

Real Splunk SPLK-2002 Exam Questions [2026]-Secrets To Pass Exam In First Try

What's more, part of that Actualtests4sure SPLK-2002 dumps now are free: <https://drive.google.com/open?id=1qioK-fbMDGeqXtJm0Gzb9UIuF4NZZYKT>

We provide our candidates with valid SPLK-2002 vce dumps and the most reliable pass guide for the certification exam. Our IT professionals written the latest SPLK-2002 test questions based on the requirement of the certification center, as well as the study materials and test content. By using our online training, you may rest assured that you grasp the key points of SPLK-2002 Dumps Torrent for the practice test.

As long as you are willing to exercise on a regular basis, the exam will be a piece of cake, because what our SPLK-2002 practice questions include are quintessential points about the exam. They are almost all the keypoints and the latest information contained in our SPLK-2002 Study Materials that you have to deal with in the real exam. And we have high pass rate of our SPLK-2002 exam questions as 98% to 100%. It is hard to find in the market.

High Pass-Rate SPLK-2002 Download Pdf offer you accurate Discount Code | Splunk Splunk Enterprise Certified Architect

Splunk trained experts have made sure to help the potential applicants of Splunk SPLK-2002 certification to pass their Splunk SPLK-2002 exam on the first try. Our PDF format carries real Splunk Enterprise Certified Architect exam dumps. You can use this format of Splunk SPLK-2002 Actual Questions on your smart devices.

Splunk Enterprise Certified Architect Sample Questions (Q60-Q65):

NEW QUESTION # 60

(Which of the following is a benefit of using SmartStore?)

- A. Knowledge Object replication.
- **B. Separating storage from compute.**
- C. Automatic selection of replication and search factors.
- D. Cluster Manager is no longer required.

Answer: B

Explanation:

According to the Splunk SmartStore Architecture Guide, the primary benefit of SmartStore is the separation of storage from compute resources within an indexer cluster. SmartStore enables Splunk to decouple indexer storage (data at rest) from the compute layer (indexers that perform searches and indexing).

With SmartStore, active (hot/warm) data remains on local disk for fast access, while older, less frequently searched (remote) data is stored in an external object storage system such as Amazon S3, Google Cloud Storage, or on-premises S3-compatible storage.

This separation reduces the storage footprint on indexers, allowing organizations to scale compute and storage independently.

This architecture improves cost efficiency and scalability by:

- * Lowering on-premises storage costs using object storage for retention.
- * Enabling dynamic scaling of indexers without impacting total data availability.
- * Reducing replication overhead since SmartStore manages data objects efficiently.

SmartStore does not affect replication or search factors (Option A), does not handle Knowledge Object replication (Option C), and the Cluster Manager is still required (Option D) to coordinate cluster activities.

NEW QUESTION # 61

A three-node search head cluster is skipping a large number of searches across time. What should be done to increase scheduled search capacity on the search head cluster?

- A. Change `limits.conf` value for `max_searches_per_cpu` to a higher value.
- B. Add another search head to the cluster.
- C. Create a job server on the cluster.
- D. `server.conf` `captain_is_adhoc_searchhead = true`.

Answer: A

Explanation:

Explanation

Changing the `limits.conf` value for `max_searches_per_cpu` to a higher value is the best option to increase scheduled search capacity on the search head cluster when a large number of searches are skipped across time.

This value determines how many concurrent scheduled searches can run on each CPU core of the search head.

Increasing this value will allow more scheduled searches to run at the same time, which will reduce the number of skipped searches.

Creating a job server on the cluster, running the `server.conf` `captain_is_adhoc_searchhead = true` command, or adding another search head to the cluster are not the best options to increase scheduled search capacity on the search head cluster. For more information, see [Configure `limits.conf`] in the Splunk documentation.

NEW QUESTION # 62

Consider a use case involving firewall data. There is no Splunk-supported Technical Add-On, but the vendor has built one. What are the items that must be evaluated before installing the add-on? (Select all that apply.)

- A. Identify number of scheduled or real-time searches.
- B. Verify if Technical Add-On needs to be installed onto both a search head or indexer.
- C. Identify the maximum number of forwarders Technical Add-On can support.
- D. Validate if this Technical Add-On enables event data for a data model.

Answer: A,D

Explanation:

A Technical Add-On (TA) is a Splunk app that contains configurations for data collection, parsing, and enrichment. It can also enable event data for a data model, which is useful for creating dashboards and reports. Therefore, before installing a TA, it is important to identify the number of scheduled or real-time searches that will use the data model, and to validate if the TA enables event data for a data model. The number of forwarders that the TA can support is not relevant, as the TA is installed on the indexer or search head, not on the forwarder. The installation location of the TA depends on the type of data and the use case, so it is not a fixed requirement

NEW QUESTION # 63

Which search head cluster component is responsible for pushing knowledge bundles to search peers, replicating configuration changes to search head cluster members, and scheduling jobs across the search head cluster?

- A. Deployer
- **B. Captain**
- C. Deployment server
- D. Master

Answer: B

NEW QUESTION # 64

The guidance Splunk gives for estimating size on for syslog data is 50% of original data size. How does this divide between files in the index?

- **A. rawdata is: 15%, tsidx is: 35%**
- B. rawdata is: 35%, tsidx is: 15%
- C. rawdata is: 10%, tsidx is: 40%
- D. rawdata is: 40%, tsidx is: 10%

Answer: A

Explanation:

Explanation

The guidance Splunk gives for estimating size on for syslog data is 50% of original data size. This divides between files in the index as follows: rawdata is 15%, tsidx is 35%. The rawdata is the compressed version of the original data, which typically takes about 15% of the original data size. The tsidx is the index file that contains the time-series metadata and the inverted index, which typically takes about 35% of the original data size. The total size of the rawdata and the tsidx is about 50% of the original data size. For more information, see [Estimate your storage requirements] in the Splunk documentation.

NEW QUESTION # 65

.....

With the increasing marketization, the product experience marketing has been praised by the consumer market and the industry. Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the Splunk Enterprise Certified Architect study training dumps, so we provide free pre-sale experience to help users to better understand our products. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of SPLK-2002 Latest Questions to download. If the user is still unsure which is best for him, consider applying for a free trial of several different types of test materials. It is believed that through comparative analysis, users will be able to choose the most satisfactory SPLK-2002 test guide.

SPLK-2002 Discount Code: <https://www.actualtests4sure.com/SPLK-2002-test-questions.html>

Among a multitude of SPLK-2002 practice materials in the market, you can find that our SPLK-2002 exam questions are the best with its high-quality and get a whole package of help as well as the best quality SPLK-2002 study materials from our services, We take our candidates' future into consideration and pay attention to the development of our SPLK-2002 real test reviews constantly, SPLK-2002 soft practice material can provide simulation test system and numerous times of setup with no restriction.

Professor Larry Meiller, Talk Show Host, Wisconsin Public Radio, Nobody's more qualified than Kirchner to write this book, Among a multitude of SPLK-2002 practice materials in the market, you can find that our SPLK-2002 Exam Questions are the best with its high-quality and get a whole package of help as well as the best quality SPLK-2002 study materials from our services.

Trusted Splunk SPLK-2002: Splunk Enterprise Certified Architect Download Pdf - Newest Actualtests4sure SPLK-2002 Discount Code

We take our candidates' future into consideration and pay attention to the development of our SPLK-2002 real test reviews constantly, SPLK-2002 soft practice material can provide simulation test system and numerous times of setup with no restriction.

We also estimate the following trend of exam questions may SPLK-2002 appear in the next exam according to syllabus, This only shows that the ability of our IT elite team is really high.
