素晴らしいCBCI模擬対策問題一回合格-一番優秀なCBCI模擬資料

ご存知のように、すべての受験者は、知識とスキルを示すための最良の証拠となる関連するBCIのCBCI認定を取得する場合、試験に合格する必要があります。準備プロセスを簡素化する場合は、良いニュースがあります。CBCI試験問題は、多くの国のすべてのPassTestお客様から高く評価されており、当社はこの分野のリーダーになっています。CBCI試験問題は、CBCI試験に合格するために非常に正確です。CBCI実践ガイドを購入すると、高いCertificate of the Business Continuity Institute (CBCI)合格率が得られます。

BCI CBCI 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">はじめに: このセクションでは、ビジネス継続性とは何か、それが組織の回復力においてなぜ重要なのか、そしてその基本的なプラクティスが Good Practice Guidelines (GPG) フレームワークの下でどのように相互に関連しているのかを明らかにして、ビジネス継続性の初心者のための基礎を築きます。
トピック 2	<ul style="list-style-type: none">分析 このモジュールでは分析段階に入り、ビジネス影響分析 (BIA) やリスク評価などのツールに焦点を当てて、組織が保護する必要があるものとその理由を理解するために不可欠な重要な機能と脆弱性を特定します。
トピック 3	<ul style="list-style-type: none">ポリシーとプログラムの管理と組み込み: この部分では、ガバナンスを作成し、ポリシーを定義し、長期的な持続可能性のためにこれらの要素を組織の構造に組み込む方法など、ビジネス継続性管理システム (BCMS) を確立するための手順をユーザーに説明します。

- 設計:ここでは、学習者は、特定されたリスクを軽減し、重要な操作が機能し続けるか、中断時に迅速に回復できることを保証する継続性設計を開発することによって、分析を戦略計画に変換する方法を学びます。

BCI Certificate of the Business Continuity Institute (CBCI) 認定 CBCI 試験 問題 (Q31-Q36):

質問 # 31

Which of the following describes an operational plan?

- A. Documented procedures that are still in draft form as they have not yet been tested via exercises or actual incidents
- B. Detailed information on any processes that have not been risk assessed by the organization and therefore present an increased risk
- C. Documented plans to protect people and property while supporting the recovery of the organization's prioritised activities
- D. Pre-prepared information to facilitate the coordination of response activities when several different operational teams are involved

正解: C

解説:

Operational plans sit within Enabling Solutions (PP5) and are designed to support the continuity and recovery of prioritised activities at the departmental or specialist-service level (e.g., facilities, ICT, logistics), from the beginning of an incident through recovery and return to normal. They translate agreed continuity solutions and resource requirements into actionable procedures for operational teams.

Option A is the best description because it captures the operational intent: protect people/property (immediate operational control and safety) while enabling recovery of prioritised activities and services. Option D is closer to what BCI guidance describes as a tactical plan outcome—a coordination framework between strategic and operational teams—rather than an operational plan itself.

Option B confuses plan status (draft/untested) with plan type; an operational plan can be draft or validated, but that does not define it. Option C is about risk documentation, not operational recovery planning. Operational plans are therefore best represented by A.

質問 # 32

Within the context of risk assessment, the identification of solutions is influenced by a variety of business relevant considerations, including:

- A. Compliance with regulatory requirements
- B. Timely production of quality assurance audit trails
- C. Ensuring that communication protocols are observed
- D. Delivering performance targets

正解: A

解説:

The CBCI 7.0 course highlights that compliance with regulatory requirements is a critical consideration when identifying risk treatment solutions. Regulatory frameworks often impose mandatory controls or guidelines that shape the selection and design of Business Continuity solutions to ensure legal adherence and avoid penalties. While performance targets, audit trails, and communication protocols are important operational elements, they are subordinate to regulatory compliance, which acts as a baseline constraint and influence on continuity planning. Effective risk solutions balance operational effectiveness with mandatory compliance, supporting sustainable and defensible Business Continuity strategies.

質問 # 33

Which of the following solutions in the context of building and work environment resources would support a strategy of relocating operations to another work area belonging to the organization should an incident occur?

- A. Contract former employees and contractors to undertake work at the replacement during a disruption
- B. Re-purpose work areas and facilities to enable working arrangements for organization personnel during a disruption

- C. Advise personnel that they will have to work around the existing workstations and equipment in the alternative site as it will be an emergency situation
- D. Create a separate supply chain to support the alternative site in the case of an incident occurring

正解: B

解説:

The CBCI 7.0 course outlines that a key solution to support relocation strategies involves re-purposing existing work areas and facilities to accommodate essential personnel and functions during disruptions. This may involve modifying spaces, reallocating equipment, or adapting layouts to maintain operations efficiently. Such pre-planning ensures that the organization can resume activities quickly and safely. Contracting former employees or creating separate supply chains may assist but are secondary to establishing viable physical environments. Expecting personnel to adapt to unprepared facilities risks inefficiency and morale issues. Proactive adaptation of workspace is a cornerstone of effective relocation strategies.

質問 # 34

The organization's requirements for information and data resources should be considered as part of the Activity Business Impact Analysis (BIA). Which of the following is correct in relation to the Recovery Point Objective (RPO)?

- A. The RPO should comply with data protection requirements
- B. The RPO establishes the amount of time that IT services can be disrupted before the organization is impacted
- C. The RPO is the point to which information must be restored to enable all priority activities to operate on resumption
- D. All data users and activities have the same requirements; so only limited consultation is required to determine the RPO

正解: C

解説:

Recovery Point Objective (RPO) defines the maximum acceptable age of data to be recovered following a disruption, effectively setting the point in time to which information must be restored. The CBCI 7.0 course explains that RPOs vary depending on the priority and criticality of activities, requiring consultation with data users to ensure continuity needs are met accurately. RPOs are crucial for developing backup and data recovery strategies and directly influence the selection of technical solutions. While data protection compliance is necessary, it is not the primary function of RPO. Additionally, RPO focuses on data restoration points, not on the duration IT services can be disrupted-that relates to Recovery Time Objective (RTO).

質問 # 35

Validation is achieved through a combination of activities. Which one of following options lists the three activities?

- A. Exercising, updating, and stakeholder review
- B. Exercising, maintenance, and review
- C. Exercising, maintenance and analysing
- D. Exercising, debriefing, and peer review

正解: B

解説:

In CBCI 7.0 (aligned to BCI Good Practice Guidelines 7.0), Validation (PP6) is explicitly achieved through a combination of three activities: Exercising, Maintenance, and Review. Exercising is used to train for, assess, practice, and improve performance; maintenance ensures BC arrangements and plans remain relevant and operationally ready; and review assesses the suitability, adequacy, and effectiveness of the BCMS and identifies opportunities for improvement. This "three-part" approach ensures validation is not limited to running exercises: it also confirms that documents and capabilities stay current and that the BCMS remains effective as the organization and its context change. The GPG Lite 7.0 section for PP6 states this combination directly, and it also emphasizes that validation confirms implemented solutions and plans work to agreed specifications and are appropriate for the organization's size and complexity-reinforcing why maintenance and review must accompany exercises rather than being optional add-ons.
