## Reliable PL-200 Braindumps Book, Testking PL-200 Exam Questions

The certification is necessary to get a job in your desired Microsoft company. Success in the test gives you an edge over the others because you will have certified skills that will make a good impression on the interviewer. Most people preparing for the PL-200 Exam are confused about preparation. How will they get real and updated Microsoft Power Platform Functional Consultant (PL-200) exam questions?

## Creating and managing Power Automate

This section checks one's knowledge of the creation of flows, design and management of business flows, and building UI flows. Under this domain, applicants should master the logic control implementation, learn about the types of flow components, parallel branches configuration, the addition of action steps and workflows to the business process flow, and defining use cases when it comes to UI flows, to name a few.

## Microsoft Power Platform Functional Consultant Sample Questions (Q133-Q138):

### NEW QUESTION # 133

A company has marketing teams for different regions.

A user creates and publishes a chatbot within Microsoft Teams for their specific marketing team.

The base metrics retrieved by the chatbot are relevant to all marketing teams.

The other marketing teams request access to the chatbot.

You need to publish the chatbot to the entire company.

What should you do?

- A. Export the chatbot and import it into a corporate environment.
- B. Invite the other teams to the team that has the chatbot.
- C. Copy the published chatbot link and email it to the other teams
- D. Configure the chatbot to be used with the Teams channel.
- E. **Submit the chatbot for admin approval.**

**Answer: E**

Explanation:

Show to teammates and shared users

You can share your bot by adding it to the Microsoft Teams app store, Built for your org > Built by your colleagues section. Only your teammates and shared users will find the bot there.

Important

Only teammates or shared users can find and install the bot in the Microsoft Teams app store Built by your colleague section. The bot will not show for everyone in the organization even if it is configured to allow everyone to use the bot. To show the bot to the organization, submit the bot for admin's approval to show in Microsoft Teams app store Built by your org section.

### NEW QUESTION # 134

You need to build a Power BI dashboard for sales managers to track opportunities.

When a new sale closes that is greater than \$1 million, a notification must pop up and an email must be sent to the leadership team.

You need to ensure the email is sent without editing the Microsoft Dataverse.

Which two elements should you configure? Each correct answer is part of the solution.

NOTE: Each correct selection is worth one point.

- A. **a Power Automate flow**
- B. a paginated report to save to Microsoft OneDrive
- C. **alerts in Power BI**
- D. a custom connector
- E. a calculated column in the Dataverse

**Answer: A,C**

Explanation:

In order to build a Power BI dashboard for sales managers to track opportunities and send notifications and emails when a new sale closes that is greater than \$1 million, you should configure:

A). alerts in Power BI: You can set up alerts in Power BI that will trigger when a specific condition is met. For example, you can set an alert to trigger when the value of a specific field in the "Opportunities" table exceeds \$1 million.

E). a Power Automate flow: To send an email to the leadership team when an alert is triggered, you can create a Power Automate flow that is triggered by the Power BI alert. The flow can then use the "Send an email" action to send an email to the leadership team with the necessary information about the sale that exceeded \$1 million.

**NEW QUESTION # 135**

You have a Power Apps portal app that supports a sales community and a service community in the same environment. The only language configured in the environment is English. The company wants to add support for two more languages.

The solution must meet the following requirements:

- \* Languages must be for both sales and service functions.
- \* The company logo and colors must be used and apply to all screens.
- \* Communities must be separate with different URLs and access lists.

You need to configure the solution.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Languages	<ul style="list-style-type: none"><li>Create two portals, one for each community.</li><li>Create three portals, one for each language.</li><li>Create one portal and import translations.</li><li>Create six portals, one for each combination of language and community.</li></ul>
 Company logo and colors	<ul style="list-style-type: none"><li>Add themes.</li><li>Add web resources.</li><li>Add a portal header and footer</li></ul>

**Answer:**

Explanation:

Requirement	Configuration
Languages	<ul style="list-style-type: none"><li>Create two portals, one for each community. !</li><li>Create three portals, one for each language.</li><li>Create one portal and import translations.</li><li>Create six portals, one for each combination of language and community.</li></ul>
Company logo and colors	<ul style="list-style-type: none"><li>Add themes. !</li><li>Add web resources.</li><li>Add a portal header and footer</li></ul>

Explanation:

Box 1: Create two portals, one for each community

Power Apps portal app languages

Box 2: Add themes

You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system. For example, you can create your personal product branding by adding a company logo and providing table-specific coloring. A theme can be created by using the Themes area, without requiring a developer to write code. You can create, clone, change, or delete themes that are used in your environment.

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-themes-organization-branding>

**NEW QUESTION # 136**

You create a canvas app that uses data from a Microsoft SQL Server database.

You use a dataflow to move some of the data from the database to Microsoft Dataverse. Users will filter the data by using the app.

You need to filter data in the dataflow and in the canvas app.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more

than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Answer:**

**Explanation:**

**Reference:**

To filter data in a canvas app, you should use Power Fx. Power Fx is a no-code, low-code, and code-based platform that enables you to build custom business logic and automate workflows in your Power Platform apps. It allows you to create custom formulas and expressions in the app using a functional language, which allows you to filter data in the app.

Power Fx can be used to create custom formulas and expressions in the app which can filter data in the app by using its built-in functions and operators. You can filter data by using the filter, sort, and group by functions, as well as by using custom formulas and conditions. You can also use the advanced editor to write complex queries using Power Fx code.

### NEW QUESTION # 137

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record.

You need to find the Note record.

Solution: Use Categorized Search to search for the word run.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Instead use Relevance Search.

Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming" or "streamed." Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>
