High salary is everyone's dream. Your salary is always based on your career competitive. In IT field, qualification is important. Our CLT questions and answers will help you hold opportunities and face difficulties bravely, then make a great achievement. Passing tests and getting a certification is certainly a valid method that proves your competencies. CLT Questions and answers is surely helpful study guide for candidates all over the world.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q106-Q111):

NEW QUESTION # 106

To protect themselves from hazardous materials, employees should be trained on

- A. IPPB and PPE
- B. ADL and SDS
- C. PPE and ADL
- D. PPE and SDS

Answer: D

Explanation:

In CLT 4.0, safe handling of hazardous materials includes training employees in both Personal Protective Equipment (PPE) and understanding Safety Data Sheets (SDS). PPE covers the correct gear (gloves, goggles, respirators, etc.) to minimize exposure.

SDS provide the chemical hazard information-composition, handling, first-aid, storage, disposal, etc. A robust hazmat training program incorporates general awareness, function-specific training, use of SDS, and PPE selection.

Reference:

NEW QUESTION # 107

Which of the following is NOT a way to verify the item has been correctly picked?

- A. hand-held bar code scanning
- B. verify accuracy with customer
- C. verify with pick list
- D. manual scanning

Answer: B

Explanation:

In the CLT "Order Processing" competency, verification of picked items is accomplished within the warehouse using systematic methods-such as comparing picked quantities to the pick list, scanning item barcodes, or manual confirmation. These verification tools prevent shipping errors and ensure inventory accuracy. Contacting the customer to confirm order details after picking is not an approved verification method because it disrupts process flow and violates standard operating procedures for order control. The warehouse is responsible for internal accuracy, not external re-verification. CLT standards highlight technologies like barcoding and WMS integration as best practices for verification, ensuring that correct items are packed and shipped without requiring customer involvement. This maintains professionalism, confidentiality, and operational efficiency while reducing time and communication errors.

NEW QUESTION # 108

Reverse logistics is done by a separate department in the warehouse/distribution center because

- A. it requires specialized knowledge of the products
- B. it is only cross-docked work
- C. it requires specialized storage
- D. it typically involves physical inspection of the product

Answer: D

Explanation:

Reverse logistics refers to handling products returned from customers for reasons such as damage, warranty, recall, or recycling. CLT "Product Receiving and Returns" competencies note that this process is often managed in a separate area or department because it requires detailed inspection, sorting, and disposition of goods. Unlike outbound operations, reverse logistics deals with variable product conditions and must determine whether items can be restocked, repaired, or disposed of. It involves additional documentation and often quality-control assessments. The CLT stresses physical inspection to prevent contamination of good stock and maintain accurate inventory status. By segregating returns, facilities can efficiently process reusable materials while maintaining order integrity and compliance with company policies.

NEW QUESTION # 109

A characteristic typical of an effective inventory management system is

- A. maintaining an inventory level that fills storage space to capacity
- B. an excessively small inventory level to minimize costs
- C. a sufficient quantity of goods is kept on hand and reordering is performed when necessary
- D. holding only enough inventory to fill half of the demand

Answer: C

Explanation:

Effective systems balance service level and cost. They maintain enough stock to meet demand through lead time (with safety stock where appropriate) and trigger timely reorders using methods like reorder points, EOQ, or min/max. Extremes-chronic under-stocking (stockouts) or over-stocking (excess carrying cost, obsolescence)-are specifically cautioned against in CLT guidance.

NEW QUESTION # 110

Due to the global nature of today's supply chain, logistics frontline workers need to have a basic understanding of governing bodies that manage the flow of goods into and out of the United States. Which of the following governing bodies represents most of the total world trade?

- A. U.S. Customs and Border Protection
- B. Drug Enforcement Agency
- C. U.S. State Department
- **D. World Trade Organization**

Answer: D

Explanation:

The World Trade Organization (WTO) is the global body responsible for setting and enforcing the rules of international trade between nations. According to CLT 4.0, understanding international trade governance helps logistics professionals manage import/export documentation, tariffs, and compliance. The WTO facilitates trade negotiations, resolves disputes, and ensures transparent policies to maintain predictable trade flows across borders. It represents the majority of global trade participants-over 95% of world commerce. For U.S.-based logistics workers, the WTO's policies influence how goods move internationally under agreements like GATT (General Agreement on Tariffs and Trade). By contrast, agencies like the DEA or State Department handle specialized or security functions, and CBP manages border enforcement, not global trade policy. Understanding WTO principles is crucial for CLT candidates to comprehend how trade regulations impact supply chain efficiency, tariffs, and global sourcing strategies.

NEW QUESTION # 111

.....

As you all know that practicing with the wrong preparation material will waste your valuable money and many precious study hours. So you need to choose the most proper and verified preparation material with caution. Preparation material for the Certified Logistics Technician (CLT) 4.0 (CLT) exam questions from Pass4sures helps to break down the most difficult concepts into easy-to-understand examples. Also, you will find that all the included questions are based on the last and updated CLT Exam Dumps version. We are sure that using CLT Exam Questions preparation material will support you in passing the CLT exam with confidence.
