Book C-CPI-2506 Free | Valid Real C-CPI-2506 Exam

It is not hard to know that C-CPI-2506 study materials not only have better quality than any other study materials, but also have

more protection. On the one hand, we can guarantee that you will pass the exam easily if you learn our C-CPI-2506 study materials; on the other hand, once you didn't pass the exam for any reason, we guarantee that your property will not be lost. Our C-CPI-2506 Study Materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 3	Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 4	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

SAP Certified Associate - Integration Developer Sample Questions (Q29-Q34):

NEW QUESTION # 29

You want to integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow. Which user role must you set up in the SOAP adapter?

- A. MessagingSend
- **B. ESBMessaging send**
- C. MessagingsendtoCI

Answer: B

Explanation:

To integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow, you must set up the ESBMessaging send user role in the SOAP adapter. The ESBMessaging send user role grants the permission to send messages to the Enterprise Service Bus (ESB) of the Cloud Integration capability. The ESB is responsible for routing and delivering messages between different integration flows and adapters. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 30

You have set up an integration process to use a SOAP adapter. Which event allows you to run the integration flow directly after deployment?

- A. End Event
- B. End Message
- **C. Start Message**
- D. Start Event

Answer: C

Explanation:

A Start Message event allows you to run the integration flow directly after deployment. A Start Message event is triggered when a message arrives at the integration flow through an inbound channel, such as a SOAP adapter. You can use a Start Message event to initiate an integration process based on a message input. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 31

What are API Management components? Note: There are 2 correct answers to this question.

- A. Authorization server
- B. Product
- C. API Designer
- D. API Entity

Answer: B,C

Explanation:

Key API Management components in SAP Integration Suite:

API Designer # Used to design APIs, import specifications (OpenAPI, RAML), and define metadata.

Product # Groups one or more APIs into a package that can be published to API Business Hub Enterprise.

Other options:

Authorization Server # Part of security infrastructure, not a direct API Management component.

API Entity # Not a defined component; the actual entities are API Proxies, Providers, and Products.

Thus, correct components are API Designer and Product.

NEW QUESTION # 32

In the SAP Integration Suite, where can you change the virtual host name?

- A. Design APIs
- B. Discover - APIs
- C. Settings APIs
- D. Configure ? APIs

Answer: C

Explanation:

In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 33

What are some advantages of creating an OData interface through an API provider? Note: There are 2 correct answers to this question.

- A. Automatic creation of a WSDL specification
- B. Automatic creation of an openAPI specification
- C. Automatic creation of a Swagger UI
- D. Automatic creation of a RAML specification

Answer: B,C

Explanation:

When an OData service is created through an API Provider in SAP API Management:

The system can automatically generate an OpenAPI specification from the OData service.

A Swagger UI is automatically created to enable interactive testing and documentation.

Other options:

WSDL specification # Used for SOAP-based services, not OData.

RAML specification # Supported, but not auto-generated by SAP API Management for OData services.

Hence, the correct advantages are:
