# Plat-Admn-202認證題庫，Plat-Admn-202信息資訊

你可以現在就獲得Salesforce的Plat-Admn-202考試認證，我們Testpdf有關於Salesforce的Plat-Admn-202考試的完整版本，你不需要到處尋找最新的Salesforce的Plat-Admn-202培訓材料，因為你已經找到了最好的Salesforce的Plat-Admn-202培訓材料，放心使用我們的試題及答案，你會完全準備通過Salesforce的Plat-Admn-202考試認證。

## Salesforce Plat-Admn-202 考試大綱：

| 主題 | 簡介 |
|---|---|
| 主題 1 | • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources. |
| 主題 2 | • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios. |
| 主題 3 | • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration. |

| 主題 4 | • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs. |
|---|---|
| 主題 5 | • Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy. |

# Plat-Admn-202信息資訊，Plat-Admn-202考題寶典

Plat-Admn-202 考試是一個Salesforce 的認證考試，通過了一些Salesforce認證考試的IT人士是受很多IT行業歡迎的。所以越來越多的人參加Plat-Admn-202認證考試，但是通過Plat-Admn-202認證考試並不是很簡單的。如果你沒有參加一些專門的相關培訓是需要花很多時間和精力來為考試做準備的。現在Testpdf可以幫你節約省很多寶貴的時間和精力。

# 最新的 Salesforce Developer Plat-Admn-202 免費考試真題 (Q271-Q276):

**問題 #271**
DreamHouse Realty wants to import its property records from an external system into Salesforce. The app builder will use an external ID field to house the property ID from the external system.
Which two field types are allowed as an external ID?

- A. Phone field
- B. URL field
- C. Test field
- D. Number field

**答案：C,D**

解題說明：
Reference:
Salesforce Help - External ID Fields

**問題 #272**
Universal Containers would like to collaborate with its customers within Salesforce, and has decided to enable the "Allow Customer Invitations" Chatter setting. What permission is granted to Customers when invited to ChatterGroup?

- A. The ability to invite members to groups of which they are a member
- B. The ability to @mention accounts of which they are a contact.
- C. The ability to interact with members of their groups
- D. The ability to request access to public groups

**答案：C**

解題說明：
Customers who are invited to Chatter groups can only interact with members of their groups. They cannot invite other members, @mention accounts, or request access to public groups

## 問題 #273

Universal Containers asked the app builder to ensure when an account type changes to 'Past-Customer' the contacts directly related to that account get an updated status of 'Re-Market'.

Which automation should the app builder use to accomplish this task?

- A. Validation rule
- B. Screen flow
- C. Record triggered flow
- D. Lightning component

**答案：C**

解題說明：

For automatically updating contact statuses when an account type changes:

D . Record triggered flow. This type of automation can monitor changes in account types and accordingly update related records, such as contacts.

Steps to implement:

Navigate to Setup → Flows.

Create a new Flow and choose the record-triggered flow type.

Configure the flow to trigger when the Account record is updated to 'Past-Customer'.

Add an Update Records element to modify all related contacts, setting their status to 'Re-Market'.

Activate the flow.

This automation ensures that contact statuses are updated in real-time when their related account's type changes, maintaining data consistency and relevancy.

For more on record-triggered flows, check out Salesforce's Record-Triggered Flows documentation.

## 問題 #274

Universal Containers has a Lightning record page that supports both the mobile app and desktop. An app builder has downloaded a custom Lightning component from AppExchange, but users are unable to view the component on mobile devices.

What can be the issue?

- A. The record page template is unable to support mobile devices.
- B. The record page needs to be activated.
- C. The component has been developed for Desktop Pages.
- D. The component needs to be activated.

**答案：C**

解題說明：

The most likely reason why users are unable to view the custom Lightning component on mobile devices is that the component has been developed for Desktop Pages only. Some components are not supported on mobile devices or have different behavior on mobile devices. An app builder should check the component documentation or metadata to see if it is compatible with mobile devices.

## 問題 #275

Sales reps at Cloud Kicks (CK) forget to submit for approval when CK needs orders reviewed before close won. CK wants to automatically submit opportunities into the Secure Commitment Stage to eliminate manual submission.

Which three features would meet the business requirements?

Choose 3 answers

- A. Chatter action
- B. Workflow
- C. Flow
- D. Process Builder
- E. Apex

**答案：C,D,E**

解題說明：

The app builder should use three features to meet the business requirements:

Process Builder: This is a type of automation tool that can execute actions based on certain criteria. In this case, the process builder can have a criteria that evaluates if an opportunity is in the Secure Commitment Stage, and then execute an action that submits it for approval.

Apex: This is a programming language that allows developers to execute complex logic on the Salesforce platform. Apex can be used to create triggers that run before or after certain events, such as insert, update, delete, or undelete of records. In this case, Apex can be used to create a trigger that runs before an opportunity is updated and submits it for approval if it is in the Secure Commitment Stage.

Flow: This is another type of automation tool that can guide users through a series of screens and perform actions based on user input. Flow can also be triggered by certain events, such as when a record is created or updated. In this case, Flow can be used to create a record-triggered flow that runs after an opportunity is updated and submits it for approval if it is in the Secure Commitment Stage. Option A and D are not features that can meet the business requirements.

問題 #276
