Candidates who pass the exam obtain the Google Associate Cloud Engineer certification, which is valid for two years.

## Google Associate Cloud Engineer Exam Sample Questions (Q176-Q181):

### NEW QUESTION # 176

All development (dev) teams in your organization are located in the United States. Each dev team has its own Google Cloud project. You want to restrict access so that each dev team can only create cloud resources in the United States (US). What should you do?

- A. Create a folder to contain all the dev projects. Create an organization policy to limit resources in US locations.
- B. Create an organization to contain all the dev projects. Create an Identity and Access Management (IAM) policy to limit the resources in US regions.
- C. Create an Identity and Access Management (IAM) policy to restrict the resources locations in all dev projects. Apply the policy to all dev roles.
- **D. Create an Identity and Access Management (IAM) policy to restrict the resources locations in the US. Apply the policy to all dev projects.**

**Answer: D**

### NEW QUESTION # 177

You have a virtual machine that is currently configured with 2 vCPUs and 4 GB of memory. It is running out of memory. You want to upgrade the virtual machine to have 8 GB of memory. What should you do?

- **A. Stop the VM, increase the memory to 8 GB, and start the VM.**
- B. Rely on live migration to move the workload to a machine with more memory.
- C. Stop the VM, change the machine type to n1-standard-8, and start the VM.
- D. Use gcloud to add metadata to the VM. Set the key to required-memory-size and the value to 8 GB.

**Answer: A**

Explanation:

[https://cloud.google.com/compute/docs/instances/creating-instance-with-custom-machine-type#add\\_extended\\_memory\\_to\\_an\\_existing\\_vm\\_instance](https://cloud.google.com/compute/docs/instances/creating-instance-with-custom-machine-type#add_extended_memory_to_an_existing_vm_instance)

### NEW QUESTION # 178

Your organization uses G Suite for communication and collaboration. All users in your organization have a G Suite account. You want to grant some G Suite users access to your Cloud Platform project. What should you do?

- **A. Grant them the required IAM roles using their G Suite email address.**
- B. Enable Cloud Identity in the GCP Console for your domain.
- C. Create a CSV sheet with all users' email addresses. Use the gcloud command line tool to convert them into Google Cloud Platform accounts.
- D. In the G Suite console, add the users to a special group called cloud-console-users@yourdomain.com. Rely on the default behavior of the Cloud Platform to grant users access if they are members of this group.

**Answer: A**

Explanation:

Reference:

Default behavior does not grant access to the "your GCP Project" Default behavior allow only create billing account and project - When the organization is created, all users in your domain are automatically granted Project Creator and Billing Account Creator IAM roles at the organization level. This enables users in your domain to continue creating projects with no disruption.

### NEW QUESTION # 179

Your security team has been reluctant to move to the cloud because they don't have the level of network visibility they're used to. Which feature might help them to gain insights into your Google Cloud network?

- A. Subnets
- B. Firewall rules
- **C. Flow logs**
- D. Routes

**Answer: C**

### NEW QUESTION # 180

You have created a subnet named subnetace1 with 16,382 addresses using 192.168.0.0. Later you realize that you won't require too many addresses, and so you want to reduce addresses to 254. Which of the following command would you use?

- A. gcloud compute networks subnets expand-ip-range subnetace1 --prefix-length=28
- **B. There is no command in google cloud to reduce the number of available addresses in a subnet.**
- C. gcloud compute networks subnets expand-ip-range subnetace1 --prefix-length=12
- D. gcloud compute networks subnets expand-ip-range subnetace1 --size=248

**Answer: B**
