NEW QUESTION # 53

What additional customizing is required for a new EWM document type for an inbound process?

- A. Define a document category for the inbound process.
- B. Define the SAP ERP document type mapping to the delivery document type.
- C. Define the EWM delivery type determination.
- D. Define a delivery item type for the inbound process.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

For a new EWM document type in an inbound process, integration with SAP ERP is critical. Option C ("Define the SAP ERP document type mapping to the delivery document type") is correct because you must map the ERP document type (e.g., "EL" for inbound delivery) to the EWM document type in SPRO: SCM Extended Warehouse Management > Interfaces > ERP Integration > Map Document Types. Options A, B, and D are either predefined (document category) or not mandatory (item type, delivery type determination) for basic inbound setup.

NEW QUESTION # 54

To which of the following objects can you assign external process steps? Note: There are 2 correct answers to this question.

- A. Delivery item type

Answer: B,C

NEW QUESTION # 55

Which of the following are product warehouse tasks during putaway with process-oriented storage control?

- A. The first and final process steps
- B. All process steps
- C. The final process step
- D. The first process step

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In process-oriented storage control (POSC) for putaway, warehouse tasks are created for specific steps. Option D ("The first and final process steps") is correct because tasks are generated for the initial step (e.g., unloading) and the final step (e.g., putaway to bin), as defined in the storage process configuration in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Process-Oriented Storage Control. Option A (all steps) includes intermediate steps not always task-based, while B and C are too restrictive.

- * Master Data (C): Contains foundational information such as customers, vendors, or materials.

What can be used to specify the storage process? Note: There are 2 correct answers to this question.

- A. Warehouse process type
- B. Activity area
- C. Warehouse order creation rule
- D. Warehouse storage type

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The storage process in SAP EWM defines how goods are stored. Option A ("Warehouse process type") is correct as it specifies the process (e.g., putaway), configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type. Option C ("Warehouse storage type") is correct because it defines the storage location type (e.g., bulk, high rack), set in SPRO: SCM Extended Warehouse Management > Master Data > Storage Types. Option B (WOGR) groups tasks, and option D (activity area) organizes bins, neither directly specifying the storage process.
