Learning and understanding Microsoft SC-300 Exam Questions is not enough to pass the SC-300 exam. Regular tests and self-evaluation are essential. The online SC-300 practice test engine makes it easy for candidates to self-evaluate anytime. The results will boost your confidence and highlight any areas that need more attention. Educationists and experts highly acknowledge this tool created by Itcerttest.

The Microsoft Identity and Access Administrator certification exam is ideal for professionals who are responsible for managing identity and access solutions in an enterprise environment. This includes security administrators, identity and access administrators, security analysts, and security engineers. SC-300 exam measures the candidate's knowledge of Microsoft Azure Active Directory, Azure AD Identity Protection, Azure AD Connect, and other Microsoft identity and access technologies. SC-300 exam also tests the candidate's ability to implement and manage identity and access solutions, including multi-factor authentication (MFA), conditional access, and role-based access control (RBAC).

The Microsoft SC-300 Exam consists of multiple-choice questions and performance-based scenarios that assess a candidate's ability to plan and implement identity and access solutions, manage identity and access components, and troubleshoot common issues. SC-300 exam is designed to test a candidate's technical skills as well as their ability to solve real-world problems.

Pass-Sure SC-300 Valid Braindumps Pdf Spend Your Little Time and Energy to Pass SC-300: Microsoft Identity and Access Administrator exam

This way you can get knowledge about the Microsoft SC-300 exam environment beforehand. Windows computers support the Microsoft SC-300 desktop practice exam software. It works offline whereas the web-based SC-300 Practice Test requires an active internet connection. Major browsers and operating systems support the online SC-300 mock exam.

Microsoft Identity and Access Administrator Sample Questions (Q184-Q189):

NEW QUESTION # 184

You have a Microsoft Entra tenant that contains the users shown in the following table.

Name	Role

Admin2	Attribute Assignment Administrator
User1	User

The tenant contains the identities shown in the following table.

Name	Type
Group1	Security group
Service1	Service principal

You have an attribute set named Custom1 that contains the custom security attributes shown in the following table.

Name	Type
Attribute1	String
Attribute2	Integer

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area		Yes	No
Statements	Admin1 can assign Attribute1 to User1.	<input type="radio"/>	<input type="radio"/>
	Admin2 can modify Attribute1.	<input type="radio"/>	<input type="radio"/>
	Admin2 can assign Attribute2 to Group1.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area		Yes	No
Statements	Admin1 can assign Attribute1 to User1.	<input checked="" type="radio"/>	<input type="radio"/>
	Admin2 can modify Attribute1.	<input type="radio"/>	<input type="radio"/>
	Admin2 can assign Attribute2 to Group1.	<input type="radio"/>	<input type="radio"/>

Explanation:

Answer Area

Statements	Yes	No
Admin1 can assign Attribute1 to User1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin2 can modify Attribute1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin2 can assign Attribute2 to Group1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 185

You have an Azure subscription that contains the following virtual machine Name: VM1 Azure region: East US System-assigned managed identity: Disabled You create the managed identities shown in the following table.

Name	Location
Managed1	East US
Managed2	East US
Managed3	West US

You perform the following actions:

* Assign Managed1 to VM1.

* Create a resource group named RG1 in the West US region.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can assign Managed2 to VM1.	<input type="radio"/>	<input type="radio"/>
You can assign Managed3 to VM1.	<input type="radio"/>	<input type="radio"/>
You can assign VM1 the Owner role for RG1.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
You can assign Managed2 to VM1.	<input checked="" type="radio"/>	<input type="radio"/>
You can assign Managed3 to VM1.	<input checked="" type="radio"/>	<input type="radio"/>
You can assign VM1 the Owner role for RG1.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Answer Area

Statements	Yes	No
You can assign Managed2 to VM1.	<input type="radio"/>	<input type="radio"/>
You can assign Managed3 to VM1.	<input type="radio"/>	<input type="radio"/>
You can assign VM1 the Owner role for RG1.	<input type="radio"/>	<input type="radio"/>

NEW QUESTION # 186

You have a Microsoft 365 tenant.

You need to identify users who have leaked credentials. The solution must meet the following requirements.

- * Identify sign-ins by users who are suspected of having leaked credentials.
- * Tag the sign-ins as a high risk event.
- * Immediately enforce a control to mitigate the risk, while still allowing the user to access applications.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To classify leaked credentials as high-risk, use:

- Azure Active Directory (Azure AD) Identity Protection
- Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- Identity Governance
- Self-service password reset (SSPR)

To trigger remediation, use:

- Client apps not using Modern authentication
- Device state
- Sign-in risk
- User location
- User risk

To mitigate the risk, select:

- Apply app enforced restrictions
- Block access
- Grant access but require app protection policy
- Grant access but require multi-factor authentication
- Grant access but require password change

Answer:

Explanation:

Answer Area

To classify leaked credentials as high-risk, use:

- Azure Active Directory (Azure AD) Identity Protection
- Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- Identity Governance
- Self-service password reset (SSPR)

To trigger remediation, use:

- Client apps not using Modern authentication
- Device state
- Sign-in risk
- User location
- User risk

To mitigate the risk, select:

- Apply app enforced restrictions
- Block access
- Grant access but require app protection policy
- Grant access but require multi-factor authentication
- Grant access but require password change

NEW QUESTION # 187

You are the cloud administrator for Pass4test Inc. and you have been tasked to implement multi-factor authentication for all of your users. In preparation for this, you need to ensure that all users are properly registered for multi-factor Authentication. Of the choices below, which one can NOT be used as an authentication method?

- A. Microsoft Authenticator App
- B. FIDO2 Security Key
- C. Security Question
- D. SMS
- E. Voice Call

Answer: C

NEW QUESTION # 188

Hotspot Question

You have a Microsoft 365 tenant.

You need to identify users who have leaked credentials. The solution must meet the following requirements:

- Identify sign-ins by users who are suspected of having leaked credentials.
- Flag the sign-ins as a high-risk event.
- Immediately enforce a control to mitigate the risk, while still allowing the user to access applications.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To classify leaked credentials as high-risk, use:

- Azure Active Directory (Azure AD) Identity Protection
- Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- Identity Governance
- Self-service password reset (SSPR)

To trigger remediation, use:

- Client apps not using Modern authentication
- Device state
- Sign-in risk
- User location
- User risk

To mitigate the risk, select:

- Apply app enforced restrictions
- Block access
- Grant access but require app protection policy
- Grant access but require password change
