NEW QUESTION # 17

SAP LeanIX Fact Sheets can represent which of the following?

- A. RACI matrices
- B. Audit logs
- C. Applications, interfaces, and capabilities
- D. Survey forms

Answer: C

Explanation:

Fact Sheets are the central information objects used in SAP LeanIX. They document key architectural components such as applications, interfaces, and business capabilities. Each Fact Sheet provides lifecycle details, ownership, dependencies, and relationships to other IT and business elements. This structure enables organizations to maintain a clear and consistent representation of their enterprise architecture. Survey forms, audit logs, or RACI matrices are not core Fact Sheet types.

NEW QUESTION # 18

What are the benefits offered by SAP Cloud ALM for businesses?

(3 correct answers)

- A. It supports process mining with plug & gain
- B. It supports only cloud implementation scenarios
- C. It is available to all customers with Enterprise Support Agreement or cloud contract
- D. It is instantly available for use as a subscription service

- E. It reduces TCO of the solution landscape

Answer: C,D,E

Explanation:

SAP Cloud ALM provides multiple operational and implementation benefits to businesses undergoing transformation. First, it is available to all customers who hold an SAP Enterprise Support Agreement or cloud subscription. This means there are no additional licensing fees, making Cloud ALM a highly accessible lifecycle management platform. Its broad availability encourages consistent adoption across organizations of all sizes.

Second, SAP Cloud ALM is instantly available as a cloud-native subscription service. There is no installation or infrastructure setup required. Customers can begin using Cloud ALM almost immediately after provisioning, accelerating project kickoff and reducing administrative overhead.

Third, one of its major benefits is that it reduces total cost of ownership (TCO) by minimizing on-premise infrastructure requirements and providing standardized, automated tools for monitoring, implementation, testing, and operations. This reduces the need for multiple separate ALM systems and allows customers to centralize lifecycle activities.

Option A is incorrect because process mining with Plug & Gain is a Signavio capability. Option D is incorrect because Cloud ALM supports both cloud and hybrid/on-premise scenarios through integration monitoring and operational support. Therefore, the correct benefits are B, C, and E.
