businesses optimize product design and comply with regulations." This solution integrates with SAP S/4HANA to "track material flows and emissions data," allowing companies to "calculate product-specific carbon footprints" and report on sustainability metrics. For example, it helps manufacturers "assess the environmental impact of products from raw material sourcing to end-of-life," supporting compliance with global standards.

The incorrect options are unrelated to carbon footprint reporting. SAP BusinessObjects Financial Consolidation focuses on financial reporting, not environmental metrics. SAP Sales and Distribution manages sales processes, not sustainability. SAP Cloud Platform Integration is a technical integration platform, not specific to carbon footprint management. SAP Product Footprint Management's role in SAP's sustainability portfolio confirms its suitability for this purpose.

#### NEW QUESTION # 66
