Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q28-Q33):

NEW QUESTION # 28
Your employer, a media and entertainment company, wants to provision Google Workspace Enterprise accounts on your domain for several world-famous celebrities. Leadership is concerned with ensuring that these VIPs are afforded a high degree of privacy. Only a small group of senior employees must be able to look up contact information and initiate collaboration with the VIPs using Google Workspace services such as Docs, Chat, and Calendar.
You are responsible for configuring to meet these requirements. What should you do?

- A. Create separate Custom Directories for the VIPs and regular employees.
- B. In the Users list, find the VIPs and turn off the User setting "Directory Sharing."
- C. Create a Group for the VIPs and their handlers, and set the Group Access Level to Restricted.
- D. In Directory Settings, disable Contact Sharing.

Answer: A

Explanation:
* Access Admin Console:
* Sign in to the Google Admin console.
* Set Up Custom Directories:
* Navigate to "Directory" > "Directory settings."
* Click on "Custom directories."
* Create Custom Directory for VIPs:
* Create a new directory specifically for the VIPs.
* Add the VIPs to this directory.
* Set Up Access Controls:
* Configure who can view and access the VIP directory.
* Only allow senior employees or specific groups access to this directory.
* Configure Directory Visibility:
* Ensure that the VIPs' contact information is not visible in the main directory.
* Adjust settings to restrict visibility and access appropriately.
* Test Configuration:
* Verify the setup by checking directory visibility from both regular employees' and senior employees' accounts.
References:
* Manage Directory Visibility
* Set Up and Manage Custom Directories

NEW QUESTION # 29
Your organization is part of a highly regulated industry with a very high turnover. In order to recycle licenses for new employees and comply with data retention regulations, it has been determined that certain Google Workspace data should be stored in a separate backup environment.
How should you store data for this situation?

- A. Use a third-party tool to configure secure backup of Google Workspace data.
- B. Use routing rules to dual-deliver mail to an on-premises SMTP server and Google Workspace.

- C. Train users to use Google Takeout and store their archives locally.
- D. Write a script and use Google Workspace APIs to access and download user data.

Answer: A

Explanation:
Evaluate Third-Party Backup Solutions: Identify third-party tools that offer secure backup solutions for Google Workspace. Examples include Backupify, Spanning Backup, and Afi.ai.
Choose a Suitable Tool: Based on your organization's needs and compliance requirements, select a tool that offers robust data retention, secure storage, and easy recovery options.
Set Up the Backup Solution:
Create an Account: Sign up for the chosen third-party backup service.
Configure Backup Settings: Link your Google Workspace account and configure the backup settings to meet your data retention policies.
Schedule Backups: Set up regular backup schedules to ensure data is continuously backed up.
Test Backups and Recovery: Perform initial backups and test the recovery process to ensure data can be retrieved efficiently when needed.
Monitor and Maintain: Regularly monitor the backup status and maintain the system to comply with your organization's data retention regulations.

NEW QUESTION # 30
Your organization uses a third-party product to filter mail before it arrives at your Workspace Domain. How should you configure Gmail to ensure that inbound messages are not seen as a spam attack due to the volume of mail being received from this product?

- A. List the IP addresses of the product as an Inbound Gateway.
- B. Add the product's IP addresses as an approved sender.
- C. Allowlist the IP addresses of the third-party filtering product.
- D. Add the product's IP addresses to your organization's SPF record.

Answer: A

Explanation:
To ensure that inbound messages from the third-party filtering product are not seen as a spam attack, you should list the IP addresses of the product as an Inbound Gateway. This configuration tells Gmail that the emails coming from these IP addresses are trusted and should not be flagged as spam due to the volume of mail being received.

* Google Workspace Admin Help - Prevent email spoofing and spam using the Inbound Gateway setting

NEW QUESTION # 31
Your organization's users are reporting that a large volume of legitimate emails are being misidentified as spam in Gmail. You want to troubleshoot this problem while following Google-recommended practices. What should you do?

- A. Contact Google Workspace support and report a suspected system-wide spam filter malfunction.
- B. Adjust the organization's mail content compliance settings in the Admin console.
- C. Disable spam filtering for all users.
- D. Advise users to individually allowlist senders.

Answer: A

Explanation:
If legitimate emails are being misidentified as spam across the organization, it suggests that there may be a broader issue with the spam filtering system. Contacting Google Workspace support to investigate and resolve the problem is the recommended approach. Disabling spam filtering or adjusting individual settings may not resolve the root cause and could potentially lead to further issues.

NEW QUESTION # 32

You are in charge of automating and configuring Google Cloud Directory Sync for your organization. Within the config manager, how can you proactively prevent applying widespread deletions within your Workspace environment if your company's LDAP undergoes a substantial modification?

- A. Manually run Google Cloud Directory Sync only after performing a simulated sync.
- B. Configure the tool to delete users only when run from the config manager.
- C. Configure limits for the maximum number of deletions on each synchronization.
- D. Specify the minimum and maximum number of objects to synchronize in each configuration item.

Answer: C
