

SAP-C02 Real Exam, SAP-C02 Certification Exam

P.S. Free 2026 Amazon SAP-C02 dumps are available on Google Drive shared by TopExamCollection:
<https://drive.google.com/open?id=1RjD41MhR1dXJM2D9WGwszhy--QgNgpVi>

By our three versions of SAP-C02 study engine: the PDF, Software and APP online, we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of SAP-C02 Practice Questions allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of SAP-C02 study engine, you can learn anywhere at any time.

The SAP-C02 exam covers a broad range of topics related to AWS architecture, including designing and deploying complex applications, designing and deploying enterprise-scale operations, and designing and deploying hybrid IT architectures. SAP-C02 Exam also covers topics related to security, cost optimization, and performance optimization, among others. SAP-C02 exam consists of multiple-choice and multiple-response questions, and candidates have 180 minutes to complete it.

AWS Certified Solutions Architect - Professional (SAP-C02) Valid Exam Reference & SAP-C02 Free Training Pdf & AWS Certified Solutions Architect - Professional (SAP-C02) Latest Practice Questions

If a person fails despite proper AWS Certified Solutions Architect - Professional (SAP-C02) SAP-C02 test preparation and using SAP-C02 practice exam material, TopExamCollection provides a money-back guarantee. If a person fails despite proper AWS Certified Solutions Architect - Professional (SAP-C02) SAP-C02 test preparation and using SAP-C02 practice exam material, TopExamCollection provides a money-back guarantee. TopExamCollection offers three months of free updates if the AWS Certified Solutions Architect - Professional (SAP-C02) exam content changes after the purchase of AWS Certified Solutions Architect - Professional (SAP-C02) valid dumps. TopExamCollection wants to save your time and money, so the authentic and accurate AWS Certified Solutions Architect - Professional (SAP-C02) SAP-C02 Exam Questions help candidates to pass their SAP-C02 certification test on their very first attempt.

Amazon AWS Certified Solutions Architect - Professional (SAP-C02) Sample Questions (Q596-Q601):

NEW QUESTION # 596

A company has developed APIs that use Amazon API Gateway with Regional endpoints. The APIs call AWS Lambda functions that use API Gateway authentication mechanisms. After a design review, a solutions architect identifies a set of APIs that do not require public access. The solutions architect must design a solution to make the set of APIs accessible only from a VPC. All APIs need to be called with an authenticated user.

Which solution will meet these requirements with the LEAST amount of effort?

- A. Deploy the Lambda functions inside the VPC. Provision an EC2 instance, and install an Apache server. From the Apache

- server, call the Lambda functions. Use the internal CNAME record of the EC2 instance to call the API from the VPC.
- B. Create an internal Application Load Balancer (ALB). Create a target group. Select the Lambda function to call. Use the ALB DNS name to call the API from the VPC.
 - C. Remove the DNS entry that is associated with the API in API Gateway. Create a hosted zone in Amazon Route 53. Create a CNAME record in the hosted zone. Update the API in API Gateway with the CNAME record. Use the CNAME record to call the API from the VPC.
 - D. Update the API endpoint from Regional to private in API Gateway. Create an interface VPC endpoint in the VPC. Create a resource policy, and attach it to the API. Use the VPC endpoint to call the API from the VPC.

Answer: D

Explanation:

This solution requires the least amount of effort as it only requires to update the API endpoint to private in API Gateway and create an interface VPC endpoint. Then create a resource policy and attach it to the API. This will make the API only accessible from the VPC and still keep the authentication mechanism intact.

NEW QUESTION # 597

A company is planning a one-time migration of an on-premises MySQL database to Amazon Aurora MySQL in the us-east-1 Region. The company's current internet connection has limited bandwidth. The on-premises MySQL database is 60 TB in size. The company estimates that it will take a month to transfer the data to AWS over the current internet connection.

The company needs a migration solution that will migrate the database more quickly. Which solution will migrate the database in the LEAST amount of time?

- A. Use AWS DataSync with the current internet connection to accelerate the data transfer between the on-premises data center and AWS. Use AWS Application Migration Service to migrate the on-premises MySQL database to Aurora MySQL.
- B. Request a 1 Gbps AWS Direct Connect connection between the on-premises data center and AWS. Use AWS Database Migration Service (AWS DMS) to migrate the on-premises MySQL database to Aurora MySQL.
- C. Order an AWS Snowball Edge Device. Load the data into an Amazon S3 bucket by using the S3 interface. Use AWS Database Migration Service (AWS DMS) to migrate the data from Amazon S3 to Aurora MySQL.
- D. Order an AWS Snowball Device. Load the data into an Amazon S3 bucket by using the S3 Adapter for Snowball. Use AWS Application Migration Service to migrate the data from Amazon S3 to Aurora MySQL.

Answer: C

NEW QUESTION # 598

A company has a website that serves many visitors. The company deploys a backend service for the website in a primary AWS Region and a disaster recovery (DR) Region.

A single Amazon CloudFront distribution is deployed for the website. The company creates an Amazon Route 53 record set with health checks and a failover routing policy for the primary Region's backend service. The company configures the Route 53 record set as an origin for the CloudFront distribution. The company configures another record set that points to the backend service's endpoint in the DR Region as a secondary failover record type. The TTL for both record sets is 60 seconds. Currently, failover takes more than 1 minute. A solutions architect must design a solution that will provide the fastest failover time. Which solution will achieve this goal?

- A. Set the TTL to 1 second for the existing Route 53 record sets that are used for the backend service in each Region.
- B. Deploy an additional CloudFront distribution. Create a new Route 53 failover record set with health checks for both CloudFront distributions.
- C. Create a CloudFront origin group that includes two origins, one for each backend service Region. Configure origin failover as a cache behavior for the CloudFront distribution.
- D. Create new record sets for the backend services by using a latency routing policy. Use the record sets as an origin in the CloudFront distribution.

Answer: C

NEW QUESTION # 599

An EC2-based ticketing service pulls a frequently updated pricing file (stored in S3) on startup. Sometimes EC2s have stale pricing, causing charge issues.

- A. Use Mountpoint for S3 to mount the pricing file to EC2.
- B. Lambda updates DynamoDB with new prices.
- C. Use Multi-Attach EBS volume for price file.
- D. Lambda updates Amazon EFS.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

Mountpoint for Amazon S3 allows EC2 instances to directly access files in S3 as a POSIX-compliant mount point, ensuring they always get the latest data without copying or syncing.

It's simple and cost-effective for read-heavy patterns.

#Mountpoint for Amazon S3

NEW QUESTION # 600

A company is hosting a monolithic REST-based API for a mobile app on five Amazon EC2 instances in public subnets of a VPC. Mobile clients connect to the API by using a domain name that is hosted on Amazon Route 53. The company has created a Route 53 multivalue answer routing policy with the IP addresses of all the EC2 instances. Recently, the app has been overwhelmed by large and sudden increases in traffic. The app has not been able to keep up with the traffic.

A solutions architect needs to implement a solution so that the app can handle the new and varying load.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Create an Application Load Balancer (ALB) in front of the API. Move the EC2 instances to private subnets in the VPC. Add the EC2 instances as targets for the ALB. Update the Route 53 record to point to the ALB.
- B. Separate the API into individual AWS Lambda functions. Configure an Amazon API Gateway REST API with Lambda integration for the backend. Update the Route 53 record to point to the API Gateway API.
- C. Containerize the API logic. Create an Amazon Elastic Kubernetes Service (Amazon EKS) cluster. Run the containers in the cluster by using Amazon EC2. Create a Kubernetes ingress. Update the Route 53 record to point to the Kubernetes ingress.
- D. Create an Auto Scaling group. Place all the EC2 instances in the Auto Scaling group. Configure the Auto Scaling group to perform scaling actions that are based on CPU utilization. Create an AWS Lambda function that reacts to Auto Scaling group changes and updates the Route 53 record.

Answer: B

Explanation:

By breaking down the monolithic API into individual Lambda functions and using API Gateway to handle the incoming requests, the solution can automatically scale to handle the new and varying load without the need for manual scaling actions. Additionally, this option will automatically handle the traffic without the need of having EC2 instances running all the time and only pay for the number of requests and the duration of the execution of the Lambda function.

By updating the Route 53 record to point to the API Gateway, the solution can handle the traffic and also it will direct the traffic to the correct endpoint.

NEW QUESTION # 601

.....

If you are going to take a SAP-C02 Exam, nothing can be more helpful than our SAP-C02 actual exam. Compared with other exam materials, you will definitely check out that our SAP-C02 real test can bring you the most valid and integrated content to ensure that what you study with is totally in accordance with the Real SAP-C02 Exam. And we give sincere and suitable after-sales service to all our customers to provide you a 100% success guarantee to pass your exams on your first attempt.
