MB-330問題サンプル & MB-330トレーニング費用

私たちMicrosoftは非常に人気があり、詳細で完璧なTech4Exam顧客サービスシステムを持っています。まず、MB-330の実際の試験の顧客によるオンライン支払いが成功してから5~10分後に、顧客サービスから電子メールを受信し、すぐにMicrosoft Dynamics 365 Supply Chain Management Functional Consultant学習を開始できます。また、MB-330試験問題を毎日確認および更新する専任スタッフがいるため、MB-330試験教材の最新情報を購入するたびに入手できます。第二に、24時間体制のサービスをお客様に提供します。MB-330学習教材に関する問題は、いつでもどこでも必要に応じて解決できます。

Microsoft MB-330（Microsoft Dynamics 365サプライチェーン管理機能コンサルタント）認定試験は、Microsoft Dynamics 365を使用したサプライチェーン管理に関連するソリューションの実装における候補者の能力を測定するために設計された評価です。この認定試験は、サプライチェーン管理の概念を深く理解し、ダイナミクス365の経験があります。MB-330認定試験は、サプライチェーンドメインの専門家の主要な業界認定の1つであり、この分野のスキルと専門知識を検証するのに役立ちます。

MB-330試験の対象となるには、候補者はMicrosoft Dynamics 365を基本的に理解し、サプライチェーン管理モジュールでの協力の経験が必要です。また、Power PlatformやAzure Servicesなどの関連技術の経験も必要です。候補者は、サプライチェーン管理に関与するビジネスプロセスに精通しており、モジュールの実装と構成の経験

が必要です。

Microsoft Dynamics 365 Supply Chain Management Functional Consultant 認定 MB-330 試験問題 (Q111-Q116):

質問 # 111

A company uses Dynamics 365 Supply Chain Management to manage procurement operations.

A purchasing clerk must process a purchasing request from an offshore vendor with the landed cost.

You need to explain the steps needed to perform this process

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions
Complete the journey leg by unloading and going through customs.
Post purchase order invoice with the default quantity for lines as the product receipt quantity.
Create a voyage.
Create a purchase order.
Post purchase order invoice with the default quantity for lines as the order quantity.
Create a shipping vendor's invoice to update the cost of goods.
Receive the goods at the destination warehouse.

Answer area

正解:

解説:

Actions
Complete the journey leg by unloading and going through customs.
Post purchase order invoice with the default quantity for lines as the product receipt quantity.
Create a voyage.
Create a purchase order.
Post purchase order invoice with the default quantity for lines as the order quantity.
Create a shipping vendor's invoice to update the cost of goods.
Receive the goods at the destination warehouse.

Answer area
Create a voyage.
Create a purchase order.
Post purchase order invoice with the default quantity for lines as the order quantity.
Create a shipping vendor's invoice to update the cost of goods.
Receive the goods at the destination warehouse.

Explanation:

Actions
Complete the journey leg by unloading and going through customs.
Post purchase order invoice with the default quantity for lines as the product receipt quantity.

Answer area

1	Create a voyage.
2	Create a purchase order.
3	Post purchase order invoice with the default quantity for lines as the order quantity.
4	Create a shipping vendor's invoice to update the cost of goods.
5	Receive the goods at the destination warehouse.

質問 # 112

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a functional consultant who is deploying Dynamics 365 for Finance and Operations.

The implementation must:

- * Use an iterative approach
- * Integrate with real-world data
- * Enforce standards and governance
- * Implement multiple rounds of feedback

You need to deploy and validate the implementation.

Solution: Use the XPPBP tool to export customizations and scenarios from a development sandbox. Make changes to the sandbox containing users. Deploy from the sandbox to the production environment.

Does the solution meet the goal?

- A. Yes
- B. No

正解: B

解説:

Section: Validate and support the solution

質問 # 113

You need to configure the limited-edition bicycle to meet the requirement for the official release date.

Where should you configure this?

- A. Product lifecycle state
- **B. Released product**
- C. Default order settings
- D. Sales price trade agreement

正解: B

解説:

Topic 5, Trey Research

Current environment

Current environment. Technology

Trey Research is migrating from an outdated, on-premises version of Dynamics AX to Dynamics 365 Supply Chain Management.

The company wants to retain a lot of its current data structures and processes but adopt new efficiencies when the benefit is obvious.

The company uses a third-party e-commerce site that is custom developed by an internal developer.

Current environment. Items

Product numbering

All items are numbered by using a smart numbering format: [Product SKU+Size+Color+Style]. For reporting, items are queried for sales and inventory reports by using the first six digits of the item number or until the first dash is encountered.

* A t-shirt could be 01001-S-Red for item 1001 in a size small with the color red.

* A single energy drink could be 02001-12oz or 02001-20oz for the different sizes that product 02001 is sold in.

Product attributes

* All clothing shares the same set of product attributes.

* Supplements may share the same Product SKU but can have different attributes for the different size, color, or style variations of the product.

* Product attributes that are unnecessary for an item should be excluded from the item.

Pricing

* All items always have a default price. This price will not expire.

* An item will have four different prices created for it every month, one for each customer tier, as detailed later in this section. The pricing expires at the end of the month. If no special pricing is created, the default item price will be used.

* The monthly sales price in which the additional price breaks are determined is based on the estimated cost of the manufactured items.

* Customers are categorized into four pricing tiers (A, B, C, and D) based on sales volume over the past 12 months.

* Customers can negotiate special pricing for items in 30-day, 60-day, and 90-day increments. Quantity restrictions may be placed, depending on the item discount and promotion.

* Promotional pricing is not used today. Pricing is restricted to monthly prices and customer-specific contract pricing.

Cost

Items use a FIFO costing model today in their current Dynamics AX 2009 environment; however, using the FIFO costing method has created problems.

Current environment. Warehouse and inventory

* Warehouse requirements are simplistic. There is only one site. The site has two warehouses.

* Trey Research needs to make sure that any energy drinks and nutritional supplements are manufactured and packaged with the highest standards. Trey Research automatically inspects products when all products are reported as finished. All products are inspected again when the items are picked.

* Energy drinks require independent tests to check for dents in packaging, carbonation levels, and fill level.

* Nutritional supplements require separate tests for packaging, expiration date, product seal, and product labeling.

* Government compliancy and consistency testing are handled outside of the Enterprise Resource Planning (ERP) system.

* Resalable products are placed on one of two racks in the warehouse.

Requirements

Requirements. Technology

* Trey Research will integrate all pricing and discount capabilities to its e-commerce website.

Requirements. Items

* Reporting on products should be streamlined as much as possible.

* The item numbering does not have to equate to the actual item number.

* The future costing methods adopted must be commonly accepted for manufacturers.

* Inventory costing should be done after a full inventory valuation is complete. It should take into consideration the direct materials, direct labor, and overhead that goes into an item.

* Any costing method used needs the ability to track cost records about an item, cost categories, and calculation formulas for indirect costs.

* The profitability for nutritional supplements manufacturing processes needs to be expressed in terms of the cost categories for routing operations and the calculation formulas for manufacturing overheads.

* If a vendor can no longer deliver the raw materials for the energy drinks due to supply chain issues, the costs for using an alternative vendor to source the raw materials should be used to determine the impact on profits.

* Apparel items will not be upgraded to the new costing method until after the go-live date due to resourcing and implementation limitations from the apparel team.

Requirements. Pricing

* Trey Research plans to do promotional pricing. Certain products will receive special pricing during the hours of extreme sporting events that Trey Research sponsors. Before or after the event, normal pricing will resume.

Requirements. White labeling

* Trey Research wants to start white labeling its products under the brands of major nutritional retail store brands. These products would only be sold to specific customers.

* Trey Research will provide and maintain a 'Compare to' price for customers to use to compare the white-labeled products. This Compare to price will also be the default item price for the customer if the customer accidentally lets a contract price expire.

* The configuration of these restrictions must be applied automatically when creating new products for those customers.

Requirements. Warehouse and inventory

* If products in the warehouse must be blocked from transactions for a specific reason, such as a health and safety review, warehouse users should be able to block the products quickly from the ERP system.

* All product quality tests should be processed in a uniform and consistent manner.

* Creation of any quality processes for products inbound to the warehouse, from the production line, or outbound from the warehouse to consumers should be automatically created to facilitate execution.

* Testing requirements:

* Requirement 1: 100 percent of all nutritional supplements and 50 percent of all energy drinks must be tested when production orders are completed. After a product is in testing, 100 percent of all tests must be completed.

* Requirement 2: 75 percent of all nutritional supplements and energy drinks should be tested against their required tests during an outbound process.

* Damaged products must be placed in one of four bins (based on product type) during the inspection process.

* You must define quarantine zones to optimize product visibility throughout the testing process.

質問 # 114

You need to configure automated testing for the following tasks:

* inbound processes from manufacturing

* outbound processed from the warehouse picking process

How many processes should you configure?

- A. 0
- **B. 1**
- C. 2
- D. 3

正解: B

解説:

One process the inbound processes from manufacturing.

Two outbound processed, one for nutritional supplements and one energy drinks.

Note: Creation of any quality processes for products inbound to the warehouse, from the production line, or outbound from the warehouse to consumers should be automatically created to facilitate execution.

* Testing requirements:

Requirement 1: 100 percent of all nutritional supplements and 50 percent of all energy drinks must be tested when production orders are completed. After a product is in testing, 100 percent of all tests must be completed.

Requirement 2: 75 percent of all nutritional supplements and energy drinks should be tested against their required tests during an

outbound process.

質問 # 115

You are implementing containerization functionality.

You must automate containerization so that containers and picking work for shipments are created when a wave is processed. The work lines will be split into quantities to fit required containers by size.

You need to set up a container build template that defines the containerization process.

Which three items should you set up before you create the container build template? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a wave template that includes the containerize method
- B. container packing strategies
- C. container packing policies
- D. a container group
- E. container types

正解： A、D、E

解説:

Section: Implement Warehouse management and Transportation management and perform business processes
