Quiz 2026 Cisco High Pass-Rate 350-701 Practice Engine

BONUS!!! Download part of DumpsTorrent 350-701 dumps for free: https://drive.google.com/open?id=13xG-3sVTMrPN08ksQ5d4sFqn6PVk1Z8g

Firstly, our company always feedbacks our candidates with highly-qualified 350-701 study guide and technical excellence and continuously developing the most professional exam materials. Secondly, our 350-701 study materials persist in creating a modern service oriented system and strive for providing more preferential activities for your convenience. Last but not least, we have free demos for your reference, as in the following, you can download which 350-701 Exam Materials demo you like and make a choice. Therefore, you will love our 350-701 study materials!

The Implementing and Operating Cisco Security Core Technologies (350-701 SCOR) exam is a prerequisite for obtaining the Cisco Certified Specialist – Security Core certification. It is also a part of the requirements for the CCNP Security and CCIE Security certificates. This qualifying test measures the candidates' expertise in the implementation and operation of key security technologies, such as endpoint protection & detection, Cloud security, secure network access, network security, content security, visibility, and enforcements.

100% Pass 2026 The Best Cisco 350-701 Practice Engine

No matter who you are, I believe you can do your best to achieve your goals through our 350-701 Preparation questions! For we have three different versions of 350-701 exam materials to satisfy all your needs. The PDF version of 350-701 practice guide can be printed so that you can take it wherever you go. And the Software version can simulate the real exam environment and support offline practice. Besides, the APP online can be applied to all kind of electronic devices.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q561-Q566):

NEW QUESTION # 561
Which two parameters are used for device compliance checks? (Choose two.)

- A. DNS integrity checks
- B. device operating system version
- C. endpoint protection software version
- D. Windows registry values
- E. DHCP snooping checks

Answer: B,E

NEW QUESTION # 562
Which two behavioral patterns characterize a ping of death attack? (Choose two)

- A. The attack is fragmented into groups of 8 octets before transmission.
- B. The attack is fragmented into groups of 16 octets before transmission.
- C. Short synchronized bursts of traffic are used to disrupt TCP connections.
- D. Malformed packets are used to crash systems.
- E. Publicly accessible DNS servers are typically used to execute the attack.

Answer: A,D

Explanation:
Ping of Death (PoD) is a type of Denial of Service (DoS) attack in which an attacker attempts to crash, destabilize, or freeze the targeted computer or service by sending malformed or oversized packets using a simple ping command.
A correctly-formed ping packet is typically 56 bytes in size, or 64 bytes when the ICMP header is considered, and 84 including Internet Protocol version 4 header. However, any IPv4 packet (including pings) may be as large as 65,535 bytes. Some computer systems were never designed to properly handle a ping packet larger than the maximum packet size because it violates the Internet Protocol documented Like other large but well-formed packets, a ping of death is fragmented into groups of 8 octets before transmission. However, when the target computer reassembles the malformed packet, a buffer overflow can occur, causing a system crash and potentially allowing the injection of malicious code.

NEW QUESTION # 563
An organization uses Cisco FMC to centrally manage multiple Cisco FTD devices. The default management port conflicts with other communications on the network and must be changed. What must be done to ensure that all devices can communicate together?

- A. Manually change the management port on Cisco FMC and all managed Cisco FTD devices
- B. Change the management port on Cisco FMC so that it pushes the change to all managed Cisco FTD devices
- C. Set the tunnel port to 8305
- D. Set the tunnel to go through the Cisco FTD

Answer: A

Explanation:
The FMC and managed devices communicate using a two-way, SSL-encrypted communication channel, which by default is on port 8305.
Cisco strongly recommends that you keep the default settings for the remote management port, but if the management port conflicts with other communications on your network, you can choose a different port. If you change the management port, you must change it for all devices in your deployment that need to communicate with each other.

NEW QUESTION # 564
Drag and drop the security solutions from the left onto the benefits they provide on the right.

Answer:

Explanation:

NEW QUESTION # 565
Where are individual sites specified to be block listed in Cisco Umbrella?

- A. Security settings
- B. Destination lists
- C. Content categories
- D. Application settings

Answer: B

NEW QUESTION # 566
......

We all know that Implementing and Operating Cisco Security Core Technologies (350-701) exam dumps are an important section of the Implementing and Operating Cisco Security Core Technologies (350-701) exam that is purely based on your skills, expertise, and knowledge. So, we must find quality 350-701 Questions drafted by industry experts who have complete knowledge regarding the Implementing and Operating Cisco Security Core Technologies (350-701) certification exam and can share the same with those who want to clear the 350-701 exam. The best approach to finding Implementing and Operating Cisco Security Core Technologies (350-701) exam dumps is to check the DumpsTorrent that is offering the Implementing and Operating Cisco Security Core Technologies (350-701) practice questions.
