| Topic 3 | <ul style="list-style-type: none"> <li>Cybersecurity roles and responsibilities and risk management: This section measures the expertise of Security Leaders and Risk Managers in defining and managing cybersecurity roles and responsibilities. It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.</li> </ul>   |

## PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established an asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on the scenario above, answer the following question:

What organizational model has StellarTech embraced?

- A. Divisional
- B. Functional

- C. Matrix

**Answer: B**

#### NEW QUESTION # 71

An organization has decided to provide its cybersecurity training to its employees to improve their digital behavior and awareness of cybersecurity risks. Which proficiency level (PL) does this initiative primarily belong to?

- A. PL1 (Aware)
- B. PL3 (Experienced)
- C. PL2 (Trained)

**Answer: C**

#### NEW QUESTION # 72

What does integration testing involve?

- A. Both A and B, depending on the objectives of the organization
- B. Testing combination of modules as a group to analyze their interactions and functionality
- C. Testing and analyzing the functionality of each individual module in isolation

**Answer: B**

#### NEW QUESTION # 73

Scenario 5:Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability.

Based on scenario 5, Astral Nexus Power's hired an external consultant to provide guidance to the cybersecurity team compromised by the company's employees. Is this acceptable?

- A. o, the cybersecurity team must be compromised by inside staff only to ensure confidentiality and avoid disclosing internal processes to external parties
- B. Yes, for establishing the cybersecurity team, decisions can be made to incorporate inside staff and guidance of an external expert
- C. No, the cybersecurity team must be compromised by external cybersecurity experts only

**Answer: B**

#### NEW QUESTION # 74

Which of the following entities are included on the scope of the NIS 2 Directive?

- A. Diplomatic and consular missions of Member States in third countries
- B. Public administration entities whose activities are predominantly carried out in national security
- C. Entities engaged in nuclear power plant electricity production

Answer: C

#### NEW QUESTION # 75

.....

The company is preparing for the test candidates to prepare the NIS-2-Directive-Lead-Implementer exam guide professional brand, designed to be the most effective and easiest way to help users through their want to get the test NIS-2-Directive-Lead-Implementer certification and obtain the relevant certification. In comparison with similar educational products, our NIS-2-Directive-Lead-Implementer Training Materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market. Our NIS-2-Directive-Lead-Implementer practice materials have been well received mainly for the advantage of high pass rate as 99% to 100%.
