

Free PDF Quiz 2026 High-quality Palo Alto Networks CloudSec-Pro: Palo Alto Networks Cloud Security Professional Exam Details

A lot of people are dreaming to pass the CloudSec-Pro exam. Also, you can start your own business after you totally master the skills of the CloudSec-Pro preparation exam expertly. Quickly, you will become the millionaire. Then it is time for others to envy your luxury life. All in all, our CloudSec-Pro Exam Prep is worth for investing. After all, you are the main beneficiary. Please follow your hearts and begin your new challenges bravely.

Learning our CloudSec-Pro study materials will fulfill your dreams. Nothing will stop you as long as you are rich. Also, respect and power is gained through knowledge and skills. If you want to get a higher position in the company, you must have the ability to defeat other excellent colleagues. Just come to our website and pick the CloudSec-Pro training engine. And you will become the best with our CloudSec-Pro learning questions.

Online CloudSec-Pro Tests | CloudSec-Pro Free Practice

One of the most significant parts of your Palo Alto Networks CloudSec-Pro certification exam preparation is consistent practice. Dumpkiller has make sure that you get sufficient CloudSec-Pro exam practice by adding Palo Alto Networks CloudSec-Pro desktop practice exam software to your study course. This Palo Alto Networks CloudSec-Pro desktop-based practice exam software is compatible with all windows-based devices.

Palo Alto Networks Cloud Security Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which action would be applicable after enabling anomalous compute provisioning?

- A. It detects potential creation of an unauthorized network of compute instances either accidentally or for cryptojacking.
- B. It detects potential creation of an unauthorized network of compute instances with AutoFocus.
- C. It detects the activity caused by the spambot.
- D. It detects unusual server port activity or unusual protocol activity from a client within or outside the cloud environment.

Answer: A

Explanation:

Enabling anomalous compute provisioning in Prisma Cloud allows for the detection of unusual and potentially unauthorized activities related to the creation of compute instances. This feature is particularly useful for identifying scenarios where an unauthorized network of compute instances might be established, either accidentally due to misconfigurations or maliciously for purposes such as cryptojacking. Cryptojacking involves the unauthorized use of someone else's compute resources to mine cryptocurrency, and anomalous compute provisioning can help in identifying such activities by highlighting unusual patterns in the provisioning of compute

resources.

NEW QUESTION # 32

Which method should be used to authenticate to Prisma Cloud Enterprise programmatically?

- A. single sign-on
- B. SAML
- C. basic authentication
- **D. access key**

Answer: D

Explanation:

To authenticate to Prisma Cloud Enterprise programmatically, the use of an access key is the most suitable method among the given options. Access keys, typically consisting of an Access Key ID and Secret Access Key, are used for programmatic calls to the Prisma Cloud API. This method enables secure, authenticated API requests to Prisma Cloud services without requiring manual user intervention, which is essential for automation and integration with CI/CD pipelines.

Reference to the use of access keys for programmatic access can often be found in the API documentation of cloud security platforms like Prisma Cloud. While specific documentation from Prisma Cloud is not directly quoted here, the general practice across cloud services (AWS, Azure, GCP) supports the use of access keys for API authentication, making it a verified approach for Prisma Cloud as well.

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/get-started-with-prisma-cloud/access-the-prisma-cloud-api.html>

NEW QUESTION # 33

What is the maximum number of access keys a user can generate in Prisma Cloud with a System Admin role?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/manage-prisma-cloud-administrators/create-access-keys.html#:~:text=You%20can%20enable%20API%20access,generate%20one%20access%20key%20only>

In Prisma Cloud, a user with a System Admin role can generate a maximum of 2 access keys. These keys are used for API access and automation, enabling secure and controlled interactions with Prisma Cloud's capabilities.

NEW QUESTION # 34

A security team has been asked to create a custom policy.

Which two methods can the team use to accomplish this goal? (Choose two.)

- A. edit the query in the out-of-the-box policy
- B. disable an out-of-the-box policy
- **C. add a new policy**
- **D. clone an existing policy**

Answer: C,D

Explanation:

To create a custom policy within a cloud security platform like Prisma Cloud, security teams have the flexibility to either add a new policy from scratch or clone an existing one to serve as a foundation for customization. Adding a new policy allows for the creation of a completely tailored rule set based on specific security requirements. Cloning an existing policy, on the other hand, provides a quick start by using the structure of an already established policy, which can then be modified to fit particular needs. This approach is beneficial for maintaining consistency with existing policies while addressing unique security scenarios.

Disabling an out-of-the-box policy (option C) or editing the query in an out-of-the-box policy (option D) are actions that might be taken to customize policy enforcement but do not equate to the creation of a new custom policy.

NEW QUESTION # 35

Which RQL query type is invalid?

- A. Event
- B. IAM
- C. Incident
- D. Config

Answer: C

Explanation:

Within Prisma Cloud's Resource Query Language (RQL), the "Incident" query type is invalid because RQL is designed to query configuration and posture information of cloud resources, not incident data. The valid RQL query types include "Config" for querying resource configurations, "Network" for querying network-related information, "IAM" for querying identity and access management configurations, and "Event" for querying audit events. The focus on resource configurations and audit events aligns with Prisma Cloud's capabilities in cloud security posture management (CSPM) and cloud workload protection platform (CWPP), providing insights into resource configurations, compliance, and network traffic.

NEW QUESTION # 36

.....

Our study material is a high-quality product launched by the Dumpkiller platform. And the purpose of our study material is to allow students to pass the professional qualification exams that they hope to see with the least amount of time and effort. If you are a child's mother, with CloudSec-Pro Test Answers, you will have more time to stay with your child; if you are a student, with CloudSec-Pro exam torrent, you will have more time to travel to comprehend the wonders of the world.

Online CloudSec-Pro Tests: https://www.dumpkiller.com/CloudSec-Pro_braindumps.html

So, our CloudSec-Pro actual exam is reliably rewarding with high utility value, Download the Dumpkiller Online CloudSec-Pro Tests exam questions after paying affordable price and start preparation without wasting further time, Palo Alto Networks CloudSec-Pro Exam Details If there is an update on dumps, our service will inform you by email and the server also will warn you when you practice dump, The Dumpkiller is one of the leading brands that have been helping Palo Alto Networks CloudSec-Pro certification aspirants for many years.

When you turn your computer on, electricity flows from the power CloudSec-Pro Free Practice supply to the motherboard, Whether you use a mouse, touchpad, or touch screen, Start screen makes work and play easier.

So, our CloudSec-Pro Actual Exam is reliably rewarding with high utility value, Download the Dumpkiller exam questions after paying affordable price and start preparation without wasting further time.

Palo Alto Networks's CloudSec-Pro Exam Questions Come with Realistic Practice and Accurate Answers

If there is an update on dumps, our service CloudSec-Pro will inform you by email and the server also will warn you when you practice dump, The Dumpkiller is one of the leading brands that have been helping Palo Alto Networks CloudSec-Pro certification aspirants for many years.

It seems that we have been in a state of study and examination CloudSec-Pro Free Practice since we can remember, and we have experienced countless tests, including the qualification examinations we now face.
