

[Technology] USGBC LEED-Green-Associate Exam Dumps For Good Success 2026

P.S. Free & New LEED-Green-Associate dumps are available on Google Drive shared by Prep4King:
<https://drive.google.com/open?id=13UXcXDx8BLtTqM8gN-1KUxXDsmI0Exb>

The only way to save yourself from this scenario is by relying on USGBC LEED-Green-Associate study material. Prep4King equips you with the excellent USGBC LEED-Green-Associate dumps material to help you clear the USGBC LEED-Green-Associate real examination on the maiden attempt. One of the leading factors of Prep4King in this industry is offering only top-rated and updated LEED-Green-Associate Exams practice questions.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
Topic 2	<ul style="list-style-type: none">Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
Topic 3	<ul style="list-style-type: none">Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
Topic 4	<ul style="list-style-type: none">Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.
Topic 5	<ul style="list-style-type: none">Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.
Topic 6	<ul style="list-style-type: none">Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.

Topic 7	<ul style="list-style-type: none"> • LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.

New LEED-Green-Associate Mock Exam, Test LEED-Green-Associate Questions Answers

LEED-Green-Associate exam training allows you to pass exams in the shortest possible time. If you do not have enough time, our LEED-Green-Associate study material is really a good choice. In the process of your learning, our LEED-Green-Associate study materials can also improve your efficiency. If you don't have enough time to learn, LEED-Green-Associate Test Guide will make the best use of your spare time. The professional tailored by LEED-Green-Associate learning question must be very suitable for you. You will have a deeper understanding of the process. Efficient use of all the time, believe me, you will realize your dreams.

USGBC LEED Green Associate Exam Sample Questions (Q90-Q95):

NEW QUESTION # 90

During the charrette, the project team is discussing strategies for improving the indoor environmental quality Which strategy will help attain points toward certification?

- A. Daylighting
- B. Installing indoor plants
- C. Night lighting
- D. Installing inoperable windows

Answer: A

Explanation:

Explanation

Daylighting is a strategy that involves designing buildings to maximize the use of natural light and reduce the need for artificial lighting¹. Daylighting can improve the indoor environmental quality by enhancing the visual comfort, mood, and productivity of the occupants². Daylighting can also help attain points toward LEED certification by contributing to the credits in the Energy and Atmosphere and Indoor Environmental Quality categories¹. Night lighting, installing indoor plants, and installing inoperable windows are not strategies that directly improve the indoor environmental quality or help attain points toward LEED certification.

NEW QUESTION # 91

Good site design benefits a project in which of the following ways?

- A. Protects endangered species and maximizes development of previously undeveloped areas
- B. Makes occupants comfortable by providing green spaces
- C. Supports access to diverse land uses, sustainable food and services
- D. Provides access to public transportation and employment opportunities

Answer: B

Explanation:

Explanation

Good site design benefits a project in which of the following ways: makes occupants comfortable by providing green spaces. Green spaces are areas of vegetation that improve the quality of life for building occupants and visitors by providing natural views, fresh air, shade, noise reduction, and recreational opportunities. They also reduce heat island effect, improve stormwater management, and sequester carbon dioxide. The LEED Green Associate Candidate Handbook states that one of the intents of the Sustainable Sites category is to "enhance occupant comfort by providing green spaces" [1, p. 13]. References: [LEED Green Associate Candidate Handbook], [Green Spaces | U.S. Department of Energy]

NEW QUESTION # 92

Which of the following is a measure of energy use intensity?

- A. Daylighting and views
- **B. Energy consumed per unit of floor space**
- C. Systems with ENERGY STAR" requirements
- D. The amount of electricity a wind turbine can produce

Answer: B

Explanation:

Energy use intensity (EUI) is a measure of energy use per unit of floor space. It is calculated by dividing the total energy consumed by the building in one year (measured in kilowatt-hours or kilo-British Thermal Units) by the total gross floor area of the building (measured in square feet or square meters). EUI is a useful metric for comparing the energy performance of different buildings or benchmarking against national averages. EUI can vary depending on building type, climate, occupancy, and other factors. Generally, a lower EUI indicates better energy efficiency and lower environmental impact. References: What is Energy Use Intensity (EUI)?²; Energy Use Intensity (EUI)³

NEW QUESTION # 93

LEED considers products to be environmentally preferable materials when they are

- **A. locally extracted, manufactured and purchased**
- B. transported by air rather than rail
- C. cost effective
- D. materials with more life-cycle impact

Answer: A

Explanation:

Explanation

LEED considers products to be environmentally preferable when they are locally extracted, manufactured, and purchased. This is because local sourcing reduces the environmental impact associated with transportation, supports local economies, and can often ensure that the materials are suitable for the local climate and conditions. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 94

A wood product that is certified by the Forest Stewardship Council (FSC) is guaranteed to be

- **A. harvested from a well-managed source**
- B. purchased from a LEED AP
- C. grown in a tropical forest
- D. packaged with environmentally friendly materials

Answer: A

Explanation:

The Forest Stewardship Council (FSC) is an independent, non-governmental organization that promotes responsible management of the world's forests. FSC sets standards for forest management that ensure environmental, social, and economic benefits for present and future generations. FSC also certifies forest products that meet its standards through a chain of custody system that tracks the origin and processing of the products. A wood product that is certified by FSC is guaranteed to be harvested from a well-managed source that protects biodiversity, respects indigenous rights, maintains forest productivity, and supports local communities¹. Reference: LEED v4 Green Associate Candidate Handbook¹, FSC's What We Do

NEW QUESTION # 95

.....

Are you one of them? Are you still worried and confused because of the the various exam materials and fancy training courses

exam? Prep4King is the right choice for you. Because we can provide you with a comprehensive exam, including questions and answers. All of these will help you to acquire a better knowledge, we are confident that you will through Prep4King the USGBC LEED-Green-Associate Certification Exam. This is our guarantee to all customers.
