Salesforce Accredited B2B Commerce Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

What is the fastest way to deploy and activate a sample B2B storefront?

- A. Deploy with sample data right after store creation
- B. Complete product import, configure relationships
- C. Deploy with a fresh dev org and import data
- D. Publish and Activate Site and Skip Search

Answer: A

Explanation:

Explanation

The fastest way to deploy and activate a sample B2B storefront is to deploy with sample data right after store creation. This option allows an administrator to create a store with preloaded sample data such as products, categories, price books, promotions, etc., without having to import data manually or configure relationships between entities. NEW QUESTION # 42

What are two options for Price List selection method on a CC Account Group?

Choose 2 answers

- A. Sequence
- B. List Price
- C. Reverse Sequence
- D. Best Price

Answer: A,D

Explanation:

Explanation

According to the Price List Selection Methods page, price list selection methods are ways of determining which price list to use for a given account or account group. There are two options for price list selection method on a CC Account Group: Sequence and Best Price. Sequence option allows you to assign multiple price lists to an account group and rank them by priority. The first price list that contains the product will be used. Best Price option allows you to assign multiple price lists to an account group and compare them by price. The lowest price for the product will be used. Therefore, options B and C are correct. Option A is false because Reverse Sequence is not a valid option for price list selection method on a CC Account Group, it is only available for CC Account. Option D is false because List Price is not a valid option for price list selection method on a CC Account Group, it is only available for CC Product. NEW QUESTION # 43

What step is required before the administrator can see orders?

- A. Give Read-Only Field-Level Security on the Sales Store field for Orders
- B. Give visible Field-Level Security on the Store Sales field for Orders
- C. Give read-only Field Level Security on the Sales Store field for Orders
- **D. Give Visible Field-Level Security on the Sales Store Field for Orders**

Answer: D

NEW QUESTION # 44

Which two methods can Product Specs be used as a filter type?

Choose 2 an answers

- **A. Checkbox**
- **B. Slider**
- C. Radio Button
- D. Dynamic Range

Answer: A,B

Explanation:

There are two methods in which Product Specs can be used as a filter type:

Checkbox: This filter type allows buyers to select one or more spec values to filter the product list. For example, a buyer could select the "Color" spec and select the values "Red" and "Blue" to filter the product list to only show products that are red or blue.

Slider: This filter type allows buyers to select a range of spec values to filter the product list. For example, a buyer could select the "Price" spec and use the slider to select products that are priced between \$100 and \$200.

Dynamic Range and Radio Button are not filter types for Product Specs.

NEW QUESTION # 45

Northern Trail Outfitters (NTO) is ready to move their store from Sandbox to Production. Which three components does an admin need to consider as part of the Change Sets?

- A. Platform Events
- **B. Store Configuration Component**
- **C. Site.com (from Experience Builder)**
- D. Process Builder Flows
- **E. Custom Objects and Fields**

Answer: B,C,E

Explanation:

Explanation

To move a store from Sandbox to Production, an admin needs to consider the following components as part of the change sets:

custom objects and fields, Site.com (from Experience Builder), and store configuration component. Custom objects and fields are used to store and manage data for the store, such as products, categories, price books, etc. Site.com is used to create and edit the store pages, layouts, and components. Store configuration component is used to configure the store settings, such as name, URL, catalog, price book, etc. References: Deploy a Store from Sandbox to Production
