

C-THR92-2505 Unterlagen mit echte Prüfungsfragen der SAP Zertifizierung

Welche Aussagen treffen auf SAP Logon zu? A. Mit der F4-Hilfe erhält man Hilfe zum SAP-Logon B. Die SAP-Logon Einträge können nicht geändert werden C. SAP Logon ist ein Windows Programm D. Man kann sich auch an einem SAP System anmelden, ohne einen passenden Eintrag im SAP Logon zu definieren (Variable Anmeldung) E. Das SAP Logon kann nur in einer Sprache angezeigt werden	C, D Zu A: mit der F1-Hilfe bekommt man Hilfe zum SAP Logon
Welche Informationen müssen beim Anlegen eines neuen Eintrags im SAP Logon eingegeben werden? A. Mandant B. Systembezeichnung C. System ID D. Sprache	B, C
Was gibt man ein, um in einem neuen Modus die Transaktion XD03 auszuführen? A. /NXD03 B. /OXD03 C. /IXD03 D. XD03	B

Nun gibt es viele IT-Profis in der ganzen Welt und die Konkurrenz der IT-Branche ist sehr hart. So viele IT-Profis entscheiden sich dafür, an der IT-Zertifizierungsprüfung teilzunehmen, um ihre Position in der IT-Branche zu verstärken. Die C-THR92-2505 Prüfung ist eine sehr wichtige SAP-Zertifizierungsprüfung. Aber wenn Sie eine SAP-Zertifizierung erhalten wollen, müssen Sie die Prüfung bestehen.

SAP C-THR92-2505 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Table Reports: This part measures the skills of a Data Analyst and involves creating, managing, and running Table Reports. It focuses on designing tabular data presentations that facilitate straightforward access to detailed workforce analytics information.
Thema 2	Detailed Reporting Tool with Live Data: This section assesses the skills of an Advanced Report Developer and involves working with detailed reports that use live data feeds. It includes building customizable queries and using reporting tools to deliver real-time, actionable data to stakeholders.
Thema 3	Story Reports: This section of the exam measures skills of a Report Creator and covers the creation and management of Story Reports within SAP SuccessFactors. It emphasizes designing queries, configuring pages with widgets, and managing report permissions to generate insightful visualizations.
Thema 4	Provisioning Settings for Reporting: This area focuses on the abilities of a System Administrator and involves configuring and enabling the necessary settings in Provisioning to support reporting tools within SAP SuccessFactors. It includes setup tasks that ensure reporting solutions function properly within the system environment.
Thema 5	Tile-Based Dashboard Framework: This domain targets a Dashboard Designer and covers building and managing tile-based dashboards. It encompasses creating tiles, assigning access, applying filters on dashboard data, and sharing dashboards to provide users with interactive and visually engaging insights.
Thema 6	Report Consumers: This domain evaluates the understanding of a Business User and focuses on how report consumers interact with and utilize generated reports. It highlights user roles, permissions, and effective report sharing practices to ensure reports serve decision-making needs.

Thema 7	• Canvas Reports and Page Designer: This part measures the capabilities of a Report Administrator and involves creating and customizing reports using Canvas Reports and Page Designer. It covers advanced query construction, formatting, pivot creation, and report distribution to enhance data presentation and usability.

SAP C-THR92-2505 Prüfungsvorbereitung, C-THR92-2505 Vorbereitung

Die SAP C-THR92-2505 Zertifizierungsprüfung ist zur Zeit sehr beliebt bei den IT-Fachleuten. Durch die SAP C-THR92-2505 Zertifizierungsprüfung werden Ihre Lebens-und Arbeitsverhältnisse verbessert. Daneben wird Ihre Position in der IT-Branche gefestigt.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting C-THR92-2505 Prüfungsfragen mit Lösungen (Q42-Q47):

42. Frage

While constructing a dashboard, you find that you need to create a tile that requires more complex configuration than what is available with the Online Tile Builder tool. What tool can you use to create this tile?

- A. Business Intelligence Reporting Tool (BIRT)
- B. LMS Report Designer
- C. PDFSam
- **D. YouCalc designer**

Antwort: D

Begründung:

- * Purpose of YouCalc Designer
- * The YouCalc Designer is a specialized tool that allows the creation of highly customized and advanced tiles for dashboards. It supports more complex configurations than the Online Tile Builder.
- * Why Other Options are Incorrect
- * A. PDFSam: This is a tool for splitting and merging PDF files, not related to dashboards.
- * B. BIRT: Business Intelligence Reporting Tool is for building custom reports, not dashboard tiles.
- * C. LMS Report Designer: This tool is specific to Learning Management System (LMS) reporting, not tiles.

43. Frage

Which actions can you perform in a Simple Text component? Note: There are 3 correct answers to this question.

- **A. Select the font, font size, and font style options for the text.**
- B. Select an image to display inline within text.
- **C. Select the background color, numeric list options, and indentation for the text.**
- D. Add a link to an existing canvas report.
- **E. Upload an image to display before or after the text.**

Antwort: A,C,E

Begründung:

In a Simple Text component within SAP SuccessFactors:

- * Upload an Image to Display Before or After the Text (B):
- * You can enhance the text component by adding images that appear before or after the text for visual emphasis.
- * Select Background Color, Numeric List Options, and Indentation (C):
- * Customizing background color, applying numbered lists, and adjusting indentation are supported for formatting text.
- * Select Font, Font Size, and Font Style Options (D):

* Full control over text appearance, including font, size, and style, is provided in the Simple Text component.

44. Frage

You are creating a Story report on Job Classifications. You have configured the chart, table, and input control on the canvas, as displayed in the screenshot. How do you set the input control?

- A. Enable Cascading Effects.
- **B. Configure it for Linked Analysis.**
- C. Create the corresponding filter on each chart.
- D. Convert it to a Story Filter.

Antwort: B

Begründung:

* Linked Analysis

* Configuring input controls for Linked Analysis allows interactions between components (charts, tables) on the same canvas, enabling filters to apply only to selected visuals.

* Why This is Correct

* In the scenario, the input control must affect only the charts and not the table. Linked Analysis ensures this targeted filtering behavior.

* Why Other Options are Incorrect

* B (Create Filters): Manually adding filters is redundant when Linked Analysis can automate the behavior.

* C (Enable Cascading Effects): Cascading effects affect hierarchical filters but are unrelated to input control behavior here.

* D (Convert to Story Filter): A Story Filter would apply globally, affecting all elements, which is not desired.

45. Frage

You are using Report Center to share a canvas report. You share the report with a Dynamic Group (see attached image). Who is the report shared with?

Group Definition

Type a name for your group. Then choose who you want to include in the group.

Group Name:

Choose Group Members: Tip: You can include multiple People Pools in the same group. [See examples](#)

▼ **People Pool**

City

Add another category

▼ **People Pool**

Department

Add another category

[Add another People Pool](#)

- A. Employees of the Sales department
- **B. Employees of the Sales departments and all employees of Atlanta**
- C. Employees of the Sales department of Atlanta
- D. Employees of Atlanta

Antwort: B

Begründung:

- * Dynamic Groups in SAP SuccessFactors:
- * Dynamic groups combine multiple People Pools using logical OR conditions.
- * In the given configuration, the report is shared with employees in Atlanta OR employees in the Sales department.
- * Explanation of the Result:
- * Employees in both conditions are included because the People Pools are treated as separate categories and are not exclusive to each other.

46. Frage

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are NOT using a template.
- B. You are using the percent of total option.
- **C. You are using a query with a static date filter.**
- D. You are using a wrong People Scope.

Antwort: C

Begründung:

- * Issue with Static Date Filters:
- * If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31, 2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.
- * Resolution:
- * Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

47. Frage
