Professional AI-102 Latest Test Prep Covers the Entire Syllabus of AI-102

We do admire our experts' familiarity and dedication with the industry all these years. By their help, you can qualify yourself with AI-102 guide materials. Our experts pass onto the exam candidate their know-how of coping with the exam by our AI-102 Exam Braindumps. Exam candidates are susceptible to the influence of ads, so our experts' know-how is impressive to pass the AI-102 exam instead of making financial reward solely.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q367-Q372):

NEW QUESTION # 367

You are developing the shopping on-the-go project.

You need to build the Adaptive Card for the chatbot.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation

Text Description automatically generated

□ Text Description automatically generated

□ Box 1: name.en

Box 2: "\$when": "\${stockLevel != 'OK'}"

Product displays must include images and warnings when stock levels are low or out of stock.

Box 3: image.altText.en

NEW QUESTION # 368

You are developing a service that records lectures given in English (United Kingdom).

You have a method named `AppendToTranscriptFile` that takes translated text and a language identifier.

You need to develop code that will provide transcripts of the lectures to attendees in their respective language. The supported languages are English, French, Spanish, and German.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 369

You have an Azure Cognitive Search solution and an enrichment pipeline that performs Sentiment Analysis on social media posts.

You need to define a knowledge store that will include the social media posts and the Sentiment Analysis results.

Which two fields should you include in the definition? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. tables
- B. `storageConnectionString`
- C. files
- D. `storageContainer`
- E. objects

Answer: B,D

Explanation:

In Azure Cognitive Search, a knowledge store is an optional capability that allows you to persist the enriched data from a skillset (enrichment pipeline) into an Azure Storage account. This is often used when you want to further analyze or visualize enriched content, e.g., sentiment analysis results from social media posts.

When defining a knowledge store, you need:

* `storageConnectionString`

* This is required so the enrichment pipeline can connect to your Azure Storage account.

* Without it, the knowledge store cannot persist any data.

* `storageContainer`

* This specifies the container in Blob Storage where enriched documents or projections will be stored.

* This allows you to persist the original documents and enriched outputs such as sentiment analysis scores.

Other options (not correct in this case):

* `tables` # This is a projection type used within a knowledge store to structure output in Table Storage, but it's not required in the definition itself.

* `files` # Another projection type for storing enriched documents as files in Blob Storage, but again, not a required field in the definition itself.

* `objects` # A projection type used for representing enriched documents as JSON objects in Blob Storage.

Thus, while tables, files, and objects are used inside projections within a knowledge store, the definition itself always requires a storage connection string and storage container.

The answer:

- * A. storageContainer
 - * C. storageConnectionString
 - * Knowledge store in Azure Cognitive Search
 - * How to define a knowledge store
- Microsoft References

NEW QUESTION # 370

You are developing a webpage that will use the Video Indexer service to display videos of internal company meetings.

You embed the Player widget and the Cognitive Insights widget into the page.

You need to configure the widgets to meet the following requirements:

Ensure that users can search for keywords.

Display the names and faces of people in the video.

Show captions in the video in English (United States).

How should you complete the URL for each widget? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 371

You are building a call handling system that will receive calls from French-speaking and German-speaking callers. The system must perform the following tasks;

- * Capture inbound voice messages as text.

- * Replay messages in English on demand.

Which Azure Cognitive Services should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

- * Speech-to-text converts the caller's spoken French/German audio into text.

- * The text must then be translated to English.

- * Finally, Text-to-speech converts the translated text into spoken English for playback.

- * Therefore, the combination of Translator + Text-to-speech is required for the replay step.

Comprehensive Explanation

- * Speech-to-text in Azure AI Speech

- * Azure AI Translator

- * Text-to-speech in Azure AI Speech

Microsoft References

Final Answer:

- * To capture messages # Speech-to-text

- * To replay messages # Text-to-speech and Translator

NEW QUESTION # 372

.....

The Designing and Implementing a Microsoft Azure AI Solution (AI-102) is available in three easy-to-use forms. The first one is AI-102 dumps PDF format. It is printable and portable. You can print AI-102 questions PDF or access them via your smartphones, tablets, and laptops. The PDF format can be used anywhere and is essential for students who like to learn on the go.
