With our SAFe-Practitioner training guide, you will be doomed to pass the exam successfully.

## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q130-Q135):

### NEW QUESTION # 130

Which of the following is not SAFe configuration?

- A. Portfolio
- B. Large Solution
- C. Essential
- D. Medium Solution

**Answer: D**

### NEW QUESTION # 131

Which the simplest SAFe configuration?

- A. Portfolio
- B. Large Solution
- C. Essential
- D. Program

**Answer: C**

### NEW QUESTION # 132

Which activity happens in the Inspect and Adapt workshop?

- A. Planning the next PI
- B. Refining the Program backlog
- C. A demo of the integrated system
- D. A retrospective of the Iteration

**Answer: C**

Explanation:

The Inspect and Adapt workshop is a significant event held at the end of each Program Increment (PI), where the current state of the Solution is demonstrated and evaluated by the Agile Release Train (ART) teams. The workshop consists of three parts: PI System Demo, Quantitative and qualitative measurement, and Retrospective and problem-solving workshop. The PI System Demo is the first part of the workshop, where the ART shows all the Features they have developed during the PI to the stakeholders and customers. The demo provides feedback on the value delivered and the quality of the solution. The other parts of the workshop focus on measuring the performance of the ART and identifying improvement actions for the next PI. References: Inspect and Adapt, PI System Demo

### NEW QUESTION # 133

What is scrum?

- A. A lightweight process for cross-functional, self-organized teams
- B. A methodology used to deliver usable and reliable solutions to the end user
- C. A routine method of deploying deliverables to operations
- D. A process for continuously maintaining deployment readiness

**Answer: A**

Explanation:

Scrum is a framework that enables teams to deliver value in complex and uncertain environments. Scrum is based on the agile manifesto, which values individuals and interactions, working software, customer collaboration, and responding to change. Scrum

consists of three roles (Product Owner, Scrum Master, and Developers), five events (Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective, and Sprint), and three artifacts (Product Backlog, Sprint Backlog, and Increment). Scrum teams work in short iterations called Sprints, where they plan, execute, and deliver a potentially releasable product increment. Scrum teams inspect and adapt their process and product continuously, using empirical feedback and data. Scrum teams are self-organized, meaning they decide how to best accomplish their work, and cross-functional, meaning they have all the skills needed to create a product increment.

## NEW QUESTION # 134

What is a minimum viable product? (MVP)

- A. A minimal version of a new product used to test a hypothesis
- B. A prototype that can be used to explore user needs
- C. A Feature that can be delivered in an Iteration
- D. A minimal product that can be built to achieve market dominance

**Answer: A**

Explanation:

According to the SAFe-for-Teams-SAFe-Practitioner-6-0 documents, a minimum viable product (MVP) is an early and minimal version of a new solution sufficient to prove or disprove an epic hypothesis<sup>1</sup>. An MVP is not a prototype, a feature, or a product. It is a learning tool that helps validate assumptions, reduce uncertainty, and increase the likelihood of building the right thing<sup>2</sup>. Therefore, the correct answer is A. A minimal version of a new product used to test a hypothesis. References: Epic - Scaled Agile Framework, What is a Minimum Viable Product (MVP)? | Agile Alliance

## NEW QUESTION # 135

.....
