# ACD201

Option C : Create a custom plug-in that can write an audit trail to a log file.

**Correct Answer: B**

**QUESTION: 6**

You are code-checking your colleague's process model before marking it as Ready for Deployment. Which three best practices should be applied? (Choose three.)

Option A : All nodes should have exception flows

Option B : All XOR/OR gateways should have a single incoming ow.

Option C : All outgoing flows from a gateway should be labeled

Option D : Node inputs should not make the same query call more than once.

Option E : Activity chaining should be added to the majority of flows.

**Correct Answer: B,C,D**

**QUESTION: 7**

During a sprint retrospective meeting, you need to get the team thinking about the outcomes of the last sprint. Which two basic questions should you ask? (Choose two.)

Option A : What didn't go well and can be improved?

Option B : What are the blockers?

Option C : Who did well in this sprint?

Option D : What went well?

**Correct Answer: A,D**

After our practice materials were released ten years ago, they have been popular since then and never lose the position of number one in this area. Our ACD201 practice quiz has authority as the most professional exam material unlike some short-lived ACD201 Exam Materials. Targeting exam candidates of the exam, we have helped over tens of thousands of exam candidates achieved success now. So you can be successful by make up your mind of our ACD201 training guide.

Our team of experts updates actual Appian Senior Developer (ACD201) questions regularly so you can prepare for the Appian Senior Developer (ACD201) exam according to the latest syllabus. Additionally, we also offer up to 1 year of free Appian Senior Developer (ACD201) exam questions updates. We have a 24/7 customer service team available for your assistance if you get stuck somewhere. Buy Appian ACD201 Latest Questions of FreePdfDump now and get ready to crack the ACD201 certification exam in a single attempt.

## ACD201 Download & New ACD201 Test Voucher

It would take a lot of serious effort to pass the Appian Senior Developer (ACD201) exam, therefore it wouldn't be simple. So, you have to prepare yourself for this. But since we are here to assist you, you need not worry about how you will study for the Appian Senior Developer (ACD201) exam dumps. You can get help from us on how to get ready for the Appian Senior Developer (ACD201) exam questions. We will accomplish this objective by giving you access to some excellent ACD201 practice test material that will enable you to get ready for the Appian Senior Developer (ACD201) exam dumps.

### Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.</li></ul>

### Appian Senior Developer Sample Questions (Q101-Q106):

#### NEW QUESTION # 101

You need to implement a Gender dropdown, where the choice labels may need to be altered in the future. The transactional database tables rely on this data for reporting, so the data must be accurate.

What is the recommended action?

- A. Create an expression rule and modify it as per the business requirement.
- B. Create a constant and modify it as needed per the business requirement.
- C. Create these entries in a table and reference them through a query entity rule as per the business requirement.

**Answer: C**

Explanation:

Storing the dropdown entries in a database table and referencing them through a query entity rule ensures data integrity, flexibility for future changes, and accuracy for reporting purposes.

#### NEW QUESTION # 102

An insurance application has a dashboard in which all the cases with "Accident" case type and "Health Insurance" insurance type are displayed to the user, using the following query:

You need to update the query entity to display all the cases that are "Accident" case type and "Health Insurance" insurance type, or created in the last ten days.

What is the right configuration for the logical expression?

- A.
- B.
- C.

**Answer: B**

Explanation:

A filter for `createdDate >= today() - 10` (records created in the last 10 days).

A nested AND logical expression that requires both `caseType = "Accident"` and `insuranceType = "Health Insurance"`.

### NEW QUESTION # 103

An insurance application has a dashboard in which all the cases with "Accident" case type and "Health Insurance" insurance type are displayed to the user, using the following query:

You need to update the query entity to display all the cases that are "Accident" case type and "Health Insurance" insurance type, or created in the last ten days.

What is the right configuration for the logical expression?

- A.
- B.
- C.

**Answer: A**

Explanation:

A filter for `createdDate >= today() - 10` (records created in the last 10 days).

A nested AND logical expression that requires both `caseType = "Accident"` and `insuranceType = "Health Insurance"`.

### NEW QUESTION # 104

You're building an order management system.

You need to create a field that displays the total number of days it took to deliver each order, and show and sort by this data in a read-only grid. The data must be available in real-time.

Which function is the most appropriate for calculating this value?

- A. `a!customFieldDateDiff()`
- B. `a!subtractDateTime()`
- C. `calworkdays()`

**Answer: A**

Explanation:

`a!customFieldDateDiff()` is specifically designed for calculating date differences as custom record fields, enabling sorting and real-time calculation in read-only grids.

### NEW QUESTION # 105

What are three locations to call an Integration that changes the source data? (Choose three.)

- A. Web API (POST, PUT, DELETE)
- B. Web API (GET)
- C. Process model (Call Integration Smart Service)
- D. Interface component `saveInto` parameter
- E. Rule

**Answer: A,C,E**

Explanation:

Integrations can be called from rules, allowing for source data changes when used in the proper context.

The Call Integration Smart Service in a process model can execute integrations that modify source data.

Web APIs using POST, PUT, or DELETE methods are typically used to change source data via integrations.
