## SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Recruiting: Candidate Experience Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Why is it important to set up CSB Role Based Permission from CSB > Users > Roles? Note: There are 2 correct answers to this question.

- A. When CSB Role Based Permission is enabled, administrators receive a notification that users also need permissions in Admin Center.
- B. Until CSB Role Based Permission is enabled, NO users can access CSB.
- C. Until CSB Role Based Permission is enabled, all users with access to CSB have all permissions in the tool.
- D. Site setup settings are located within CSB and should only be accessed by trained administrators.

**Answer: C,D**

### NEW QUESTION # 15

You have enabled and created a branded email layout for your customer. When can this custom email layout be used? Note: There are 2 correct answers to this question.

- A. When sending an email from the Applicant Workbench
- B. When sending an email associated with a Recruiting email trigger
- C. When sending an email associated with an applicant status
- D. When sending an email from the Candidate Search page

**Answer: A,D**

#### NEW QUESTION # 16

Which of the following are included in a standard Recruiting statement of work? Note: There are 3 correct answers to this question.

- **A. Configure one standard XML feed.**
- B. Configure one custom XML feed.
- **C. Configure 20 Category or Content pages.**
- D. Enable Mobile Apply.
- **E. Configure one job layout.**

**Answer: A,C,E**

#### NEW QUESTION # 17

What are some leading practices when creating Category pages? Note: There are 3 correct answers to this question.

- **A. Page titles should end with the word Jobs or Careers for better search engine optimization (SEO).**
- B. Category pages do NOT contain jobs that appear on other Category pages.
- **C. Category pages host minimal content to allow candidates to find jobs quickly and easily.**
- D. Category pages contain different headers and footers than the Home page.
- **E. Category pages use the same design layout to provide a consistent user experience.**

**Answer: A,C,E**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Category pages in Career Site Builder (CSB) group jobs (e.g., "Sales Jobs") and require best practices for usability and SEO. Let's evaluate:

\* Option C (Page titles should end with the word Jobs or Careers for better search engine optimization (SEO)): Correct. This boosts keyword relevance and ranking.

\* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "For optimal SEO, Category page titles should end with 'Jobs' or 'Careers' (e.g., 'Sales Jobs'), improving search engine rankings for job-related queries."

\* Reasoning: "Engineering Jobs" on careers.bestrun.com ranks higher for "engineering jobs" than "Engineering Roles," configured in CSB > Pages > Category > Title.

\* Practical Example: "Best Run" sets "Sales Jobs at Best Run," appearing in Google search results.

\* Option D (Category pages host minimal content to allow candidates to find jobs quickly and easily): Correct. Simplicity aids navigation and focus.

\* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Category pages should host minimal content beyond job listings and filters, ensuring candidates can quickly locate and apply for relevant positions."

\* Reasoning: On careers.bestrun.com/sales-jobs, a list with filters (e.g., location) avoids clutter from extra text, improving conversion rates.

\* Practical Example: "Best Run" limits content to 10 jobs and a filter bar, tested for usability.

\* Option E (Category pages use the same design layout to provide a consistent user experience): Correct. Uniformity enhances familiarity.

\* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Use the same design layout across Category pages to ensure a consistent candidate experience, leveraging CSB's templating for uniformity."

\* Reasoning: A two-column layout with jobs on the right and filters on the left, set in CSB > Layouts, applies to "Sales Jobs" and "Tech Jobs."

\* Practical Example: "Best Run" applies this across all categories, verified in a sandbox.

\* Option A: Incorrect. Jobs can overlap (e.g., "Sales" and "Remote Jobs") based on filters.

\* Option B: Incorrect. Headers/footers are global, not page-specific.

: SAP SuccessFactors Recruiting: Candidate Experience - Career Site Builder Administration Guide (Category Pages).

#### NEW QUESTION # 18

What are some of the search engine optimization (SEO) leading practices achieved by creating a career site with Career Site Builder (CSB)? Note: There are 3 correct answers to this question.

- A. CSB uses metadata to help ensure that jobs and pages are search engine-friendly.
- B. CSB supports creating Category pages to host jobs, which helps build SEO value more than specific job postings.
- C. A new site map is created and delivered to Google and Bing weekly.
- D. The jobs posted to CSB sites are accessible to website crawlers.
- E. CSB automatically populates hidden text on every page with the keywords provided in the metadata.

**Answer: A,B,D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

SEO in Career Site Builder (CSB) enhances visibility on search engines like Google by leveraging structured design and content.

Let's explore:

\* Option A (CSB uses metadata to help ensure that jobs and pages are search engine-friendly):

Correct. Metadata (e.g., Page Title, Meta Keywords, Meta Description) optimizes pages for indexing.

\* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "CSB leverages metadata, including Page Title, Meta Keywords, and Meta Description, configured in Site Settings, to ensure that job pages and content are optimized for search engines, improving discoverability."

\* Reasoning: For "Best Run," setting "Jobs at Best Run" as Page Title and "Sales, Engineering" as Meta Keywords makes careers.bestrun.com searchable for "Best Run jobs." This is configured in CSB > Site Settings.

\* Practical Example: A Google search for "engineering jobs" shows "Jobs at Best Run" with the Meta Description snippet.

\* Option C (The jobs posted to CSB sites are accessible to website crawlers): Correct. CSB's HTML structure allows crawlers to index job content.

\* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Jobs posted to CSB sites are designed to be accessible to website crawlers, with structured data and URLs that allow search engines to index each job posting effectively."

\* Reasoning: Unlike ATS systems with login walls, careers.bestrun.com/job/123 offers public HTML (e.g., <h1>Job Title</h1>), readable by Googlebot.

\* Practical Example: "Best Run" confirms 100% job indexation via Google Search Console.

\* Option E (CSB supports creating Category pages to host jobs, which helps build SEO value more than specific job postings):

Correct. Category pages provide evergreen, keyword-rich content.

\* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Creating Category pages (e.g., 'Sales Jobs') in CSB builds SEO value by providing persistent, keyword-rich pages that outlast individual job postings, driving organic traffic over time."

\* Reasoning: careers.bestrun.com/sales-jobs ranks for "sales jobs" longer than a single job page that expires, configured in CSB > Pages.

\* Practical Example: "Best Run"'s "Engineering Jobs" page boosts rankings over a deleted

"Engineer" job.

\* Option B: Incorrect. The sitemap is submitted once post-production, not weekly, via Google Search Console.

\* Option D: Incorrect. Hidden text violates SEO guidelines; metadata is visible and legitimate.
