## Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q52-Q57):

### NEW QUESTION # 52

What needs to be done after cloning and saving the out-of-the-box checkout flow template before it can be used?

- A. Add a version letter
- B. Change the permissions on the existing checkout flow
- **C. Activate the flow**
- D. Rename the existing Checkout Flow in place

**Answer: C**

Explanation:

After cloning and saving the out-of-the-box checkout flow template, the next step that needs to be done before it can be used is A. Activate the flow. Activation makes the flow available for use, enabling it to be triggered as part of the checkout process in the B2B Commerce store.

### NEW QUESTION # 53

An Administrator has a customer that will go live without an external tax provider until some complex regional requirements are solidified. They will start using a flat tax on a per country and per region basis in the meantime.

The customer has provided the data in a CSV file with three columns: country, region, taxRate.

Which two actions should the Administrator take to use the tax data?

- A. Create a custom object.
- B. Have a developer modify the tax code used in the checkout flow.
- C. Use Data Loader to import the CSV file to the Cart Tax object.
- D. Use the Import feature in the Commerce App to load the tax data.

**Answer: C,D**

Explanation:

To utilize the tax data provided in a CSV file for flat tax rates per country and region, the Administrator should:

B) Use Data Loader to import the CSV file to the Cart Tax object: Data Loader is a client application for the bulk import or export of data. Using it to import the CSV file into the Cart Tax object allows for the application of the specified tax rates during checkout based on the country and region.

C) Use the Import feature in the Commerce App to load the tax data: The Commerce App's import feature can facilitate the bulk upload of tax rates directly into the system, ensuring that the correct tax rates are applied during transactions based on the specified criteria.

### NEW QUESTION # 54

Why is the System Context with Sharing-Enforces Record-Level Access important to B2B Commerce?

- A. It is required to view products in the storefront
- B. It is required to check out
- C. It is required to synchronize content
- D. It is required for guest browsing

**Answer: A**

Explanation:

The System Context with Sharing-Enforces Record-Level Access (D) is crucial to B2B Commerce because it ensures that users can only view products and related data that they are authorized to see, maintaining data security and privacy. This setting is particularly important for storefronts where products need to be displayed according to specific customer agreements, contracts, or profiles. It doesn't directly relate to checkout (A), content synchronization (B), or guest browsing (C), but rather to the fundamental aspect of product visibility and access control on the storefront.

### NEW QUESTION # 55

What happens if a language is deleted from Experience Builder?

- A. The content is no longer visible and it is deleted
- B. The content is no longer visible but is not deleted
- C. The content is deleted
- D. The content moves to the recycle bin

**Answer: B**

Explanation:

If a language is deleted from Experience Builder, C. The content is no longer visible but is not deleted. This means that while the content associated with that language will not be displayed in the Experience Builder or the storefront, it remains in the system. This allows for the possibility of re-adding the language at a later time and restoring the visibility of the content without having to recreate it.

### NEW QUESTION # 56

From within the Experience Site Administration Workspace, in which two ways can membership with an Experience Site be established?

- **A. Permission Set Groups**
- B. Profiles
- C. Buyer Groups
- **D. Permission Sets**

**Answer: A,D**

Explanation:

Within the Experience Site Administration Workspace, membership with an Experience Site can be established through B. Permission Set Groups and D. Permission Sets. These Salesforce features allow administrators to grant users access to Experience Sites by defining and assigning the appropriate permissions and access levels.
