最新下載的Plat-Dev-301最新考古題，幫助妳輕鬆通過Plat-Dev-301考試

Fast2test是領先于世界的學習資料提供商之一，您可以下載我們最新的PDF版本免費試用作為體驗。我們還提供可靠和有效的軟件版本Plat-Dev-301題庫資料，幫助您模擬真實的考試環境，以方便考生掌握最新的Salesforce Plat-Dev-301考試資訊。在我們的指導和幫助下，可以首次通過您的考試，Plat-Dev-301考古題是IT專家經過實踐測試得到的，Plat-Dev-301考古題也能幫您在IT行業的未來達到更高的水平。

最新的 Salesforce Developer Plat-Dev-301 免費考試真題 (Q185-Q190):

問題 #185

Universal Containers analyzes a Lightning web component and its Apex controller class that retrieves a list of contacts associated with an account. The code snippets are as follows:

Lightning web component (accountContacts.html):

```
<template>
  <lightning-card title="Account Contacts">
    <lightning-datatable data={contacts} columns={columns} key-
field="Id"></lightning-datatable>
  </lightning-card>
</template>
```

Apex controller class (AccountContactsController.cls):

```
public with sharing class AccountContactsController {
    @AuraEnabled
    public List<Contact> getAccountContacts(String accountId) {
        return [SELECT Id, Name, Email, Phone FROM Contact WHERE
AccountId = :accountId];
    }
}
```

Based on the code snippets, what change should be made to display the contacts' mailing addresses in the Lightning web component?

- A. Modify the SOQL query in the `getAccountContacts` method to include the `MailingAddress` field.
- B. Add a new method in the Apex controller class to retrieve the mailing addresses separately and modify the Lightning web component to invoke this method.
- **C. Modify the SOQL query in the `getAccountContacts` method to include the `MailingAddress` field and update the `columns` attribute in javascript file to add Mailing address fields.**
- D. Extend the `lightning-datatable` component in the Lightning web component to include a column for the `MailingAddress` field.

答案: C

解題說明:

To display the contacts' mailing addresses in the Lightning web component, both the SOQL query in the `getAccountContacts` method and the `columns` attribute in the JavaScript file of the component need to be updated. The query must include the `MailingAddress` field, and the JavaScript file must be modified to add this field to the `columns` shown in the `lightning-datatable`.

問題 #186

Universal Containers needs to integrate with several external systems. The process is initiated when a record is created in Salesforce. The remote systems do not require Salesforce to wait for a response before continuing.

What is the recommended best solution to accomplish this?

- A. Trigger with HTTP callout
- B. PushTopic event
- C. Outbound message
- **D. Platform event**

答案: D

解題說明:

Platform events provide a robust and scalable way to communicate changes and events from Salesforce to external systems, especially when there is no requirement for Salesforce to wait for a response. They are designed to support event-driven architectures and can handle high volumes of events that can be published and consumed by external systems. Outbound messages, on the other hand, are limited by the need for an acknowledgment response from the target system, which can introduce latency.

問題 #187

When the sales team views an individual customer record, they need to see recent interactions for the customer. These interactions can be sales orders, phone calls, or Cases. The date range for recent interactions will be different for every customer record type. How can this be accomplished?

- A. Use batch Apex to query for the most recent interactions when the customer view screen is loaded.
- B. Use a dynamic form on the customer record page to display recent interactions.
- C. Use Lightning Flow to read the customer's record type, and then do a dynamic query for recent interactions and display on the View page.
- **D. Use a Lightning component to query and display interactions based on record type that is passed in using a design:attribute from the Lightning page.**

答案: D

解題說明:

A Lightning component can dynamically query and display interactions based on the customer's record type. The component can receive the record type as a parameter and adjust the query accordingly, providing the required functionality without batch processing or additional configurations.

問題 #188

Refer to the test method below:

```
Line 1: @isTest
Line 2: static void testMyTrigger()
Line 3: {
Line 4:     //Do a bunch of data setup
Line 5:     DataFactory.setupDataForMyTriggerTest();
Line 6:
Line 7:     List<Account> acctsBefore = [SELECT Is_Customer__c FROM Account WHERE Id IN :DataFactory.accounts];
Line 8:
Line 9:     //Utility to assert all accounts are not customers before the update
Line 10:    AssertUtil.assertNotCustomers(acctsBefore);
Line 11:
Line 12:    //Set accounts to be customers
Line 13:    for(Account a : DataFactory.accounts)
Line 14:    {
Line 15:        a.Is_Customer__c = true;
Line 16:    }
Line 17:
Line 18:    update DataFactory.accounts;
Line 19:
Line 20:    List<Account> acctsAfter = [SELECT Number_Of_Transfers__c FROM Account WHERE Id IN :DataFactory.accounts];
Line 21:
Line 22:    //Utility to assert Number_Of_Transfers__c is correct based on test data
Line 23:    AssertUtil.assertNumberOfTransfers(acctsAfter);
Line 24: }
```

The test method tests an Apex trigger that the developer knows will make a lot of queries when a lot of Accounts are simultaneously updated to be customers. The test method fails at the Line 20 because of too many SOQL queries. What is the correct way to fix this? A)

A) Use `Limits.getLimitQueries()` to find the total number of queries that can be issued.

B)

B) Change the `DataFactory` class to create fewer Accounts so that the number of queries in the trigger is reduced.

C)

C) Add `Test.startTest()` before and add `Test.stopTest()` after both Line 7 and Line 20 of the code.

D)

D) Add `Test.startTest()` before and add `Test.stopTest()` after Line 18 of the code.

- A. Option C
- B. Option B
- C. Option A
- **D. Option D**

答案: D

解題說明:

The correct way to fix this is to add Test.startTest() before and add Test.stopTest() after Line 18 of the code. This will reset the governor limits for the code that executes between these two methods, and allow the test to run without hitting the SOQL query limit. The Test.startTest() and Test.stopTest() methods are used to test code that makes a lot of queries or calls asynchronous methods¹². By using these methods, the developer can isolate the code that needs more resources and verify that it does not exceed the governor limits.

:

Using Limits, startTest, and stopTest | Apex Developer Guide | Salesforce Developers Test.StartTest & Test.StopTest - Salesforce Developer Community Why would a developer use test startTest and test stopTest in Salesforce? | ForceTalks

問題 #189

The use of the transient keyword in Visualforce page controllers helps with which common performance issue?

- A. Improves page transfers
- B. Reduces load times
- C. Improves query performance
- D. Reduces view state

答案: D

解題說明:

The transient keyword in Visualforce page controllers marks variables that should not be part of the view state, which can significantly reduce the size of the view state. This can help avoid view state limit errors and improve page performance because a smaller view state requires less time to send to the client.

問題 #190

.....

Fast2test 考題大師始終致力與為客戶提供 Plat-Dev-301 認證的全真考題及認證學習資料，該模擬試題可以在不同的電腦中使用，這對於考生來說沒有任何限制。我們的 Plat-Dev-301 權威考試題庫軟體是 Salesforce 認證廠商的授權產品，全新的收錄了 Salesforce 認證考試的所有試題，並根據認證的不斷變化而動態更新，參考資料的考試試題都是最新推出的。能夠幫助你一次通過 Salesforce Plat-Dev-301 認證考試。

Plat-Dev-301 考試心得: <https://tw.fast2test.com/Plat-Dev-301-premium-file.html>

3、根據 Salesforce Plat-Dev-301 的考試科目不斷的變化，採取不斷的更新，會提供最新的考試內容，如果你想你的職業生涯有一個很好的提升，建議您努力學習並且通過 Plat-Dev-301 測試，Fast2test Plat-Dev-301 考試心得的資料可以讓你在準備考試時節省很多的時間，我們應該選擇由業內資深老師編寫的 Plat-Dev-301 問題集，這樣所有的 Plat-Dev-301 問題的答案的準確度才會有保障，Salesforce Plat-Dev-301 最新考古題 一本高效率的考古題是大家準備考試時必不可少的工具，對於購買我們 Salesforce Plat-Dev-301 題庫的顧客，我們提供一年以內免費更新，Salesforce Plat-Dev-301 最新考古題 相信作為 IT 行業人士的每個人都很想擁有吧。

後果比楊光想象中的要嚴重許多，因此，請覆蓋該區域，3、根據 Salesforce Plat-Dev-301 的考試科目不斷的變化，採取不斷的更新，會提供最新的考試內容，如果你想你的職業生涯有一個很好的提升，建議您努力學習並且通過 Plat-Dev-301 測試。

使用真實的 Salesforce Plat-Dev-301 最新考古題準備您的 Salesforce Plat-Dev-301 考試，輕鬆通過

Fast2test 的資料可以讓你在準備考試時節省很多的時間，我們應該選擇由業內資深老師編寫的 Plat-Dev-301 問題集，這樣所有的 Plat-Dev-301 問題的答案的準確度才會有保障，一本高效率的考古題是大家準備考試時必不可少的工具。
