## Google - Associate-Google-Workspace-Administrator - High-quality Associate Google Workspace Administrator Valid Exam Braindumps

Real4Prep insists on providing you with the best and high quality exam dumps, aiming to ensure you 100% pass in the actual test. Being qualified with Google certification will bring you benefits beyond your expectation. Our Google Associate-Google-Workspace-Administrator practice training material will help you to enhance your specialized knowledge and pass your actual test with ease. Associate-Google-Workspace-Administrator Questions are all checked and verified by our professional experts. Besides, the Associate-Google-Workspace-Administrator answers are all accurate which ensure the high hit rate.

## Google Associate Google Workspace Administrator Sample Questions (Q57-Q62):

### NEW QUESTION # 57

An employee with a Workspace Business Plus license at your company is going on a long leave soon. The employee will not need access to their Google Workspace data, but their teammates will need access to the employee's data. When the employee returns from leave, you will need to restore access to their account, data, emails, and shared documents. You need to preserve the employee's Workspace data while also minimizing cost while they are on leave. What should you do?

- A. Copy the employee's emails, and transfer their file ownership to a teammate. Delete the user account.
- B. Export the account data by using Takeout, and remove the user license in the Admin console.
- C. Suspend their account in the Admin console.
- **D. Purchase an Archived User license and assign the license to the employee.**

**Answer: D**

Explanation:

To preserve an employee's Google Workspace data while they are on long leave, allow teammates access to that data, and minimize costs with the intention of fully restoring the account upon their return, the best course of action is to purchase an Archived User license and assign it to the employee.

#### **NEW QUESTION # 58**

You notice an increase in support tickets related to Gmail. Multiple users are reporting that their emails are not loading, and they are receiving error messages. You need to troubleshoot the issue and identify potential causes. What should you do?

- A. Collect the users' browser versions and extensions to identify potential compatibility issues.
- B. Review the users' email forwarding settings to ensure that emails are not being redirected to incorrect addresses.
- C. Analyze the users' Gmail labels and filters to determine whether incoming emails are being inadvertently blocked.
- **D. Gather HAR files from affected users to capture network traffic and analyze request/response details.**

**Answer: D**

Explanation:

When users report issues like "emails not loading" and "receiving error messages" in Gmail, especially if it's a new or widespread problem, it often points to network-related issues, client-side problems, or interactions between the browser and Google's servers.

A HAR (HTTP Archive) file captures all the network requests and responses that occur in a web browser. This detailed log is invaluable for diagnosing web application issues, including:

Identifying specific error codes from the server.

Analyzing request and response headers.

Checking the timing of requests to see if there are performance bottlenecks.

Pinpointing blocked requests or failed resources.

#### **NEW QUESTION # 59**

You work for a multinational organization. Employees in several office buildings are experiencing issues with Google Voice, including dropped calls and poor call quality. You need to quickly determine whether this is a localized issue or a broader Google Voice service disruption. What should you do?

- A. Verify whether users in the affected buildings have been assigned Google Voice licenses.
- B. Use the security investigation tool to search user log events for "Call failed", and analyze packet loss data.
- C. Check the Google Workspace Updates blog for announcements about Google Voice issues.
- **D. Check the Google Workspace Status Dashboard for reported service outages or disruptions.**

**Answer: D**

Explanation:

When multiple users across different office buildings experience issues with a Google Workspace service like Google Voice (dropped calls, poor call quality), the first and most efficient step to determine if it's a widespread service disruption or a localized issue is to check the official Google Workspace Status Dashboard. This dashboard provides real-time and historical information on the status of all Google Workspace services.

#### **NEW QUESTION # 60**

Your company recently installed a free email marketing platform from the Google Workspace Marketplace. The marketing team is unable to access customer contact information or send emails through the platform. You need to identify the cause of the problem. What should you do first?

- A. Use the security investigation tool to review Gmail logs.
- B. Verify that the email marketing platform's subscription is active and up-to-date.

- C. Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled.
- **D. Check the OAuth scopes that are granted to the email marketing platform and ensure the platform has access to Contacts and Gmail.**

**Answer: D**

Explanation:

When a third-party application from the Google Workspace Marketplace is installed, it requests specific permissions (OAuth scopes) to access Google Workspace data and services. If the marketing team is unable to access customer contact information or send emails, the most likely cause is that the installed email marketing platform was not granted the necessary OAuth scopes for Contacts and Gmail during the installation or approval process.

#### **NEW QUESTION # 61**

You've received multiple reports about a suspicious email from someone who is pretending to be from your organization's human resources department. The email is prompting employees to click a link for a password update. You want to remediate this sender's emails. What should you do?

- **A. Use the security investigation tool to search for users who received the suspicious email, and select Mark message as phishing**
- B. Notify all employees and request that they report this email as spam.
- C. Create an activity rule to alert administrators to similar emails from that sender.
- D. Use the security investigation tool to action the suspicious email and select Mark message as spam.

**Answer: A**

Explanation:

The security investigation tool allows you to search for and take action on suspicious emails within your organization. Marking the email as phishing helps to flag the email as malicious and prevents further emails from the same sender from being delivered to users' inboxes. This also ensures that the email is properly categorized for review and investigation by your security team.

#### **NEW QUESTION # 62**

.....

We have professional technicians examine the website every day, and if you purchase Associate-Google-Workspace-Administrator learning materials from us, we can offer you a clean and safe online shopping environment, and if you indeed meet any questions in the process of buying, you can contact us, our technicians will solve the problem for you. Moreover, Associate-Google-Workspace-Administrator Exam Braindumps of us contain most of knowledge points for the exam, and they will help you pass the exam successfully.
