As old saying goes, all work and no play makes jack a dull boy. Our SPP certification materials really deserve your choice. Contact us quickly. We are waiting for you.

IASP Strategy Planning Professional Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which of the following actions should planners NOT take when they start falling behind on implementation?

- A. Re-assess the project schedule
- **B. Reduce stakeholder participation**
- C. Renegotiate and deploy more resources
- D. Narrow the project scope

Answer: B

Explanation:

Reducing stakeholder participation when implementation is behind schedule is counterproductive. Engaged stakeholders provide critical support, resources, and feedback that can help overcome obstacles. The IASP SPP curriculum stresses inclusive problem-solving and transparency during challenges to maintain trust and momentum. Reassessing schedules, reallocating resources, and adjusting scope are appropriate recovery actions. Reducing stakeholder involvement risks increased resistance, information gaps, and further delays.

NEW QUESTION # 22

Which of the following LEAST contributes to customer value?

- A. Anticipating and adjusting for the psychological cost of the product to the customer
- B. Providing a caring customer service
- **C. Enticing customers to participate in surveys**
- D. Providing customer appreciation

Answer: C

Explanation:

Customer value is primarily created through appreciation, empathetic service, and reducing psychological costs such as effort or anxiety in purchase/use. While customer surveys can be useful feedback mechanisms, simply enticing participation without delivering value or acting on feedback contributes least to customer value. The IASP SPP curriculum highlights that authentic value creation focuses on improving experience and meeting customer needs, not on administrative tasks like survey solicitation.#IASP SPP Study Guide - Customer Value###Pralhad & Ramaswamy, Co-creation of Value#

NEW QUESTION # 23

Which of the following is MOST important in designing a measurement for a strategic goal?

- A. Can the measurement be attained at a reasonable cost?
- B. Is there agreement on the measurement?
- **C. Does the measurement actually measure the intended outcome?**
- D. Can someone be held accountable for the measurement?

Answer: C

Explanation:

The most critical aspect of a measurement is its validity-whether it actually measures the intended outcome. Accurate measurement ensures that progress reflects true performance related to strategic goals.

The IASP SPP curriculum highlights that measures must align closely with objectives to support effective monitoring and decision-making. While cost, accountability, and agreement are important, validity is foundational for meaningful performance management.#IASP SPP Study Guide - Performance Measurement#

NEW QUESTION # 24

Which of these actions should be taken first, if and when a strategic plan does not seem to be unfolding as expected?

- A. Demonstrate patience because change takes time.
- **B. Determine the reasons for the plan not working.**
- C. Restructure the internal advisory team.
- D. Make modifications to the strategic plan

Answer: B

Explanation:

The first action when a strategic plan is not progressing as expected is to determine the root causes of underperformance or obstacles. This diagnostic step enables targeted interventions and avoids premature or misguided changes. The IASP SPP curriculum emphasizes the importance of analysis before adjustment, supporting informed decision-making to correct course effectively. #IASP SPP Study Guide - Performance Monitoring##Kaplan & Norton, Balanced Scorecard#

NEW QUESTION # 25

When multiple changes are already occurring in an organization, which of the following is the best way to initiate another change?

- A. Survey employees on impact of change at this point in time
- **B. Phase in the project in small segments with a few employees**
- C. Implement the total project all at once
- D. Provide stress management training first

Answer: B

Explanation:

Phasing in a new project in small segments with a few employees helps manage change fatigue and resistance. This incremental approach allows learning, adjustment, and reduced disruption, which is critical when multiple changes are ongoing. The IASP SPP curriculum supports this method as best practice for managing complex organizational transitions, fostering acceptance, and ensuring more successful adoption.

Large-scale or immediate implementation increases stress and risk, while stress management training, although helpful, is not the initial step. #IASP SPP Study Guide - Change Management##Kotter, Leading Change#

NEW QUESTION # 26

.....
