2026 Latest BraindumpsPass 300-710 PDF Dumps and 300-710 Exam Engine Free Share: https://drive.google.com/open?id=1C_-HS2Uv1ckvRW5JIXV9-kAysP7hCqYo

The Cisco 300-710 certification differentiates you from other professionals in the market. Success in the Cisco 300-710 exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the Cisco 300-710 test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for Securing Networks with Cisco Firepower 300-710 Exam Preparation. BraindumpsPass real Cisco 300-710 exam dumps are enough to clear the 300-710 certification test easily on the first attempt. This is because BraindumpsPass Cisco 300-710 PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.

We promise you will pass the exam and obtain the Securing Networks with Cisco Firepower certificate successfully with our help of 300-710 exam questions. According to recent survey of our previous customers, 99% of them can achieve their goals, so believe that we can be the helping hand to help you achieve your ultimate goal. Besides we have high-quality 300-710 test guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way. On the other hand, if you fail to pass the exam with our 300-710 Exam Questions unfortunately, you can receive a full refund only by presenting your transcript. At the same time, if you want to continue learning, our 300-710 test guide will still provide free updates to you and you can have a discount more than one year. Finally our refund process is very simple. If you have any question about Securing Networks with Cisco Firepower study question, please contact us immediately.

Materials & Authorized Vce 300-710 File

Our website is here to lead you toward the way of success in 300-710 certification exams and saves you from the unnecessary preparation materials. The latest 300-710 dumps torrent are developed to facilitate our candidates and to improve their ability and expertise for the challenge of the actual test. We aimed to help our candidates get success in the 300-710 Practice Test with less time and less effort.

Cisco 300-710 exam is designed for professionals who want to validate their skills in implementing and managing Cisco Firepower Next-Generation Firewall (NGFW) solutions. With the increasing number of cyber threats, organizations are looking for skilled professionals who can secure their networks and protect their sensitive data. The Cisco 300-710 Exam is an excellent way to demonstrate your expertise in this area and increase your credibility in the industry.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q103-Q108):

NEW QUESTION # 103

A company is in the process of deploying intrusion protection with Cisco FTDs managed by a Cisco FMC. Which action must be selected to enable fewer rules detect only critical conditions and avoid false positives?

- A. No Rules Active
- B. Maximum Detection
- C. Balanced Security and Connectivity
- **D. Connectivity Over Security**

Answer: D

NEW QUESTION # 104

A network administrator is trying to configure an access rule to allow access to a specific banking site over HTTPS. Which method must the administrator use to meet the requirement?

- A. Block the category of banking and define the application of WWW.
- B. Define the URL to be blocked and disable SSL inspection.
- C. Define the URL to be blocked and set the application to HTTP.
- **D. Enable SSL decryption and specify the URL.**

Answer: D

Explanation:

To allow access to a specific banking site over HTTPS, the network administrator must use SSL decryption (also known as SSL/TLS inspection) and specify the URL. This is because HTTPS traffic is encrypted, and the firewall needs to decrypt the traffic to inspect the URL and enforce the access rule.

Steps:

* Enable SSL Decryption: Configure SSL policies to decrypt the HTTPS traffic.

* Specify the URL: Define the URL of the banking site in the access control policy, ensuring that the decrypted traffic is inspected and allowed based on the specified URL.

This method ensures that only the desired banking site is accessed over HTTPS, while other HTTPS traffic can be filtered or blocked according to the organization's security policies.

References: Cisco Secure Firewall Management Center Configuration Guide, Chapter on SSL Decryption.

NEW QUESTION # 105

A network administrator wants to configure a Cisco Secure Firewall Threat Defense instance managed by Cisco Secure Firewall Management Center to block traffic to known cryptomining networks. Which system settings must the administrator configure in Secure Firewall Management Center to meet the requirement?

- A. Intrusion Policy, Security Intelligence
- **B. Access Policy, Security Intelligence**
- C. Access Policy, Rules
- D. Malware Policy, Rules

Answer: B

Explanation:

To block traffic to known cryptomining networks using Cisco Secure Firewall Threat Defense (FTD) managed by Cisco Secure Firewall Management Center (FMC), the network administrator needs to configure Security Intelligence in an Access Control Policy. Security Intelligence allows administrators to block traffic based on threat intelligence feeds, which include known malicious IP addresses, domains, and URLs.

Steps:

Navigate to Policies > Access Control > Access Control Policy in FMC.

Edit or create an Access Control Policy.

Go to the Security Intelligence tab.

Enable the relevant threat intelligence feeds that include cryptomining networks.

Apply the policy to the FTD device.

This configuration ensures that traffic to known cryptomining networks is blocked, enhancing the network's security posture against cryptomining threats.

NEW QUESTION # 106

Evasive applications try to bypass your security by tunneling over common ports and trying multiple communication methods. Only solutions that reliably identify applications are effective at blocking evasive applications. You should evaluate the risks of these applications and see if they are good candidates for blocking.

Application	Times Accessed	Application Risk	Production Risk	Data Transferred (MB)
BitTorrent	0	Very High	Very Low	1.7281
TOR	0	Medium	Low	0.0006
SSL client	10,100	Medium	Medium	48.4102
Skype	644	Medium	Medium	10.3545
cURL	280	Medium	Medium	0.4840

Refer to the exhibit. An engineer is analyzing a Network Risk Report from Cisco FMC. Which application must the engineer take immediate action against to prevent unauthorized network use?

- **A. TOR**
- B. Chrome
- C. YouTube
- D. Kerberos

Answer: A

NEW QUESTION # 107

An engineer is implementing clustering in Cisco Secure Firewall Management Center. The configuration must ensure that the cluster has a designated control unit node with more resources than the other nodes. What must the engineer set for the priority value of the node?

- **A. value higher than the other units in the cluster**
- B. 0
- C. value lower than the other units in the cluster
- D. 1

Answer: A

Explanation:

In a Cisco Secure Firewall clustering deployment, the node with the highest priority value becomes the control unit. To ensure a specific node with more resources takes the control role, the engineer must assign it a priority higher than all other nodes in the cluster.

NEW QUESTION # 108

.....

This 300-710 certification assists you to put your career on the right track and helps you to achieve your career goals in a short time period.
