

100% Pass GIAC - GICSP Useful Sample Exam

Our GICSP actual exam can also broaden your horizon; activate your potential to deal with difficulties. You will not only get desirable goal with our GICSP exam practice but with superior outcomes that others who dare not imagine. The scarcity of efficient resource impaired many customers' chance of winning. So choosing materials blindly is dangerous to your exam and you must choose reliable and qualities like our GICSP simulating questions.

If you are going to purchase GICSP Study Materials online, you may pay attention to your money safety. With applying the international recognition third party for the payment, your money and account safety can be guaranteed if you choose us. And the third party will protect your interests. In addition, GICSP training materials are high-quality, for we have a professional team to research the latest information, and you can use them at ease. Besides if you have little time to prepare for your exam, you can also choose us, you just need to spend 48 to 72 hours on studying, you can pass the exam. Choose us, and you will never regret!

Certification GIAC GICSP Exam | GICSP Books PDF

The GIAC GICSP exam questions are being offered in three different formats. The names of these formats are GIAC GICSP PDF dumps file, desktop practice test software, and web-based practice test software. All these three GIAC GICSP Exam Questions formats are easy to use and assist you in GIAC GICSP exam preparation.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q62-Q67):

NEW QUESTION # 62

An organization has their ICS operations and networking equipment installed in the Purdue model level 3. Where should the SIEM for this equipment be placed in relation to the existing Level 3 devices?

- A. On the same subnet in Level 3
- B. On a different subnet in Level 3
- C. On a management subnet in Level 4
- D. On a management subnet in Level 2

Answer: C

Explanation:

According to the Purdue model and best practices outlined in GICSP, Level 4 corresponds to the enterprise or business network, often containing management and security monitoring infrastructure such as Security Information and Event Management (SIEM) systems.

Placing the SIEM on a management subnet in Level 4 (B) keeps monitoring tools separated from the operational control network (Level 3), reducing the risk that a compromised Level 3 device could affect the security infrastructure itself. It also allows the SIEM to collect logs from multiple network segments securely and apply enterprise-wide analysis.

This segregation supports defense-in-depth and aligns with GICSP's emphasis on secure network segmentation and monitoring.

NEW QUESTION # 63

As part of a threat modeling exercise for an ICS facility, you need to evaluate potential attack vectors that could be used to compromise the system. Which of the following actions should be prioritized during the exercise?

(Select all that apply)

Response:

- A. Review previous incident reports and intelligence from similar industries
- B. Focus only on internal threats while ignoring external actors
- C. Assess vulnerabilities in ICS-specific communication protocols
- D. Identify external threats such as malware targeting ICS protocols

Answer: A,C,D

NEW QUESTION # 64

What information can be found by dumping data at rest from a Purdue Enterprise Reference Architecture level 0/1 device?

- A. Static cryptographic keys
- B. Frequency-hopping algorithm that the RF chip will use
- C. Firmware on read-protected chip

Answer: A

Explanation:

Level 0 and Level 1 devices in the Purdue model include sensors, actuators, and controllers such as PLCs.

Dumping data at rest from these devices often reveals static cryptographic keys (C) stored within device memory or configuration files.

Firmware on read-protected chips (A) is generally inaccessible without specialized hardware attacks.

Frequency-hopping algorithms (B) pertain to wireless devices and are typically secured and not directly stored in the general memory dump.

GICSP stresses the risk of key compromise from device data extraction as it can enable unauthorized control or decryption of communications.

NEW QUESTION # 65

Martin is writing a document that describes in general terms how to secure embedded operating systems. The document includes issues that are specific to embedded devices vs desktop and laptop operating systems.

However, it does not call out specific flavors and versions of embedded operating systems. Which type of document is Martin writing?

- A. Procedure
- B. Guideline
- C. Policy
- D. Standard

Answer: B

Explanation:

A Guideline (A) provides general recommendations and best practices without mandatory requirements or detailed instructions.

Procedures (B) are step-by-step instructions for specific tasks.

Standards (C) specify mandatory requirements, often with measurable criteria.

Policies (D) establish high-level organizational directives and rules.

Martin's document provides general, non-mandatory advice applicable broadly, fitting the definition of a guideline.

NEW QUESTION # 66

Which of the following devices is typically found at Level 1 of the PERA model?

Response:

- A. Programmable Logic Controllers (PLCs)
- B. Actuators
- C. Sensors
- D. Firewalls

Answer: A

NEW QUESTION # 67

.....

All our three versions are paramount versions. PDF version of GICSP practice questions - it is legible to read and remember, and support customers' printing request, so you can have a print and practice in papers. Software version of GICSP guide materials - It support simulation test system, and times of setup has no restriction. Remember this version support Windows system users only. App online version of GICSP study quiz - Be suitable to all kinds of equipment or digital devices.
