Trend Micro Certified Professional for Deep Security Sample Questions (Q36-Q41):

NEW QUESTION # 36

What is the default priority assigned to Firewall rules using the Allow action?

- A. Firewall rules using the Allow action always have a priority of 4.
- B. Firewall rules using the Allow action can be assigned a priority between 1 and 3.
- C. Firewall rules using the Allow action can be assigned a priority between 0 and 4.
- D. Firewall rules using the Allow action always have a priority of 0.

Answer: D

Explanation:
Firewall_rule_priorities
Explication: Study Guide - page (241)

NEW QUESTION # 37

The maximum disk space limit for the Identified Files folder is reached. What is the expected Deep Security Agent behavior in this scenario?

- A. Files will no longer be able to be quarantined. Any new files due to be quarantined will be deleted instead.
- B. Deep Security Agents will delete any files that have been in the folder for more than 60 days.
- C. Any existing files are in the folder are compressed and forwarded to Deep Security Manager to free up disk space.
- D. Deep Security Agents will delete the oldest files in this folder until 20% of the allocated space is available.

Answer: D

Explanation:
If the limit is reached, the oldest files will be deleted first until 20% of allocated space is freed up.
Explication: Study Guide - page (203)

NEW QUESTION # 38

As the administrator in a multi-tenant environment, you would like to monitor the usage of security services by tenants? Which of the following are valid methods for monitoring the usage of the system by the tenants?

- A. Generate a Chargeback report in Deep Security manager Web console.
- B. All the choices listed here are valid.
- C. Monitor usage by the tenants from the Statistics tab in the tenant Properties window.
- D. Use the Representational State Transfer (REST) API to collect usage data from the tenants.

Answer: B

Explanation:
Deep Security offers several ways to monitor tenant usage in a multi-tenant environment:
Chargeback reports in the Manager Web console provide detailed usage breakdowns per tenant.
The REST API enables automated, programmatic collection of usage data.
The Statistics tab within tenant properties displays real-time and historical usage information.
From the official documentation:
"Administrators can monitor usage with built-in Chargeback reports, by querying the Statistics tab in tenant properties, or by using the REST API for automated data collection and reporting." References:
Trend Micro Deep Security Administrator's Guide: Multi-Tenancy Reporting Deep Security REST API Reference: Usage and Reporting

NEW QUESTION # 39

Based on the policy configuration displayed in the exhibit, which of the following statements is true?

- A. Administrators with access to the protected Server will be able to uninstall the Deep Security Agent through Windows Control Panel.
- B. Changes to any of the Deep Security policies will be send to the Deep Security Agents as soon as the changes are saved.
- C. If the Deep Security Manager does not receive a message from the Deep Security agent every 20 minutes, an alert will be raised.
- D. Deep Security Agents will send event information to Deep Security Manager every 10 minutes.

Answer: A

NEW QUESTION # 40

As the administrator in a multi-tenant environment, you would like to monitor the usage of security services by tenants? Which of the following are valid methods for monitoring the usage of the system by the tenants?

- A. Generate a Chargeback report in Deep Security manager Web console.
- B. All the choices listed here are valid.
- C. Monitor usage by the tenants from the Statistics tab in the tenant Properties window.
- D. Use the Representational State Transfer (REST) API to collect usage data from the tenants.

Answer: B

Explanation:
Deep Security Manager records data about tenant usage. This information is displayed in the Ten-ant Protection Activity widget on the Dashboard, the Statistics tab in tenant Properties, and the Chargeback report.
This information can also be accessed through the Status Monitoring REST API which can be enabled or disabled from the Administration > Advanced > System Settings > Advanced > Status Monitoring API.
multi-tenancy
Explication: Study Guide - page (422)

NEW QUESTION # 41

......
