1. Refer to the exhibit.

Health Dashboard > Manage Checks > Frequency
Alerts Dashboard > Manage Checks > Schedule
Health Dashboard > Manage Checks > Schedule
Alerts Dashboard > Manage Checks > Frequency

2. Which expected operations during node addition when the new node has a different AOS version?
 • The entire cluster is upgraded to the latest one-click release.
 • **The node is added and a separate upgrade operation must be performed.**
 • The addition fails and forces the administrator to image using standalone Foundation.

P.S. Free 2026 Nutanix NCP-CN dumps are available on Google Drive shared by Real4Prep: <https://drive.google.com/open?id=1V0S94v0xOWHdwm1Gcmulaj3Lpj1DoKxW>

Similarly, Real4Prep provides you 1 year free updates after your purchase of Nutanix NCP-CN practice tests. These updates will help you prepare well if the content of the exam changes. The Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) demo of the practice exams is totally free and it helps you in examining the NCP-CN study materials.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.
Topic 2	<ul style="list-style-type: none"> Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.

Topic 3	<ul style="list-style-type: none"> • Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.
Topic 4	<ul style="list-style-type: none"> • Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.

NCP-CN Valid Mock Test - Exam NCP-CN Preview

As a worldwide leader in offering the best NCP-CN Test Torrent, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in NCP-CN certification training application as well as interactive sharing and after-sales service. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our Nutanix Certified Professional - Cloud Native v6.10 guide torrent. Any time is available; our responsible staff will be pleased to answer your questions.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q71-Q76):

NEW QUESTION # 71

A Kubernetes administrator needs to deploy a new Kubernetes cluster into a new workspace. This cluster requires a predictive analytics solution that detects current and future anomalies. Which option does the administrator need to deploy after the cluster is ready?

- A. Nutanix Pulse
- B. NCM Intelligent Ops
- C. NKP AI Navigator
- **D. NKP Insights**

Answer: D

NEW QUESTION # 72

A DevOps team faces a growing challenge of managing logs from multiple applications in an NKP cluster. With several teams working on different projects, it is essential to implement a Multi-Tenant Logging system that allows each team to access their own logs securely and efficiently. Initially, two namespaces have been configured for each project, as shown in the exhibit. Then a ConfigMap has also been configured for each tenant, which contains the logging configuration. Which YAML output corresponds to a retention period of 30 days for tenant-innovation and seven days for tenant-analytics?

- A. `yamlCollapseWrapCopyapiVersion: v1kind: ConfigMapmetadata.name: logging-innovation-confignamespace: tenantdata.values.yaml: |loki:structuredConfig:limits_configretention_period: 30d---apiVersion: v1kind: ConfigMapmetadata.name: logging-analytics-confignamespace: tenantdata.values.yaml:`

- |loki:structuredConfig:limits_config:retention_period: 7d
- B. `yamlCollapseWrapCopyapiVersion: v1 kind: ConfigMap metadata.name: logging-innovation-config namespace: tenant-innovation data.values.yaml: |loki:structuredConfig:limits_config:retention_period: 30d --- apiVersion: v1 kind: ConfigMap metadata.name: logging-analytics-config namespace: tenant-innovation data.values.yaml: |loki:structuredConfig:limits_config:retention_period: 7d`
- C. `yamlCollapseWrapCopyapiVersion: v1 kind: ConfigMap metadata.name: logging-innovation-config namespace: tenant-innovation data.values.yaml: |loki:structuredConfig:limits_config:retention_period: 30h --- apiVersion: v1 kind: ConfigMap metadata.name: logging-analytics-config namespace: tenant-analytics data.values.yaml: |loki:structuredConfig:limits_config:retention_period: 7h`
- D. `yamlCollapseWrapCopyapiVersion: v1 kind: ConfigMap metadata.name: logging-innovation-config namespace: tenant-innovation data.values.yaml: |loki:structuredConfig:limits_config:retention_period: 30d --- apiVersion: v1 kind: ConfigMap metadata.name: logging-analytics-config namespace: tenant-analytics data.values.yaml: |loki:structuredConfig:limits_config:retention_period: 7d`

Answer: D

NEW QUESTION # 73

A Kubernetes administrator needs to ensure that the following requirements are met whenever a new workload cluster is deployed to a workspace:

- * Grafana Logging
- * Grafana Loki

* Project Logging
How would the administrator ensure that these components are deployed as part of a cluster deployment?

- A. Enable them in the Insights section under workspace.
- B. Enable them in the Projects section under workspace.
- C. Enable them in the Application section under workspace.
- D. Enable them in the Clusters section under workspace.

Answer: C

Explanation:

The NKPA course details that NKP Platform Applications, such as Grafana Logging, Grafana Loki, and Project Logging, are deployed to Kubernetes clusters to provide monitoring and logging capabilities. To ensure these components are automatically deployed to new workload clusters in a workspace, the administrator must enable them in the Application section under the workspace configuration in the NKP UI.

The course explains that the Application section allows administrators to select and configure platform applications that should be applied to all clusters within a workspace. By enabling Grafana Logging, Grafana Loki (for log aggregation), and Project Logging (for project-specific log management), these components are automatically deployed as part of the cluster provisioning process. The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "To deploy platform applications like Grafana Loki and logging components to new clusters, configure them in the Application section of the workspace settings in the NKP UI." Incorrect Options:

- * A. Enable them in the Insights section under workspace: The Insights section is for analytics and monitoring dashboards, not for deploying logging components.
- * B. Enable them in the Projects section under workspace: Projects are sub-divisions within workspaces for resource allocation, not for configuring platform applications.
- * C. Enable them in the Clusters section under workspace: The Clusters section is for managing cluster settings, not for enabling platform applications.

NEW QUESTION # 74

Which NKP tier is required for the FIPS Compliant Build feature?

- A. Enterprise
- B. Advanced
- C. Starter
- D. Pro

Answer: A

Explanation:

According to the NKPA 6.10 documentation, the FIPS Compliant Build feature is exclusively available for Enterprise tier licensing. This ensures compliance with NIST security standards and provides hardened cryptographic capabilities throughout the Kubernetes cluster stack.

Exact extract from documentation:

"The FIPS-compliant build feature is included in the NKP Enterprise tier, enabling deployments in environments that require strict security compliance." Reference:

Nutanix Kubernetes Platform Administration (NKPA) 6.10 - "Licensing and Feature Tiers" NCP-CN 6.10 Study Guide - "FIPS Compliance in Enterprise Tier"

NEW QUESTION # 75

A company has 30 Edge devices with lightweight Kubernetes, and developers need to push the application to every edge device. An NKP administrator has the NKP Ultimate license tier configured and has access to all kubeconfig files for the 30 edge devices. What is the most efficient way that the administrator can lifecycle manage the application deployments?

- A. Ask the developers to delete the lightweight Kubernetes and deploy new Kubernetes clusters with NKP.
- B. Create a GitHub configuration, deploy it to the 30 edge devices, and configure them to use a GitHub account.
- C. Create a script to automate the deployment to every edge device.
- **D. Create a new Workspace and attach the 30 edge devices to this workspace with Attach Cluster.**

Answer: D

NEW QUESTION # 76

.....

The NCP-CN quiz torrent we provide is compiled by experts with profound experiences according to the latest development in the theory and the practice so they are of great value. Please firstly try out our product before you decide to buy our product. It is worthy for you to buy our NCP-CN exam preparation not only because it can help you pass the exam successfully but also because it saves your time and energy. If you buy our NCP-CN Test Prep you will pass the exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income.
