Maybe you are unfamiliar with our CTFL-AcT latest material, but our CTFL-AcT real questions are applicable to this exam with high passing rate up to 98 percent and over. Choosing from a wide assortment of practice materials, rather than aiming solely to make a profit from our CTFL-AcT latest material, we are determined to offer help. Quick purchase process, free demos and various versions and high quality CTFL-AcT Real Questions are all features of our advantageous practice materials. With passing rate up to 98 to 100 percent, you will get through the CTFL-AcT practice exam with ease. So they can help you save time and cut down additional time to focus on the CTFL-AcT practice exam review only.

Life is beset with all different obstacles that are not easily overcome. For instance, CTFL-AcT exams may be insurmountable barriers for the majority of population. However, with the help of our CTFL-AcT exam questions, exams are no longer problems for you. The reason why our CTFL-AcT Training Materials outweigh other CTFL-AcT study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

**Get instant Success With ISQI CTFL-AcT Exam Questions [2026]**

If you are curious or doubtful about the proficiency of our CTFL-AcT preparation quiz, we can explain the painstakingly word we did behind the light. By abstracting most useful content into the CTFL-AcT exam materials, they have helped former customers gain success easily and smoothly. The most important part is that all contents were being sifted with diligent attention. No errors or mistakes will be found within our CTFL-AcT Study Guide.

## ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q53-Q58):

### NEW QUESTION # 53

Which one of the following statements regarding the quality of requirements is MOST correct?

- A. Testers may complete unclear requirements by assumptions, as long as they discuss those assumptions with at least one stakeholder.
- **B. Vague or ambiguous requirements may lead to misunderstandings both during implementation and testing.**
- C. INVEST is a technique that ensure the quality of user stories or requirements, thus replacing regular reviews.
- D. In Agile development lifecycle models, requirement engineering becomes less important due to the product owner role.

**Answer: B**

Explanation:

Poorly defined requirements are a leading cause of defects and project failure. According to the ISTQB CTFL Acceptance Testing Syllabus and IQBBA FL Syllabus, the quality of requirements plays a critical role in successful solution development and acceptance testing. Requirements must be clear, unambiguous, complete, and testable. When they are vague or ambiguous, stakeholders may interpret them differently, which can lead to incorrect implementations, inadequate testing, and ultimately rework or rejection during acceptance.

Option A is explicitly supported by the ISTQB Foundation Syllabus and IQBBA principles. In contrast:

Option B is incorrect because Agile lifecycles still place great emphasis on requirement engineering, even though requirements evolve iteratively.

Option C misrepresents INVEST: it is a guideline for writing good user stories but does not replace reviews or validation techniques.

Option D is risky and not endorsed by ISTQB. While testers may identify ambiguities, the correct approach is to clarify them with all relevant stakeholders, not make assumptions.

Exact Reference - ISTQB CTFL Acceptance Testing Syllabus (Section 1.3.1):

"Ambiguous, incomplete, or inconsistent requirements increase the risk of misunderstanding between stakeholders, leading to incorrect implementation and ineffective tests."

### NEW QUESTION # 54

Assume you are testing functionality of the interface of an elevator. One of the requirements is that the elevator can work only if the total weight of the passengers does not exceed 200 kg. The elevator can reach the following floors: Ground Floor, 1st floor and 2nd floor. You want to create an acceptance test using the Gherkin language. You can use the following phrases for this purpose:

- i. the total weight of passengers is greater than 200 kg
- ii. the elevator is on the Ground Floor
- iii. a button '1st floor' was pressed
- iv. the elevator goes to the 1st floor
- v. a passenger standing at the 2nd floor calls the elevator
- vi. a message 'too many passengers' is displayed on the screen

Which of the following statements correctly matches constructs of Given/When/Then with a relevant phrase in order to create a correct test case for the given requirement?

- A. GIVEN ii)  
WHEN iv)  
THEN v)
- B. GIVEN ii)  
WHEN v) AND vi) THEN i)
- C. GIVEN iii)  
WHEN ii)  
THEN iv)
- **D. GIVEN ii)  
WHEN i)  
THEN vi)**

**Answer: D**

#### NEW QUESTION # 55

Which of the following is the BEST example of a Gherkin-style test for a web-based banking application?

- A. GIVEN I have \$5000 on my personal account X AND I have \$200 on my personal account Y WHEN I transfer \$1000 from X to Y THEN I should have balance \$4000 on my personal account X AND I should have balance \$1200 on my personal account Y
- B. GIVEN I have \$5000 on my personal account X WHEN I have \$600 on my personal account Y THEN I have \$5600 in total on my personal accounts X and Y
- C. GIVEN I have \$5000 on my personal account X and \$600 on my personal account Y WHEN I transfer \$500 from Y to X THEN I should have balance \$4500 on X and balance \$1100 on Y
- D. GIVEN I have \$5000 on my personal account X AND I have \$200 on my personal account Y WHEN I click 'Make transfer' button AND I enter '3000' into 'Amount' field AND I enter 'X' into 'From which account' field AND I enter 'Y' into 'To which account' field AND I click 'Confirm transaction' button THEN I should have balance \$2000 on my personal account X AND I should have balance \$3200 on my personal account Y

**Answer: A**

Explanation:

The best Gherkin-style acceptance tests are business-oriented, behavior-driven, and avoid unnecessary technical or UI details. They describe actions in a way stakeholders can understand, focusing on system behavior rather than implementation mechanics.

Option A follows Gherkin conventions:

GIVEN clearly describes the system state (account balances).

WHEN describes a user action (transferring funds).

THEN describes a verifiable outcome (account balances updated correctly).

Option B includes unnecessary UI actions like clicking buttons or field names, which are implementation-specific and violate the abstraction level expected of acceptance tests.

Option C uses appropriate structure but introduces incorrect balances in the THEN step (possibly a typo; \$4500 on X is wrong if funds were transferred from Y to X).

Option D uses improper syntax - WHEN is misused as another GIVEN, and THEN describes a computation rather than a system behavior.

Exact Reference - ISTQB CTFL Acceptance Testing Syllabus (Section 2.2.2):

"Acceptance criteria in BDD are best captured through Gherkin scenarios that are understandable by business stakeholders and focus on expected outcomes, not implementation details."

#### NEW QUESTION # 56

Which one of the following statements regarding the graphical representation of business processes is true?

- A. Using decision tables in BPMN allows defining test conditions corresponding to the business rules under test.
- B. Graphical representations of business processes must describe the complete workflow in detail, including alternative and error scenarios.
- C. For acceptance testing, graphical business process models should focus on the user workflows to be tested.
- D. Business processes should be described graphically using the DMN standard and completed with decision tables.

**Answer: C**

Explanation:

Graphical representations of business processes, particularly using BPMN (Business Process Model and Notation), serve as a bridge between business stakeholders and testers. These models help visualize the steps a user or system goes through, making it easier to derive test cases.

Option C is correct because acceptance testing aims to validate the system's behavior from the user or business perspective.

Therefore, focusing on key user workflows (rather than exhaustive technical or exception paths) aligns with the purpose of acceptance testing: to ensure that the system meets agreed-upon business requirements.

Option A is incorrect because decision tables are part of DMN (Decision Model and Notation), not BPMN.

Option B is too rigid - not all alternative/error paths must be modeled in early acceptance testing unless they are critical to business rules.

Option D misapplies the standards - DMN is used to model business rules, not the complete business process.

C). For acceptance testing, graphical business process models should focus on the user workflows to be tested.

#### NEW QUESTION # 57

Which one of the following usability testing techniques matches the test objective BEST?

- A. Biometrics-based evaluation help to understand retrospectively, how users interacted with the system and to improve it.
- **B. Walkthrough and thinking aloud methods can indicate difficulties users experience with certain tasks.**
- C. Expert reviews help to understand how users interact with a system and what is more or less visible.
- D. Log file analysis performed by usability experts identifies strong points of an interface that attract the user's attention.

**Answer: B**

#### NEW QUESTION # 58

.....

About ISQI CTFL-AcT Exam, each candidate is very confused. Everyone has their own different ideas. But the same idea is that this is a very difficult exam. We are all aware of ISQI CTFL-AcT exam is a difficult exam. But as long as we believe PassTestking, this will not be a problem. PassTestking's ISQI CTFL-AcT exam training materials is an essential product for each candidate. It is tailor-made for the candidates who will participate in the exam. You will absolutely pass the exam. If you do not believe, then take a look into the website of PassTestking. You will be surprised, because its daily purchase rate is the highest. Do not miss it, and add to your shoppingcart quickly.
