Most HPE7-A08 Reliable Questions | Amazing Pass Rate For HP HPE7-A08 | HPE7-A08: HPE Aruba Networking Switching Professional Exam

The system of HPE7-A08 study materials is very smooth and you don't need to spend a lot of time installing it. We take into account all aspects on the HPE7-A08 exam braindumps and save you as much time as possible. After the installation is complete, you can devote all of your time to studying HPE7-A08 Exam Questions. And a lot of our worthy customers always praise the high-efficiency of our HPE7-A08 learning guide. If you buy it, i guess you will love it as well.

HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.
Topic 2	<ul style="list-style-type: none">Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.
Topic 3	<ul style="list-style-type: none">Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.
Topic 4	<ul style="list-style-type: none">Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q227-Q232):

NEW QUESTION # 227

What should you configure for an interface connected to a device you cannot trust to assign DSCP markings?
(Select two.)

- A. Apply a classifier-based policy to the interface to assign a Local Priority value
- B. Configure "qos trust none"
- C. Apply a dscp-map to the interface to assign a Local Priority value
- D. Configure Weighted Fair Queuing
- E. Configure "qos trust cos"

Answer: A,B

Explanation:

For an interface connected to an untrusted device regarding DSCP markings, the recommended configurations are:

Apply a classifier-based policy to assign a Local Priority value (Option B). This overrides or marks traffic based on predefined criteria.

Configure qos trust none (Option E) to disable trusting DSCP or CoS markings from the device, preventing manipulation of QoS. Trusting CoS (Option A) is incorrect because the device is untrusted.

DSCP maps and Weighted Fair Queuing (Options C and D) are additional QoS features but do not specifically address untrusted markings.

NEW QUESTION # 228

Which CLI command removes an incorrect OSPF area configuration on an Aruba CX switch?

- A. delete ospf process
- B. clear ospf route
- C. **no router ospf area**
- D. unset ospf area

Answer: C

Explanation:

The no router ospf area command removes an incorrectly assigned OSPF area, ensuring OSPF neighbors form correctly within the correct routing domain.

NEW QUESTION # 229

Which CLI command displays the IGMP querier status on an Aruba CX switch?

- A. show multicast querier
- B. display igmp querier
- C. **show ip igmp querier**
- D. show igmp query

Answer: C

Explanation:

The show ip igmp querier command shows the querier's IP address and operational status, verifying multicast traffic control within the network.

NEW QUESTION # 230

Which CLI command removes a static neighbor entry in an Aruba CX switch?

- A. delete static neighbor
- B. clear neighbor entry
- C. unset neighbor config
- D. **no ip neighbor**

Answer: D

Explanation:

The no ip neighbor command removes a manually configured static ARP entry, ensuring the switch can dynamically learn new neighbor MAC addresses.

NEW QUESTION # 231

An administrator will be deploying NetEdit to manage an Aruba solution. What does NetEdit support?

- A. Tracks configuration and hardware information
- B. Can be purchased as a VM and/or hardware appliance
- C. Support for Aruba-supplied security updates
- D. **Manages AOS-CX switches and Aruba gateways**

Answer: D

NEW QUESTION # 232

.....

Having a HP HPE7-A08 certification can enhance your employment prospects, and then you can have a lot of good jobs. TrainingDump is a website very suitable to candidates who participate in the HP certification HPE7-A08 exam. TrainingDump can not only provide all the information related to the HP Certification HPE7-A08 Exam for the candidates, but also provide a good

learning opportunity for them. TrainingDump be able to help you pass HP certification HPE7-A08 exam successfully.
