

HPE7-A03 Examengine & HPE7-A03 Zertifikatsfragen

Übrigens, Sie können die vollständige Version der ZertPruefung HPE7-A03 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1qMP3rTP5DVFv2yT-ZpIW8NvRNP7jXL->

Die HP HPE7-A03 Zertifizierungsprüfung ist eine wichtige HP Zertifizierungsprüfung. Aber es ist nicht einfach, die HP HPE7-A03 Zertifizierungsprüfung zu bestehen. Um den Druck der Kandidaten zu entlasten und Zeit und Energie zu ersparen hat ZertPruefung viele Prüfungsmaterialien entwickelt. So können Sie im ZertPruefung die geeignete und effiziente Trainingsmethode wählen, um die HPE7-A03 Prüfung zu bestehen.

HP HPE7-A03 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Thema 2	<ul style="list-style-type: none">Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Thema 3	<ul style="list-style-type: none">Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Thema 4	<ul style="list-style-type: none">Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.

Die anspruchsvolle HPE7-A03 echte Prüfungsfragen von uns garantiert Ihre bessere Berufsaussichten!

Sie können im Internet teilweise die Fragenkatalogen zur HP HPE7-A03 Zertifizierungsprüfung von ZertPruefung kostenlos herunterladen. Dann werden Sie mehr Vertrauen in unsere Produkte haben. Sie können sich dann gut auf Ihre HP HPE7-A03 Zertifizierungsprüfung vorbereiten. Schicken bitte schnell die Produkte von ZertPruefung in den Warenkorb.

HP Aruba Certified Campus Access Architect Exam HPE7-A03

Prüfungsfragen mit Lösungen (Q21-Q26):

21. Frage

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100.000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client would like to include Blue Dot wayfinding for their carpeted office space. The retail floors are not currently in scope. What would be needed to ensure proper licensing of the solution?

- A. Qty 1 Meridian Tracking subscription
Qty 1 Meridian Blue Dot subscription
- **B. Qty 1 Meridian Blue Dot subscription**
- C. Qty 4 Meridian Blue Dot subscriptions
- D. Qty 4 Meridian Map subscriptions
Qty 4 Meridian Blue Dot subscriptions

Antwort: B

Begründung:

For implementing Blue Dot wayfinding in the carpeted office space of the multinational financial institution, a Meridian Blue Dot subscription is essential. Meridian's Blue Dot wayfinding technology allows for real-time indoor navigation, which can enhance the experience of employees and visitors by providing turn-by-turn directions within the office space. Given that the requirement is specifically for the carpeted office space and not for the retail floors, a single Meridian Blue Dot subscription would be the starting point to enable this functionality. This subscription would cover the deployment of the Blue Dot technology across the specified office floors, allowing for the integration of this feature into the institution's app or digital platform for indoor navigation. Additional subscriptions, such as Meridian Map subscriptions, might be required for more extensive mapping needs, but based on the provided options and the specific request for Blue Dot functionality, a single Blue Dot subscription would be the most direct answer.

22. Frage

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands.

Their US-based headquarters HQ1 was refreshed last year based on the Aruba ESP architecture. You have treated the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x Aruba 8360-16Y2C in VSX (ISL 2 ICOG0E DAC)

Access Slack: 10 x Slack of Aruba 6200F 48G Class4 PoE 4SFP- 740W each stack has A members. VSF with 10GbE VSF

links) 12 x 10GbE uplink per stack) During the presentation of your design to the CTO of "Don't Buy at Us" you were informed about the changes they want you to incorporate into the updated design

1. HQ2 will include the EMEA regional distribution center (EMEA-OISTR) next to the HQ2.
 2. Only two pairs of OS1 are available between HQ2 and EMEA-DISTR.
 3. The uplinks from all access stacks need to increase to 2 x 25GbE. the fiber in HQ2 and EMEA-DISTR is certified for 25GbE.
 4. EMEA-DISTR needs at least 7 x stack of Aruba 48 ports switches (each stack has 4 members).
- Which answer based on best practice is presenting the correct Switch BOM for the updated design?

- A. 
- B. 
- C. 
- D. 

Antwort: D

Begründung:

Based on the requirements provided by "Don't Buy at Us," the updated design needs to accommodate 25GbE uplinks and a minimum of 7 stacks of 48-port Aruba switches for the EMEA-DISTR. Option C is the most suitable based on best practices, as it proposes:

- * A core configuration consisting of two Aruba 8360-12C in VSX for the collapsed core with ISL of 2x100GbE DAC, which will provide robust core networking with high-speed interconnects, suitable for the demands of a regional distribution center and headquarters.
- * Aggregation with two stacks, each with 2 Aruba 8360-12C in VSX (ISL 2x100GbE DAC), accommodating the uplink capacity requirements.
- * Access stacks with a total of 17 stacks of Aruba 6300F 48-port 1GbE Class 4 PoE with 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack), which exceeds the minimum requirement of 7 stacks and provides the necessary uplink bandwidth.

This configuration supports the 25GbE uplink speeds, satisfies the required number of switch stacks for the EMEA distribution center, and is compatible with the existing 25GbE-certified fiber infrastructure at HQ2 and EMEA-DISTR.

23. Frage

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1x neighborhood health centers and

1Z5 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital Is located In New York City

- Dila Health Center Is located in City A

- Mount Health Center is located In City B

- Rock Health Center is located in City C

- Branch clinics are located at different locations across the United States Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance reporting

- Seamless integration across wired, wireless. WAN, S0-8branch. IoT

* Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.

- All-access points must support the following features and specifications: 802.11ax (WI-FI 6E Certified)

- Security options Including WPA3. 802.1X with Radius secure authentication

- Identify and authenticate every wireless and wired device

- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital XYZ Regional Hospital is looking for an NAC solution to address its security challenges-Requirements:
- fully redundant NAC solution for management and authentication
- wireless and wired authentication for the main hospital will be handled locally The IT director of XYZ Regional Hospital is interested in a solution for nurse workstation tracking. What solution would meet the customer's requirements? (Select three.)

- **A. Map Subscription**
- B. Airwave
- C. Client insight
- D. Aruba Tags Configuration App
- **E. Aruba User Experience Insight**
- **F. Asset Tracking Subscription**

Antwort: A,E,F

Begründung:

For nurse workstation tracking, Aruba User Experience Insight can provide insights into how applications and network services are performing, which can help in understanding user experiences across the hospital network. The Asset Tracking Subscription is a crucial component for keeping track of physical assets such as nurse workstations. The Map Subscription would complement the asset tracking by providing detailed maps of the hospital's interior, enabling precise location tracking of the workstations. These solutions together would allow the hospital to effectively track and manage their resources, ensuring that nurses can find workstations quickly and efficiently, which is essential in a fast-paced medical environment.

24. Frage

The current IT staff is used to working with legacy Aruba OS-S (ProCurve) equipment. They are worried that they cannot handle Aruba OS-CX switches due to the different command syntax. What are two ways to make the transition easier for them? (Select two.)

- A. ASP
- B. Aruba CU Bank
- **C. create aliases**
- **D. CLI Reference Guide for Aruba OS-CX, Aruba OS-Switch, Comware and Cisco IOS**

Antwort: C,D

Begründung:

To ease the transition for IT staff accustomed to legacy Aruba OS-S (ProCurve) equipment when moving to Aruba OS-CX switches, two effective approaches are creating aliases (Option A) and using the CLI Reference Guide for Aruba OS-CX, Aruba OS-Switch, Comware, and Cisco IOS (Option B). Aliases allow the creation of custom command shortcuts or mappings in Aruba OS-CX, which can mimic or resemble the commands staff are familiar with from Aruba OS-S, making the command-line interface (CLI) more intuitive for them.

The CLI Reference Guide is an invaluable resource that provides a comparative view of commands across different operating systems, including Aruba OS-CX and Aruba OS-S, helping staff understand the equivalent commands and functionalities in the new OS-CX environment. Both these tools can significantly reduce the learning curve and help the IT staff become proficient with Aruba OS-CX switches more quickly.

25. Frage

You hired a junior engineer to assist you with a large-scale network infrastructure project. The engineer has never worked on such a complex project 'ants to better understand the role that each role that each stakeholder will play in the project. Match the stakeholder title to the responsibilities that would most likely apply to their role.

Antwort:

Begründung:

* CISO: responsible for establishing security policy and selecting security controls for the infrastructure.

* Network Design/Architecture: responsible for authoring the low-level design, and creating the configuration to meet the technical requirements.

* Network Operations: responsible for supporting, troubleshooting, and monitoring the wired/wireless infrastructure.

* Security Operations: responsible for investigating IDS/IPS incidents and managing firewalls.
