NEW QUESTION # 94
A project administrator is trying to assign a team member for a project but cannot find the person in the team member list on the Project Definition page. What is the reason for this problem? (Choose the best answer.)

- A. The employee is not assigned with a supervisor.
- B. The employee is not assigned to a department.
- C. Project roles are not assigned in the project.
- D. The employee is not assigned to the project-owning organization.

Answer: B

Ref:https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/project-foundation- configuration-define-project-resource-breakdown-structures.html#OAPFM180158_2 Why can't I find persons in the list of resources when I enter team members, planning resources, or person rate schedules?
You can't find persons in the list of resources when you enter team members, planning resources, or person rate schedules in the following situations:
* The administrator didn't assign adepartmentwhile creating users. Persons must have an active assignment andbe assigned to a departmentin Oracle Fusion Human Capital Management before they can be added as team members or entered as resources on the planning resource breakdown structure or person rate schedule.
* The resource isn't active in Oracle Fusion Human Capital Management because the current date is before the effective date of the resource. If you want to include persons who will start in the future, select the Include people with future-dated effective start dates option when you search for the person.
* Persons assigned as project managers aren't active as of the project start date.
* The assignment of the person is terminated, and an appropriate value isn't set for the number of days to display people with terminated assignments. You can set the profile value appropriately at the site profile level using the Specify Number of Days to Display People with Terminated Assignments task in the Setup and Maintenance work area.

NEW QUESTION # 95
Which three Cost Collection Flexfield core attributes can be derived during import if not explicitly entered in a transaction document? (Choose three.)

- A. Capitalizable Flag
- B. Expenditure Type
- C. Work Type
- D. Funding Source
- E. Billable Flag

Answer: A,B,E

Explanation:
The Cost Collection Flexfield is a descriptive flexfield that captures additional information about project costs. It has three core attributes that are required for every cost transaction:Billable Flag, Expenditure Type, and Capitalizable Flag. These attributes can be derived during import if not explicitly entered in a transaction document, based on various rules and sources such as expenditure type defaults, project type defaults, transaction source defaults, etc. Funding Source and Work Type are not core attributes of the Cost Collection Flexfield, but context-sensitive segments that can be optionally enabled for certain transaction sources or business units.

These segments capture additional information about how the costs are funded or what type of work is performed.

Project Labor Demand: How It's Calculated
Project executives want to track the labor demand in projects in their organization. The Project Hierarchy Viewer provides project
executives a hierarchical view of the enterprise project structure (EPS) along with the labor demand in terms of full-time equivalent
(FTE).
Settings That Affect Project Labor Demand
Project application administrators must do the following to set up how project labor demand is calculated:
* Organize projects into hierarchical groups on the Manage Enterprise Project Structure page.
* Change the quarterly FTE hours for the organization on the Define Project Management Implementation Options page, if different
from 520 hours.
Note:You can choose to view labor demand annually instead of quarterly. The Project Hierarchy Viewer uses the current date to
determine which year or quarter to display.
How Project Labor Demand Is Calculated
The Project Hierarchy Viewer calculates project labor demand in the following manner:
* Spreads the allocation hours from the Manage Project Resources page evenly over the days that the resources are allocated to the
project.
* Divides the quarterly project allocation hours by the quarterly FTE hours to get the labor demand.
* Rolls up the quarterly and annual labor demand up the hierarchy.
