## Microsoft DP-900 Guide | Exam DP-900 Registration

Any questions related with our DP-900 study prep will be responded as soon as possible, and we take good care of each exam candidates' purchase order, sending the updates for you and solve your questions on our DP-900 exam materials 24/7 with patience and enthusiasm. So do not capitulate to difficulties, because we will resolve your problems of the DP-900 Training Materials. You will get the most useful help form our service on the DP-900 training guide.

## Microsoft Azure Data Fundamentals Sample Questions (Q185-Q190):

### NEW QUESTION # 185

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.	<input type="radio"/>	<input type="radio"/>
Platform as a service (PaaS) database offerings in Azure provide administrators with the ability to control and update the operating system version.	<input type="radio"/>	<input type="radio"/>
All platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.	<input type="radio"/>	<input type="radio"/>
Platform as a service (PaaS) database offerings in Azure provide administrators with the ability to control and update the operating system version.	<input type="radio"/>	<input type="radio"/>
All platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.	<input type="radio"/>	<input type="radio"/>

Explanation:

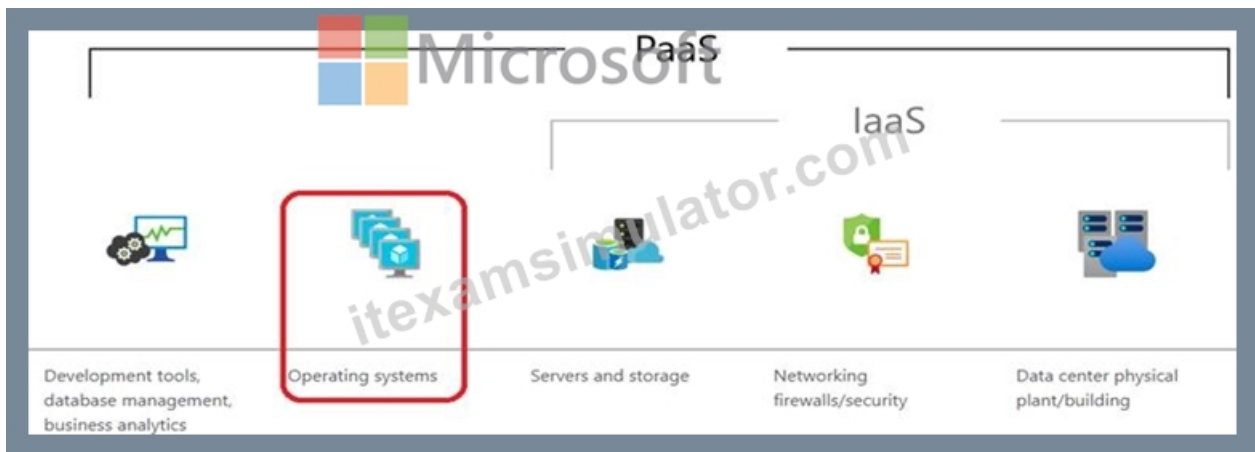

Statements	Yes	No
Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.	<input type="radio"/>	<input type="radio"/>
Platform as a service (PaaS) database offerings in Azure provide administrators with the ability to control and update the operating system version.	<input type="radio"/>	<input type="radio"/>
All platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.	<input type="radio"/>	<input type="radio"/>

Box 1: Yes

Like IaaS, PaaS includes infrastructure - servers, storage, and networking - but also middleware, development tools, business intelligence (BI) services, database management systems, and more. PaaS is designed to support the complete web application lifecycle: building, testing, deploying, managing, and updating.

PaaS allows you to avoid the expense and complexity of buying and managing software licenses, the underlying application infrastructure and middleware, container orchestrators such as Kubernetes, or the development tools and other resources

Box 2: Yes You manage the applications and services you develop, and the cloud service provider typically manages everything else.

Box 3: No

There really is no way to pause / stop billing for your Azure SQL Database.

Microsoft's official answer "Yes, you can export your database. Delete the Azure SQL database and that will pause billing. Then when you need it you can create a new database and import your previously exported DB." Reference:

### NEW QUESTION # 186

Match the types of analytics that can be used to answer the business questions.

To answer, drag the appropriate analytics type from the column on the left to its question on the right. Each analytics type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

**Analytics Types**

Cognitive	Descriptive	Diagnostic	Predictive	Prescriptive
-----------	-------------	------------	------------	--------------

**Answer Area**

Analytics Type	Why did sales increase last month?
Analytics Type	How do I allocate my budget to buy different inventory items?
Analytics Type	Which people are mentioned in a company's business documents?

**Answer:**

**Explanation:**

**Analytics Types**

Cognitive	Descriptive	Diagnostic	Predictive	Prescriptive
-----------	-------------	------------	------------	--------------

**Answer Area**

Diagnostic	Why did sales increase last month?
Predictive	How do I allocate my budget to buy different inventory items?
Cognitive	Which people are mentioned in a company's business documents?

### NEW QUESTION # 187

Select the answer that correctly completes the sentence.

**Answer Area**

A JSON document that contains customer entities with a variable number of properties is an example of

semi-structured

data.

semi-structured

**Answer:**

**Explanation:**

Answer Area

A JSON document that contains customer entities with a variable number of properties is an example of

semi-structured  
relational  
semi-structured  
structured  
unstructured

Answer Area

A JSON document that contains customer entities with a variable number of properties is an example of

semi-structured data.

### NEW QUESTION # 188

To complete the sentence, select the appropriate option in the answer area.

Answer Area

You can query a graph database in Azure Cosmos DB

as a JSON document by using a SQL-like language.  
as a partitioned row store by using Cassandra Query Language (CQL).  
as a partitioned row store by using Language-Integrated Query (LINQ).  
as nodes and edges by using the Gremlin language.

Answer:

Explanation:

Answer Area

You can query a graph database in Azure Cosmos DB

as a JSON document by using a SQL-like language.  
as a partitioned row store by using Cassandra Query Language (CQL).  
as a partitioned row store by using Language-Integrated Query (LINQ).  
as nodes and edges by using the Gremlin language.

Answer Area

You can query a graph database in Azure Cosmos DB

as a JSON document by using a SQL-like language.

### NEW QUESTION # 189

To complete the sentence, select the appropriate option in the answer area.

In a data warehousing workload, data

from a single source is distributed to multiple locations  
from multiple sources is combined in a single location  
is added to a queue for multiple systems to process  
is used to train machine learning models

Answer:

Explanation:

In a data warehousing workload, data

from a single source is distributed to multiple locations  
from multiple sources is combined in a single location  
is added to a queue for multiple systems to process  
is used to train machine learning models

Explanation

Note: The data warehouse workload encompasses:

- The entire process of loading data into the warehouse
- Performing data warehouse analysis and reporting
- Managing data in the data warehouse
- Exporting data from the data warehouse

### NEW QUESTION # 190
